dr. Hull's Truss,

ture. This Surgical instrument is now so well known to the Medical profession, and she extensively used by unfortunate sufferers labouring under the disease of Heroita, that a particular account of its mechanical construction of its surgical offices is thought unmonants. OR the relief and cure of Hernia or Rup its surgical effects is thought unnecessary .-The subjoined temarks from Physicians and Surgeons of high respectability in our country, are the results of much practical experience in

the use and application of this truss.

James Thatcher, M. D. author of the Mod ern Practice, in his second edition, under the subject of Hernia, remarks. "Dr. Hull is exsubject of Herma, remarks. Dr. Holl is ex-clusively entitled to the credit of first adapting the true Surgical principle for the radical cure of Herma. He happily conceived the idea that the pad of the Truss should be so constructed as simply to support the moscular fibres around the ring or aperture as much as possible, in the the pad of the Truss should be so constructed as simply to support the moscular fibres around the ring or aperture as moch as possible, in the state in which they are maintained in perfect the whole to be secured by bond, with approximation.

York, turned his attention to the subject, and by his improvement in the construction of trusses, has rendered it certain that all recent tuptures and those of children, may be permanent ly cured, and those of old people and of long standing, may, in many cases, also be reme died. The ped of Dr. Hull's Truss is concave and not convex; and hence the raised circular margin, by proper adaptation, presses upon the sid s of the hernial opening, and tends to close the aperture and cure the hernia.

M. L. Knapp, M. D. late Physician and Surgeon to the Baltimore General Dispensary, in a communication to Doctor Hull, says: 41 in a communication to Doctor Hull, says: "I have applied your trusses in several hundred cases during the last three years. A great many upon whom I have applied your trusses, have been radically cured; and some of these were cases of long standing, where all other trusses had failed. I send you a note of thanks from Mr. P. a citizen of great respectability. June 1808, and that: frusses had ranen. I send you a note of the from Mr. P. a citizen of great respectability, who was cured of a bad scrotal rupture, of thirty-five years standing, by wearing one of your trusses for two years. He had worn other trusses twenty nine years. His son, also, ther trusses twenty nine years. His son, also, aged 16 years, ruptured from his infancy, was cured under my care in less than two years.—A case of scrotal rupture, of twenty years standing, in a labouring man forty years old, on whom I applied one of your trusses, the day after the injury, was cured in three months—ney, their heirs and assigns in three trusses. ter the injury, was cured in three months.-Experience alone, can make known to the Sur geon the full powers and excellence of these ignstruments. Your trusses are exclusively preferred by the Professors in both of the Medical Schools in this city, and the Faculty in gen-

Baltimore, January, 1830.
Valentine Mott, M. D. Professor of Surge. Ty, says. The great and signal benefits which are produced by this Truss, result from its strict subservience to, and accordance with

Scientific and Surgical principles.
The operation and effect of this Truss is directly the reverse of all Trusses heretofore in use; which being convex, tended to enlarge the donen-ions of the rupture opening.' 'I am of opinion that the union of Surgical design & mechanical structure in this instrument render what has long been the desideratum of Practical Surgeons in Europe and America.'
Professor Mott also in lecturing upon Her-

nia, recommends Dr. Hull's Truss to the exclusion of all others.
