DR. HULL'S TRUSS FOR the reflet and cure of Hernia or Rup weil known to the Medical profession, and so well known to the medical prepriotic and sine extensively used by unfortunate sufferers laboured ing under the disease of Hernia, that a particular account of its mechanical constitucion of its surgical effects is alugify unnecessary.—
The subjoined remarks from Physicians and Surgeons of high respectability in our country, much practical experience in

the use and application of this truss.

James Thatcher, M. D. author of the Modern Practice, in his second edition, under the subject of Hernia, remarks \*D. Hull is exclusively entitled to the could of first adapting the true Surgical principle for the radical cure of Hernia. He happily conceived the idea that the pad of the Trust should be so constructed as simply to support the muscular fibres around the ring or aperture as much as possible, in the state in which they are maintained in perfect health. Unless this be attained the parts can never recover their natural tone, whatever may be the degree of pressure applied."

ANY TO BE EDITED BY THE REV. WM. R. WITTINGHAM, A. M. recent Editor Sfih. Finity Vister, and of the Chi'd rule Magazine of the General Fittestone Epiceoful Standay School Union.

The second presentation of this design to the Episcopal public, is owing to no want of encouragement, or anticipation of difficulty in its accomplishment. A considerable delay in the execution of the former proposals, deemed, necessary for the maturing of the original design, and for ascertaining exactly the nature of the wants which the publication is intended to supply, left the Trustees of the Protestant Episcopal Press, free to alter, and, if circumstances should warrant, to enlarge their plan. Communications from several quarters, and from the most respectable sources, produced by this delay, have led to the done viction, upon which the Trustees now propose to act, that a plan far more comprehensive than that first presented, is called for by our Church in this country.
