READ'S PATENT.

IMPORTANT IMPROVEMENT. In the art of building Chimneys and altering those already built, in such manner as to prevent or cure their smoking.

From the time that chimneys were first introduced, the building thereon has been but a series of experiments. The best workmen have only succeeded, when accidentally approximating the principles, now first systematized and offered to the public. That this subject should have been involved in mystery till the present time, can only be attributed to the imperfect state of Chemical Science until within the last few years. The progress recently made in that science has enabled the subscriber to reduce the art of building chimneys, to a system, invariably producing the desired result without respect to smoke, and at the same time making a saving of fuel.

Having secured the exclusive privilege of using and vending said improvement, for fourteen years from the first day of April 1829, the subscriber offers for sale on the following terms. The right for a city or town, is \$100. For a village, \$50. For a Township, Borough or Village, \$20. For a single house, \$5. Any person wishing to purchase may transmit the sum required, and a deed shall be immediately returned containing all necessary instructions to enable any person to construct chimneys. Every chimney which shall be built under the authority of, and agreeable to his patent is hereby warranted a good chimney. All letters to the patentee must be post paid. The publisher of a paper at the Capital of each state, who shall publish this advertisement and Certificate, and continue the same for one year, will entitle himself to the right for such capital city or the county in which his state of Government is located. Every possessor of a paper in the United States, who will give this advertisement, &c. three insertions, and forward one of the papers, shall receive the right for one house.

DR. HULL'S TRUSS.

FOR the relief and cure of Hernia or Rupture. This Surgical Instrument is now so well known by the Medical Profession, and so extensively used by the unfortunate sufferers labouring under the disease of Hernia, that a particular account of its mechanical construction, of its surgical effects is thought unnecessary.

The subjoined remarks from Physicians and Surgeons of high respectability in our country, are the results of much practical experience in the use and application of this Truss.

James Thatcher, M. D. author of the Modern Practice, in his second edition, under the subject of Hernia, remarks "Dr. Hull is exclusively entitled to the credit of first adapting the true Surgical principle for the radical cure of Hernia. He happily conceived the idea that the pad of the Truss should be so constructed as simply to support the muscular fibres around the ring or aperture as much as possible, in the state in which they are maintained in perfect health. Unless this be attained the parts can never recover their natural tone, whatever may be the degree of pressure applied."

Samuel Ackerly, M. D. in his excellent edition of Hooper's Medical Dictionary, under the head of "Truss," after enumerating the evils resulting from the use of the defective trusses formerly worn, says, "This evil was not fully remedied until Dr. Amos G. Hull, of New-York, turned his attention to the subject, and by his improvement in the construction of trusses, has rendered it certain that all recent ruptures and those of old people, may be permanently cured, and those of old people, and of long standing, may, in many cases, also be remedied. The pad of Dr. Hull's Truss is concave and not convex; and hence the raised circular margin, by proper adaptation, presses upon the sides of the hernial opening, and tends to close the aperture and cure the hernia."

M. L. Knapp, M. D. late Physician and Surgeon to the Baltimore General Dispensary, in a communication to Doctor Hull, says: "I have applied your trusses in several hundred cases during the last three years. A great many upon whom I have applied your trusses, have been radically cured; and some of these were cases of long standing, where all other trusses had failed. I send you a note of thanks from Mr. P., a citizen of great respectability, who was cured of a bad serotal rupture, of thirty-five years standing, by wearing one of your trusses twenty nine years. His son, also, aged 16 years, ruptured from his infancy, was cured under my care in less than two years."

A case of serotal rupture, of twenty years standing, in a labouring man forty years old, was cured under my notice by one of your trusses in six months. A case of groin rupture, from lifting, in a labouring man, thirty years old, on whom I applied one of your trusses, the day after the injury, was cured in three months."

Experience alone, can make known to the Surgeon the full powers and excellence of these instruments. Your trusses are exclusively preferred by the Professors in both of the Medical Schools in this city, and the Faculty in general.

Baltimore, January, 1850.

Valentine Mott, M. D. Professor of Surgery, says, "The great and signal benefits which are produced by this Truss, result from its strict subservience to, and accordance with Scientific and Surgical principles."

"The operation and effect of this Truss is directly the reverse of all Trusses heretofore in use, which being convex, tended to enlarge the dimensions of the rupture opening." "I am of opinion that the union of Surgical design & mechanical structure in this instrument render it what has long been the desideratum of Practical Surgeons in Europe and America."

Professor Mott also in lecturing upon Hernia, recommends Dr. Hull's Truss to the exclusion of all others.

THE GIPSEY'S PROPHECY.—BY L. E. L.

Beh, show back thy raven hair, Lay thy white brow in the moonlight bare, And look on the stars, and look on thee, And read the page of thy destiny.

Beh!—thou shalt I love for my tale— From youth thy cheek will be pale; On the side is a red rose tree— The lone rose droops withered, so thou wilt be.

Beh! thy neck is a ruby chain, One of the rubies is broken in twain; From the ground each shattered part, Broken and lost, they will be like thy heart.

Beh! thy voice—it alone at thy birth, Look again—it has fallen to earth; In plays has passed like the lava wave— So or yet sooner, wilt thou decay.

Beh! on fountain's silver fall, To a moonlight rainbow's conical, In the light will melt the tears— Well may they image thy future years.

Beh! may I read in thy hazel eyes, From the long dark look that o'er them lies; So in my art can but see
