From the Mauch Chunk Courier. MOONLIGHT-ON THE RAIL-ROAD.

The moon had just arose in splen-dour o'er the highest hill which embowers the romantic Lehigh-and no sound save the distant murmur of its untamed waters, borne on the halmy breeze of a June evening, the profound silence which reigned in our little village,-calm and composed as the blue concave above, where not a cloud deformed the beauty of the brilliant scene, were its peaceful inhabitants. All seemed fitted to sink the weary mind to sweet repose-and care with the tempest and storm was howling far beyond our highland recesses.

"Tis a lovely evening, far too beautiful to be spent within the confines of a parlour-let us sally forth and enjoy nature in her loveliest dress," said one of my companions. Where shall we go, said another. I could enjoy a ride on the rail

road to the mines this eve-He would have finished the sentence, but the wild note of the hugle from the mountain, started us from our seats, and with one accord we rushed out and began the ascent to the place of departure.

All was ready-and away went—the bugle playing, the feath-ered night-songsters trilling sweet music-and all beneath, around, a bove, with their commingled charms, gave enchantment to the magic scene. I felt a thrill of pleasure through my veins, as the busy mind became ab sorbed in contemplation. Former days, with their thousand pleasing and painful recollections came flitting by on the wing of faithful memory, We are at Hackleburnie farm,'

said the driver.

J. Lippincott for the accommodation of visiters to the mines, and each one obtained what pleased him best.

A vivid flash of lightning started

us all from our seats, and a tremendous crash followed, which shook the mountain to its caverned base, and made the hills re-echo to the sound.

There was no time for deliberation; a heavy and highly charged electric cloud was rapidly rising over the hill; the carriage was wheeled round; and all hands aboard. A moment was lost, and we were deprived of pleasure of beating the shower by a fair race. A hollow gust of wind swept by, the moon was obscured; a few drops fell; a brilliant scured; a few drops fell; a brilliant flash showed the nearness of the storm; the carriage was started-and the Guide, wrapping his coat about him, left it to its own control. The storm now commenced in good earnest, wetting the rails, which added to our speed, and although we might have escaped in the rear; yet being met in front by another cloud, we were obliged to sustain the pitiless peltings of the contending elements with the best look of resignation that we could assume. Well, among all the strange things

that I have seen there is nothing like a rail toad. We have come four miles in less than twelve minutes,"

said be, as a bright flash revealed the hands of his watch

My dress was changed, and I was seated on the plazza; the storm had passed over, and the Queen of high breaking through the clouds, looked like beauty in tears, when deprived for a short time of what she most loves, scattering otherial light around her, and reigning o'er Creation. I felt assisted with the occurrences of the evening. The mighty rush of the wild winds of heaven along our wilder hills—the vivid lightning's lish and hollow thunder's roar—the meteor-like course of the car, and Egyptian darkness of the night, combined, formed a scene, for which I would suffer more than to be drench ed in the storm. Nature has charms for me in the peaceful calm of a moonlight evening, or among the contending elements of Heaven. This was one of her grandest displays, and nothing would contribute mor to my enjoyment than another ride by moonlight on the rail road, with the accompaniments. E. L. P.
