ON application, by petition in writing, of Gharles S. Itidgely, (in the recess of Anne-Arundel county court,) to me, the subscriber, Chief Judge of the third judicial district of the state of Maryland, praying the benefit of the act of assembly, entitled, An act for the relief of sundry insolvent debtors, passed at November session 1803, and the several supplements thereto, a schedule of his property, and a list of his creditors, (on oath, so far as he could ascertain them,) being annexed to his said petition; and I being satisfied that the said Charles S Ridgely hath resided in the state of Maryland for two years next preceding the state of Maryland for two years next preceding the date of his said petition, and being also satisfied that the said Charles S. Ridgely is in actual confinement for debt, and I having appointed George Cooke trus-tee for the benefit of the creditors of the said Charles tor debt, and I having appointed George Cooke trustee for the benefit of the creditors of the said Charles S. Ridgely, which said trustee has given bond in due form for the faithful performance of his trust; and the said Charles S. Ridgely, having given bond, with security, for his personal appearance in Anne-Arundel county, court, on the third Monday of April next, to answer to allegations or interrogatories of his creditors, and having executed a deed of conveyance to his said trustee for all his property, real, personal and mixed, I do hereby order and stijudge that the said Charles S. Ridgely be discharged from his confinement, and that he give notice to his creditors, by causing a copy of the order to be inserted in one of the newspapers printed in the city of Annapolis, once a week for the term of three months, to appear before Anne-Arundel county court, to be held in the city of Annapolis, on the third Monday of April next, to shew cause, if any they have, why the said Charles S. Ridgely should not have the benefit of the said act and supplements, as prayed.

DR. HULL'S TRUSS.

FOR the relief and cure of Hernia or Rap-ture: This Surfical instrument is new to well known to the Medical profession, and to extensivly used by unfurtunate sufferers labour-ing under the disease of Hernia, that a parties lar account of its mechanical lar account of its mechanical construction of its surgical effects is thought unnecessary.

The subjoined remarks from Physicians and Surgeons of high respectability in our country, are the results of much practical experience in the use and application of this trass.

James Thateher, M. D. author of the Mod-

ern Practice, in his second edition, under the subject of Hernia, remarks "Dr. Hall is second edition, and the subject of Hernia, remarks "Dr. Hall is second edition first adapting the subject of the s the true Surgical principle for the radical cure of Hernia. He happily conceived the idea that the pad of the Truss should be so constructed as simply to support the muscular fibres around as simply to support the moscess have around the ring or aperture as much as possible, in the state in which they are maintained in perfect health. Unless this be attained the parts can never recover their natural tone, whatever may;

be the degree of pressure applied."

Samuel Ackerly, M. D. in his excellent edition of 'Hooper's Medical Dictionary, under the head of 'Truss,' after enumerating the end resulting from the use of the defective trusses, formerly worn, says, 'This evil was not fal-ly remedied until Dr. Amos G. Hull, of New York, turned his attention to the subject, and by his improvement in the construction of trasses, has rendered it certain that all recent rupsee, has renuered it certain may be permanent tures and those of children, may be permanently cured, and those of old people and of long. standing, may, in many cases, also be reme-died. The pad of Dr. Hull'a Truss is concre and not convex; and hence the raised circular margin, by proper adaptation, presses upon the the aperture and cure the hernia."

M. L. Knapp, M. D. late Physician and Surgeon to the Baltimore General Dispensity, in a communication to Doctor Hull, says: [in a communication to Doctor Hull, says: I have applied your trusses in several hundred cases during the last three years. A great many upon whom I have applied your trosses, have been radically cured; and some of these were cases of long standing, where all other trusses had failed. I send you a note of thanks from Mr. P. a citizen of great respectability, who was noted of a bull secretary. who was cured of a bad scrotal rupture, of thirty-five years standing, by wearing one of your trusses for two years. He had worn onrivate houses in the town. Such students, however, as well as those in the college building, are subject to the daily visitation of the Professors and Tutors.

The government of the institution is intended to be parental. The anxious endeavours of the Faculty will be directed to excite in the students a high emulation for intellectual and moral excetlence, by exacting rigid accuracy in recitations, by enforcing liabits of industry and close attention to study, and by exercising a vigil and care to prevent every practice that may be vicious in its nature or demoralizing in its tendency. The situation of the coilege is healthy, and the surrounding country fertile and pleasant. A new milding is soon to be erected, capable of accommodating a lundred students. your trusses for two years. He had worn o-ther trusses twenty nine years. His son, also, 'er the injury, was cured in three months.-Experience alone, can make known to the Surgeon the full powers and excellence of these instruments. Your trusses are exclusively preferred by the Professors in both of the Medi cal Schools in this city, and the Faculty in gen-

Baltimore, January, 1850.

Valentine Mott, M. D. Professor of Surgery, says, The great and signal benefits which are produced by this Truss, result from its strict subservience to, and accordance with Scientific and Surgical principles.

'The operation and effect of this Truss is directly the reverse of all Trusses heretefore

in use; which being convex. tended to enlarge the dimensions of the rupture opening.' I am of opinion that the union of Surgical design & mechanical structure in this instrument render it what has long been the desideratum of Practical Surgeons in Europe and America.

Professor Mott also in lecturing upon Hernia, recommends Dr. Hull's Truss to the erclusion of all others.
