

DR. HULL'S TRUSS.

FOR the relief and cure of Hernia or Rupture. This Surgical Instrument is now so well known to the Medical Profession, and so extensively used by unfortunate sufferers laboring under the disease of Hernia, that a particular account of its mechanical construction of its surgical effects is thought unnecessary. The subjoined remarks from Physicians and Surgeons of high respectability in our country, are the results of much practical experience in the use and application of this truss.

James Thatcher, M. D. author of the Modern Practice, in his second edition, under the subject of Hernia remarks "Dr. Hull is exclusively entitled to the credit of first adapting the true Surgical principle of the radical cure of Hernia. He happily conceived the idea that the pad of the Truss should be so constructed as to support the muscular fibres around the ring or aperture as much as possible, in the state in which they are maintained in perfect health. Unless this be attained the parts can never recover their natural tone, whatever may be the degree of pressure applied."

Samuel Ackerly, M. D. in his excellent edition of Hull's Medical Dictionary, under the head of "Truss," after enumerating the evils resulting from the use of the defective trusses formerly worn. "This evil was not fully remedied until Dr. Amos G. Hull, of New York, turned his attention to the subject, and by his improvement in the construction of trusses, has rendered it certain that all recent ruptures and those of children, may be permanently cured, and those of old people, and of long standing, may, in many cases, also be remedied. The pad of Dr. Hull's Truss is concave and not convex, and hence the raised circular margin, by proper adaptation, presses upon the sides of the hernial opening, and tends to close the aperture and cure the hernia."

M. L. Knapp, M. D. late Physician and Surgeon to the Baltimore General Dispensary, in a communication to Doctor Hull, says: "I have applied your trusses in several hundred cases during the last three years. A great many upon whom I have applied your trusses, have been radically cured; and some of these were cases of long standing, where all other trusses had failed. I send you a note of thanks from Mr. P., a citizen of great respectability, who was cured of a bad scrotal rupture, of thirty-five years standing, by wearing one of your trusses for two years. He had worn other trusses twenty nine years. His son, also, aged 16 years, ruptured from his infancy, was cured under my care in less than two years. A case of scrotal rupture, of twenty years standing, in a labouring man forty years old, was cured under my notice by one of your trusses in six months. A case of groin rupture, from lifting, in a labouring man, thirty years old, on whom I applied one of your trusses, the day after the injury, was cured in three months. Experience alone, can make known to the Surgeon the full powers and excellence of these instruments. Your trusses are exclusively preferred by the Professors in both of the Medical Schools in this city, and the Faculty in general."

Baltimore, January, 1830.
Valentine Mott, M. D. Professor of Surgery, says: "The great and signal benefits which are produced by this Truss, result from its strict subservience to, and accordance with Scientific and Surgical principles. The operation and effect of this Truss is directly the reverse of all Trusses heretofore in use, which being convex, tended to enlarge the dimensions of the rupture opening." "I am of opinion that the union of Surgical design and mechanical structure in this instrument render it what has long been the desideratum of Practising Surgeons in Europe and America."
Professor Mott also in lecturing upon Hernia, recommended Dr. Hull's Truss to the exclusion of all others.

PROSPECTUS

Series of Standard Works

Published by the

UNITED STATES:

TO BE PUBLISHED BY THE

N. Y. PROTESTANT EPISCOPAL PRESS

AND TO BE EDITED BY THE

REV. WM. R. WILLINGHAM, A. M.

General Editor of the Family Visitor, and of the Church Magazine of the General Protestant Episcopal Sunday School Union.

The second presentation of this design to the Episcopal public, is owing to no want of encouragement, or anticipation of difficulty in its accomplishment. A considerable delay in the execution of the former proposal, deemed necessary for the maturing of the original design, and for ascertaining exactly the nature of the work which the publication is intended to supply, left the Trustees of the Protestant Episcopal Press, free to alter, and, if circumstances should warrant, to enlarge their plan. Communications from several quarters, and from the most respectable sources, produced a delay, which has led to the adoption upon which the Trustee now propose to set a plan far more comprehensive than that first presented, is called for by our Church in this country. A more republication of works of English and American divines, was then contemplated. It is now intended, by the introduction of every thing necessary to adapt the works selected to the circumstances of the Protestant Episcopal Church in the United States, to give the publication the character of an original work, and at the same time, to extend its design so far as to embrace the works of the primitive Christian writers, and if it occur present itself, of foreign divines.

PLAN OF THE WORK.

I. Translations from the principal authors of the Christian era, of the writings of men whose names are known to the Christian Church, and from such other works of the Fathers as are of the greatest utility to the Church in the present age, and which they select for the use of the people. These will be translated into English, and will accompany these in such manner as to render them interesting, and useful, to the modern and unlearned reader, and to supply the deficiencies of our own literature, and to supply the wants of our own people.

II. Tracts and Essays by English divines, either called forth by temporary exigencies, but of permanent utility, and now collected in our large libraries, and which, by their selection, and arrangement, will be with the most advantage, to the use of the people, and to the advancement of the cause of the Church. The names of CRANMER, HALL, HICKES, WATERMAN, &c. will be included in the list.

III. Entire works of the most eminent divines of the Christian era, and of our own times, who have been distinguished by their piety, and whose works are of permanent utility, and whose names are known to the Christian Church, and from such other works of the Fathers as are of the greatest utility to the Church in the present age, and which they select for the use of the people. These will be translated into English, and will accompany these in such manner as to render them interesting, and useful, to the modern and unlearned reader, and to supply the deficiencies of our own literature, and to supply the wants of our own people.

JOURNAL OF HEALTH.

EDITED BY AN ASSOCIATION OF PHYSICIANS.

The primary object with the publication of the Journal of Health, is to point out the means of preserving health and preventing disease. To state the all causes and both sexes, the education of the young, and the habits of the adult, in a familiar and friendly, and with an appropriate professional tone and attention, as would be the case with a medical journal, and to make the subject of health the most interesting and valuable to the public.

The Journal of Health, is published weekly, and contains much reading matter, and is calculated to be useful, and interesting to the mind and body, climate and locality, clothing and the physical education of children, are topics of permanent and pervading interest, with the discussion and elucidation of which the pages of the work will be mainly filled.

Recommendation of the work.

We approve of the plan of the publication, entitled the "Journal of Health," as conducted, and believe, that it is calculated to be useful, and interesting to the public, and to be a valuable addition to the welfare of society. The numbers which have appeared, evince talent, and may be viewed as a proof of the continual usefulness of the publication, and conducted by its present editors. We therefore, do not hesitate in recommending it to public patronage.
