JOHN DROKER, A. M. Professor of Grammar. CHARLES T. FRISSEY, Professor of Modern Languages. Present number of Students, 63.

COURSE OF STUDIES, EXPENSES, &c.

The following information, by order of the Board, will show the present state and prospects of the Institution.

The Professor of Grammar, will take charge of the English Department, and will have the classes under his inspection, at the College, during the hours prescribed by the Board. Besides the ordinary course of instruction in the Department, Students will be fitted for admission into College, and they may take standing as Freshmen, whenever they shall sustain an examination on the following:

PREPARATORY STUDIES, viz.

English Grammar; Geography; Arithmetick; Latin Grammar; Cicero's Orations; Virgil's Eclogues, and first six books of the Georgics; Virgil's Aeneid, or Latin Translation; Greek Grammar; Greek Declensions; and Jacob's Greek Reader; and Prosody.

Pupils not intending to enter College, will also be received into the English Department, and will pursue such branches of Education, embraced in the course, as may suit their particular views. A course of Lectures on Education in Primary Schools, will be delivered, whenever a class of young men shall have been formed, who may wish to qualify themselves to become Teachers.

The course of studies for the classes in College, have been arranged as follows, viz.

PRESBYTERIAN CLASS.

1st Term. Hebrew's Language. Greek Majora (Xenophon, Herodotus, Thucydides). Greek and Roman Antiquities, History, and Mythology.

2d Term. Greek Majora (Livy's, Demosthenes, Cicero's). Algebra, with Arithmetick revised. Horace (Satires and Epistles).

3d Term. Greek Majora (Xenophon's Memorabilia, Plato). Algebra completed. Translations, Themes, and Declamations during the year.

Mineralogy and Geology. Declamations of Original Pieces, Extemporaneous Debates, and exercises in Criticism, during the year.

The study of the Modern Languages, shall be so arranged, as not materially to interfere with the College course.

The officers of instruction, will endeavour to make the course of study as thorough as possible, and in no case will a Scholar be allowed to pass, to an advanced standing, till he shall have sustained all the previous examinations, to the satisfaction of the Faculty.

In the Departments of Chemistry and Natural Philosophy, instruction will be given, and Lectures will be delivered, as heretofore, by the Principal, and the other Professors, until those Chairs shall be permanently supplied. Particular attention will be given to exercises

of its numerous friends, and especially of the sons of Maryland.

St. John's College, was founded and endowed, in the year 1784, under the auspices of men venerable for their patriotism and learning, and has the honour of having educated for the State, some of her most distinguished public men. The Board of Visitors and Governors, in their efforts to discharge the duties of the trust devolving upon them, look for the cordial approbation and co-operation of the alumni of their alma mater, and for such a portion of the public favour, as may seem due to an ancient and cherished Seminary of the State, that her existence and usefulness, may be perpetual.

By order of the Board, A. C. MAGRUDER, President.

DR. HULL'S TRUSS.

FOR the relief and cure of Hernia or Rupture. This Surgical Instrument is now so well known to the Medical Profession, and so extensively used by unfortunate sufferers labouring under the disease of Hernia, that a particular account of its mechanical construction, or its surgical effects is thought unnecessary. The subject remains from Physicians and Surgeons of high respectability in our country, are the results of much practical experience in the use and application of this truss.

James Watson, M. D. author of the Modern Practice, in his second edition, under the subject of Hernia, remarks: "Dr. Hull is exclusively entitled to the credit of first adapting the above Surgical principle for the radical cure of Hernia. He happily conceived the idea that the part of the Truss should be so constructed as to support the muscular fibres around the ring or aperture as much as possible, in the state in which they are maintained in perfect health. Unless this be attained the parts can never recover their natural tone, whatever may be the degree of pressure applied."

Samuel Aclerly, M. D. in his excellent edition of "Hooper's Medical Dictionary," under the head of "Truss," after enumerating the evils resulting from the use of the defective trusses formerly worn, says: "This evil was not fully remedied until Dr. Amos G. Hull, of New York, turned his attention to the subject, and by his improvement in the construction of trusses, has rendered it certain that all recent ruptures and those of old people, and of long standing, may be cured, and may be removed. The part of Dr. Hull's Truss is concave and not convex, and hence the raised circular margin, by proper adaptation, presses upon the sides of the hernial opening, and tends to close the aperture and cure the Hernia."

M. L. Knapp, M. D. late Physician and Surgeon to the Baltimore General Dispensary, in a communication to Doctor Hull, says: "I have applied your trusses in several hundred cases during the last three years. A great many upon whom I have applied your trusses, have been radically cured; and some of these were cases of long standing, where all other trusses had failed. I send you a note of thanks from Mr. P., a citizen of great respectability, who was cured of a Scrotal rupture, of five years standing, by wearing one of your trusses for two years. He had worn other trusses, and suffered from his rupture, aged 16 years, and from his infancy, and was cured under my care in less than two years. A case of scrotal rupture, of twenty years standing, in a labouring man forty years old, was cured under my notice by one of your trusses in six months. A case of groin rupture, from lifting, in a labouring man, thirty years old, on whom I applied one of your trusses, the day after the injury, was cured in three months. Experience alone, can make known to the Surgeon the full powers and excellence of these instruments. Your Trusses are exclusively preferred by the Professors in both of the Medical Schools in this city, and the Faculty in general."

Baltimore, January, 1830. Valentine Mott, M. D. Professor of Surgery, says: "The great and signal benefits which are produced by this Truss, result from its strict subservience to, and accordance with, Scientific and Surgical principles. The operation and effect of this Truss is directly the reverse of all Trusses heretofore in use; which being convex, tended to enlarge the dimensions of the rupture opening. I am of opinion that the union of Surgical design and mechanical structure in this instrument render it what has long been the desideratum of Practical Surgeons in Europe and America."

Professor Mott also in lecturing upon Hernia, recommended Dr. Hull's Truss to the satisfaction of all others.
