DR. HULL'S TRUSS.

FOR the relief and cure of Hernia, or Curvature. This Surgical Instrument is well known to the Medical Profession, extensively used by unfortunate sufferers under the disease of Hernia, that a full account of its mechanical construction, its surgical effects is thought unnecessary. The subjoined remarks from Physicians, Surgeons of high respectability in Europe, are the results of much practical experience, and application of this Truss.

James Thatcher, M. D. author of the "Practical Treatise on the Hernia," remarks "Dr. Hull's Truss is entitled to the credit of being the true Surgical principle for the cure of Hernia. He happily conceived the idea of the pad of the Truss, should be as large as simply to support the muscular fibres of the ring or aperture as much as possible, in which they are maintained in their health. Unless this be attained the patient never recovers their natural tone, whatever be the degree of pressure applied."

Samuel Ackerly, M. D. in his edition of "Hopper's Medical Dictionary" the head of "Truss," after enumerating the results from the use of the defective formerly worn, says, "This evil was remedied until Dr. Amos G. Hull, of New York, turned his attention to the subject, by his improvement in the construction, has rendered it certain that all persons cured, and those of old people, who stand, may, in many cases, also be cured. The pad of Dr. Hull's Truss is not convex, and hence the raised margin, by proper adaptation, presses the sides of the hernial opening, and tends to the aperture and cure the hernia."

M. L. Knapp, M. D. late Physician Surgeon to the Baltimore General Dispensary in a communication to Doctor Hull, has applied your trusses in several cases during the last three years. A many upon whom I have applied your trusses have been radically cured, and some were cases of long standing, where other trusses had failed. I send you a note from Mr. P. a citizen of great respect who was cured of a bad scrotal rupture thirty-five years standing, by wearing your trusses for two years. He had worn other trusses twenty nine years. His age 16 years, ruptured from his infancy cured under my care in less than two years. A case of scrotal rupture, of twenty years standing, in a labouring man forty years of age, cured under my notice by one of your trusses in six months. A case of groin rupture, in a labouring man thirty years of age, whom I applied one of your trusses, after the injury, was cured in three months. Experience alone can make known to you the full powers and excellence of your instruments. Your trusses are preferred by the Professors in both Medical Schools in this city, and the Faculty of Baltimore, January, 1830.

Valentine Mott, M. D. Professor of Surgery, says "The great and signal benefit produced by this Truss, results from strict adherence to, and accurate Scientific and Surgical principles. The operation and effect of this Truss is directly the reverse of all Trusses in use; which being convex, tended to the dimensions of the rupture opening, of opinion that the union of Surgical and mechanical structure in this instrument, it what has long been the desideratum of Surgical Surgeons in Europe and America."

Professor Mott also in lecturing on this subject, recommends Dr. Hull's Truss to the exclusion of all others.

January 10, 1831. Thomas Ayres vs Whitaker & others. The bill in this case states that John Skivren deceased, was indebted to the complainant and judgment for said debt against the said Isaac Whitaker, the executor of said decedent, that the personal estate of Skivren was wasted by Whitaker, that he and both securities were insolvent, that Skivren died and his real estate sold by Whitaker for life and his children in fee, that said Whitaker had feloniously conveyed said land away.
