UNIVERSITY OF MARYLAND.
COLLEGIATE DEPARTMENT.

IN order that the public may comprehend the nature of the instruction and the plan of tuition, as laid down by the faculty, which, from the applications made to the trustees, do not appear to be fully understood; it has been considered proper to make the following brief statement for the information of parents and guardians, who have young men to educate, and of such as are directing their own studies.

1. The classes will commence on Monday, 3d January, before which time, or as soon thereafter as possible, it is expected that persons desirous of being entered as students, will have their names registered.

2. The College course occupies four years—each year is divided into three terms: the first commencing on the 3d Monday of September; the second on the 1st day of January; the third on the Wednesday after Easter day. Students entering after the commencement of a term, are chargeable with the whole term.

3. The course of education embraced in the plan, and for which the most ample provision has been made, in the appointment of professors and tutors, consists of the Latin, Greek, English, French, German, Spanish and Italian Languages, and Literature; Mathematics; Natural Philosophy, Chemistry, Mineralogy and Geology, Botany and other branches of Natural History; Ancient and Modern History; Political Economy, Rhetoric and Belles Lettres; Moral and Intellectual Philosophy—for each of which departments separate and distinct professors have been appointed.

4. The plan of instruction has been so laid down, that the whole time of the student, during college hours, will be employed in study and attendance upon his classes—a daily record will be kept of his attendance in class, and general conduct throughout the term.

5. Previous to the summer vacation there will be a general examination by the Faculty of all the classes in the college, in the studies of the year. These examinations will be public, so far as to admit not only the trustees of the University, parents and guardians, but all gentlemen of liberal education who may choose to be present.

6. When the student has gone through the whole course of study as laid down by the faculty, and upon examination is found properly qualified for the degrees or honours of the University, a diploma, certifying his proficiency will be presented to him.

7. Students who do not intend to offer themselves for the honours of the university, will be permitted to enter any of the classes, with the privilege of attending such parts of the recitations of the class they enter, as may suit their views and inclinations, and also attend the lectures of the different professors—such students however, will be subject to the same fee for instruction, as the other students. To these students a certificate under the seal of the university, will be given, testifying to the branches of study they have successfully pursued during the session.

9. The professors will commence their courses of instruction as soon as the different classes are formed.

10. The charges of the college for instruction, including attendance upon all the professors, are one hundred dollars per annum.

11. Gentlemen well qualified for teaching the French, Spanish, German and Italian languages, are engaged by the faculty to give instruction in these branches, at the additional annual charge of twenty dollars each.

12. It is on every account desirable that students should enter at the commencement of the session—but they may enter at any time.

Those who desire further information in regard to this department of the university, may obtain it by reference to any of the trustees of the university or to the professors composing the college faculty.

Students applying for admission will make application to the Rev'd Dr. Williams, President and Professor of Ancient Languages, or to Mr. Ducatel, Secretary and Professor of Chemistry.

NATHANIEL WILLIAMS,
Vice President of the Board of Trustees.

DR. HULL'S TRUSS,

FOR the relief and cure of Hernia or Rupture. This Surgical instrument is now well known to the Medical profession, and extensively used by unfortunate sufferers labouring under the disease of Hernia, that a particular account of its mechanical construction and its surgical effects is thought unnecessary. The subjoined remarks from Physicians and Surgeons of high respectability in our country are the results of much practical experience in the use and application of this truss.

James Thatcher, M. D. author of the Modern Practice, in his second edition, under the subject of Hernia, remarks "Dr. Hull has conclusively entitled to the credit of first adopting the true Surgical principle for the radical cure of Hernia. He happily conceived the idea that the pad of the Truss should be so constructed as simply to support the muscular fibres around the ring or aperture as much as possible, in a state in which they are maintained in perfect health. Unless this be attained the parts will never recover their natural tone, whatever may be the degree of pressure applied."

Samuel Ackerly, M. D. in his excellent edition of 'Hooper's Medical Dictionary,' under the head of 'Truss,' after enumerating the evils resulting from the use of the defective trusses formerly worn, says, 'This evil was not effectually remedied until Dr. Amos G. Hull, of New York, turned his attention to the subject, and by his improvement in the construction of the pad, has rendered it certain that all recent ruptures and those of children, may be permanently cured, and those of old people and of long standing, may, in many cases, also be benefited. The pad of Dr. Hull's Truss is concave and not convex; and hence the raised circular margin, by proper adaptation, presses upon the sides of the hernial opening, and tends to close the aperture and cure the hernia.'

M. L. Knapp, M. D. late Physician and Surgeon to the Baltimore General Dispensary, in a communication to Doctor Hull, says, 'I have applied your trusses in several hundred cases during the last three years. A part of many upon whom I have applied your trusses have been radically cured; and some of them were cases of long standing, where all other trusses had failed. I send you a note of this kind from Mr. P. a citizen of great respectability who was cured of a bad scrotal rupture of thirty five years standing, by wearing one of your trusses for two years. He had worn other trusses twenty nine years. His son, aged 16 years, ruptured from his infancy, was cured under my care in less than two years. A case of scrotal rupture, of twenty years standing, in a labouring man forty years old, was cured under my notice by one of your trusses in six months. A case of groin rupture, by lifting, in a labouring man, thirty years old, whom I applied one of your trusses, the latter the injury, was cured in three months. Experience alone, can make known to the surgeon the full powers and excellence of these instruments. Your trusses are exclusively preferred by the Professors in both of the Medical Schools in this city, and the Faculty in general.

Baltimore, January, 1830.

Valentine Mott, M. D. Professor of Surgery, says, 'The great and signal benefits which are produced by this Truss, result from its strict subservience to, and accordance with Scientific and Surgical principles.

'The operation and effect of this Truss is directly the reverse of all Trusses heretofore in use; which being convex, tended to enlarge the dimensions of the rupture opening; it is my opinion that the union of Surgical skill and mechanical structure in this instrument realizes what has long been the desideratum of practical Surgeons in Europe and America.'

Professor Mott also in lecturing upon Hernia, recommends Dr. Hull's Truss to the exclusion of all others.
