Dr. Hull's Truss

nia, or Hupture. Dr. AMOS G HULL, having wit nessed, during lineary five years practice in Surgery, the discress and intervention and the fatal consequences frequently incident to it, and being convinced that the unhappy effects were generally the result of badly conventions. structed Trusses, or the neglect to use any, was prompted from feelings of professional duty, and an anxious deire to witness a more effectual remedy, to devote a share of his time to the construction of an instrument for that purpose. He is now satisfied that he has brought into succ saful opera tion a Truss, constructed on a new principle and adapted to all cases of Rupture in both sexes; always, with out an exception, fulfilling the indi cation of confining or keeping up the howel, and often, especially in young persons and recent cases, effecting a

permanent cure.

Let it be observed that the pad of slightly concave, like the open palm of the hand. This pad being placed over the rupture and the spring of the truss exerting its power upon the cen-tre of it, the strong pressure is made by its circular margin, around the rupture opening and a diminished pressure by its centre. It thereby not only prevents the escape of bowel, but approximates, and often unites the ruptured part so as to effect radical cure of the complaint.

The following testimonials in its fa your, are submitted to the public Extract from the second edition of

"Thatcher's Modern Practice of Physic," Boston 1826. "A great variety of Trusses, formed on different principles, have been from time to time, introduced to pub lic notice; but with one exception it may be asserted, that they have been

found altogether deficient in those just principles upon which such instru-ments ought to be formed. It is within a few years that a Truss has been invented by Dr. A. G. Hull, a respec table Physician and Surgeon of New York, and late President of the Onei da Medical Society, which is incom parably superior in its principles and properties to any of those previously in use. Dr Hull is exclusively enti-tled to the credit of first adapting the true surgical principle for the radical cure of Hernia He harpily conceived the idea that the pad of the Trues should be so constructed as simply to support the muscular fibres around the ring or aperture as much as pos-sible, in the state in which they are maintained in perfect health. Unless this be attained the parts can never recover their natural tone, whatever

may be the degree of pressure appli Valentine Mott, M D Professor of Surgery in the University of New York deposes:

"The great and signal benefit which are produced by this Truss, result from its strict subservance to and accordance with Scientific and Surgical principles. Its mechanical of its construction the limited motion the different attitudes of the body and to the action of the muscles; the permanency of its location on the bo dy, and its pressure on the circuin ference of the abdominal ring, are qualities, the tendency of which is to strengthen and restore the weakened parts, to contract the aperture, and ultimately to accomplish a cure of the

"The operation and effects of this Truss is therefore directly the reverse of all Trusses heretofore in use which being convex tended ts enlarge the dimensions of the rupture open ing" "I have dopted it in my own practice to the exclusion of all others and am of opinion that the union of ture in this instrument render it what as long been the desideratum of practical surgeons in Europe and A.

T. W. Hunter, M. D of N. York deposes as follows, "In two very in-teresting cases of Scrotal Hernia which is the worst and most difficult kind) that came under my care, it was worn with perfect comfort, and effected a complete cure of both in less than twelve months. This Trusis approved of by the most eminent Surgeons in the United States and Europe particularly by the celebrat-

ed Sir Astley Cooper, of London.
Joseph Evans, late of Philadelphia, Joseph Evans, late of rhisacelphia, Leather Merchant deposes as follows "Having been rupured about seven years ago, I applied to Dr. Hull, in person, who furnished me with one person, who furnished me with one of his Trusses, and after wearing it a bout six months, I found myself en tirely cured so much so that I can walk about with safety, without wear ing the Truss; and in my opinion it is

one of the greatest improvements and blessings to mankind that is known. Extract from the Medical Review and Journal, conducted by Professors Eberie and M Clellan, Philadelphia,

"We have applied in: Phillie Trustes of Anna Arunda's age, will the sub of which were affected with. Double the election to be held LAW. Serotal Hernia, and the results of our experience have been so attraction. April 27.

PROPOSAL

FOR PRINTING The Journals of the Conventions of the Province of Maryland,

Held in the City of Annapolis, in the years 1774, 1775 and 1776.

IF Sufficient encouragement be ofered, the Subscriber proposes to pubish, in one volume octavo, the Jour nals of the Conventions of the Province of Maryland in the years 1774, '5 and '6. It is believed that there are not more than two copies of these Journals now extant; and from the circumstance that they were printed in pamphlet form, and unbound, it may be fairly concluded that they, too, must in a few years be destroyed by the mere decay of time. These Journals are the only authentic evidence of the Political Hisory of Maryland, during that interesting and unquiet period. Although we have, in abundance, histories of physical design and mechanical struc. Maryland, as connected with the association of Provinces and Colonies, at on against the improper assumption of power on the part of the Mother Coun ry, yet none of these works embrace hat may be termed its Domestic au

Internal Political History. This part of the history of Mary-land it should be her pride to hand down to posterity, not only on account of its deep interest, but as a public State Record of the voluntary sacrifices, daring spirit, and determined re-solution, of her citizens, during this period of doubt and dismay.

In the confident expectation that the in the consident expectation that the citizens of Maryland will consider the proposed publication of sufficient importance to entitle it to their patronage, the Subscriber is induced to issue

ige, the Subscription these proposals.
The Price per Copy, not to ex-
