For the range and care of florpin, or Rupling.
Dr. AMOS G HULL, having repeaced, during trenty five ream
practice in Surgery, the distress spit
misery attending the disease of Runture and the faral consequences fraquently incident to it, and being convinced that the unhappy effects were
generally the result of bady con
structed Traises or the neglect to use
any, was prompted from dealings, of
professional duty, and as anxious deprofessional duty, and as anxious de
professional duty, and as anxiou he has brought into suce saful opera tion a Truss, constructed on a new principle and adapted to all cases of Rupture in both sexes; always, with out an exception, falfilling the indi-cation of confining for keeping up the

cation of confiring for Recping up the bowel, and often especially in young persons and recent cless, effecting a permanent cure.

Let't be observed that the pad of this truss instead of heing convex like that of all other Trusses, is slightly concave, like the open paim of the hand. This pad being placed over the rupture and the spring of the truss exerting its power upon the cen-tre of it, the strong pressure is made unites the ruptured part so as to effect a radical cure of the complaint.

The following testimonials in its fa your, are submitted to the public Extract from the second edition of .. Thutcher's Modern Practice of Physic." Boston 1826.

"A great variety of Trusses, form ed on different principles, have been from time to time, introduced to pub lie notice: but with one exception i may be asserted, that they have been found altogether deficient in those just principles upon which such instru-ments night to be formed. It is with in a few years that a leuss has been invented by Dr. A. G. Bill, a respec-table Physician, and Surgeon of New York, and late President of the Onei da Medical Society which is incom parably superior in its principles and properties to any of those previously in use. De Hull is exclusively entitled to the credit of first adaptin true surgical principle for the radical cure of Heruta. He happily conceived the idea that the pad of the Truss should be so constructed as simply to support the muscular fibres around the ring or aperture as much as pos sible, in the state in which they are maintained in perfect health. Unless this be attained the parts can never recover their natural tone whateve may be the degree of pressure applied

Valentine Mott, M D Professor of Surgery in the University of New Yo.k deposes:

You k deposes:

"The great and signal benefits which are produced by this frus result from its strict subservance to and accordance with Scientific and Surgical principles. Its mechanical adaptation to the parts the simplicity of its construction the limited motion nicely graduated by experiment, to the different attitudes of the body and to the action of the muscles; the permanency of its location on the bo-dy, and its pressure on the circum ference of the abdominal ring, arqualities, the tendency of which is to strengthen and restore the weakened ltimately to accomplish a cure of the

The operation and effects of this Truss is therefore directly the reverse of all Trusses heretofore in use; which being convex tended trenlarge the dimensions of the rupture open practice to the exclusion of all others and am of opinion that the union of physical design and mechanical structure in this instrument render it what has long been the desideratum of practical surgeons in Europe and A

merica.

7. W Hunter, M D of N York
deposes as follows, "In two very insersating cases of Scrotal Hernia
(which is the worst and most difficult which is the worst and most difficult kind) that came under my care, it was worn with perfect comfort, and effected a complete cure of both in less than twelve mouths. This Truss is approved of by the most eminent Surgeons in the United States and Bureps, particularly by the celebrated Sir Astley Cooper, of London

Joseph Evans, late of Philadelphia,
Leather Merchant deposes as follows
Having been rup ured about seven
years ago. I applied to Dr. Hull. in
person, who furnished me with one person, who furnished me with one of his Tru-ses, and afterwearing it a bout six months, I found myself en tirely cured so much so that I can walk about with safety, without wear ing the Truss, and is my opinion it is one of the greatest improvements and blessings to manking that is known. Extract from the Medical Review and Jernali conducted by Professor The We have and ar Cleina, winness particular True-less upon leight different patien's two of winds were effected with Donble Screens Hernia, and the results of our experience Have been so satisfactory

acquainted with.

N. S. Dr. Hull's Trusses adapted to the different spaces of cupture, its which make, temales and children are subject, ore kept at the office of Dr. Exarr. No. 37 Past Payette street. opposite the First Presbyterish Church who will attend to their application, and where those labouring under this disease are invited to call. Per some residing at a distance can be fit ted by sending a measure of the body near the hip. Orders from Country Physicians and Druggists, willbe duly attended to.
