# TEMPERANCE.

Semi-Annual Report of the Committee appointed by the Anne-Arundel County Temperance Society, Oct. 25; 1831.

Impril, 1831, a public meeting was called to the into consideration the expediency of forming a County Boolety for the promotion of Temperance. The most active and realous in the formation of this tociety, did not anticipate that such extensive and beneficial effects would so soon have resulted from their efforts. The Secretary has already received reports from six societies formed in this county, the whole containing 995 members. These reports are written with the most suguine expectations of still further success in the efforts making in favour of Transarance. The progress of the cause in the second election district, is of so encouraging an aspect this we cannot forbers quoting at large therefore "They say it is a fact known and almitted by all also have an opportunity of forming a correct epision on the subject, that there are far less distilled faquers consumed in our vicinity than formerly, as a proof of which we may state, that the proprietor of the enly public house in the district, where formerly was quantities of ardent spirits were vended, has been heard to say, that his custom in that line, has of late under zone such a dimination, as to reader it useless and unprofitable for him to take out license for the counting year. There are in this district four stress, at three of which ardent spirits were vended. The proprietor of the fourth having declined the afarther sale thereof, under the salutary impression that he cannot longer continue it without becoming secusion. iree of which ardent spirite are vended. The rictor of the fourth having declined the farther thereof, under the salutary impression that he tot longer continue it without becoming accession a great measure, to the ead and ruisous comences resulting from Intemperance. From him arm, that during the preceding year, he dispend of 11 harrens of spirits, containing in all 368 gd, which at the rate of 50 cents per gallon, and 184, presuming as we may, upon the fact, that it one half of the quantity is disposed of jetch of stores as at the, the just referred the wear of the fact that the same of the contract of the contra taining about fifty votes, for that which is not only useless but known to be degractive to their health reputations and fortunes. From an attentive consideration of the above facts can say question that fispreincipal agency of arresting in its course the wide spreading evil of interpreveness must devolve upon those who are the disseminators of the interfecting medium. If such persons could once the brought to reflect seriously upon the subject they would be in reflect seriously upon the subject they would be in evitably conducted to the control to the control of the control of the seriously upon the subject they would be the medium. If sich persons could once be hereaft to reflect seriously upon the subject they would be in writchly conducted to the conviction that they called continue the agents of so unfoly nod accurrently trille without participation; at the work line for the mediwithout participating, at the same time, in the moral guilt and forpitude which follows in its track. The report from the 4th election district is not a document

but was one from whence great apposition was to be the total and they were not disappointed they state mever, "that the many disagreeful and humilion and the total and the state of the sta ing instances of meaning many of the isinhitants, era and many who we've lend in gainst the principles of the autility and impersance and the beauty has addition of the beauty has n no pare of the county have more from this desolating cell and in no other piet of the con-title Temperance association elt lind acknowledged.' sion. He says that not the least personal vio-lence was offered to Nat-who seemed, in-deed, one of the most miserable objects he ever beheld-dejected, emaciated and ragged. The poor wretch, we learn, admits all that has been alleged against him—says that he has, at no time, been five miles from the scene of his atrocities; and that he has frequently

wished to give himself up, but could never summon sufficient resolution!

Mr. Phipps as the sole captor of Nat. is a-lone entitled to the several rewards (amount-ing in the aggregate, as we understand, to about £1,100.) offered by the Commonwealth and different gentlemen, for his apprension; and we are told, that in this instance Fortune has favoured a very deserving individual—to whom, in addition to the pleasure arising from the recollection of the deed, the money derived from it will not be unacceptable."

The Correspondent who communicates the following, assures us that the facts are unde-

nishle.
On Sunday morning last, as the steamboat villain. It is derived from a citizen of Southampton who we saw last evening, and with whom we conversed. He states, that on Thursday last, Nat was started out of a folder stack by a Mr. Francis, who fired at him with a pistol, but missed him, and he escaped. This circumstance being made known in the neighbourhood, a number of persons collected together and went in pursuit of him. On Sunday morning last, as the steamboat Richmond, Capt. Chapman, was preparing to leave the wharf, a sooty lady of rather bulky appearance, rotundity of form, and a delicate situation, applied for her passage to Norfolk. She was decorated in the usual manner, with her hair neatly platted, ornamented with combs, &c. The Captain, although celebrated for his politeness to the ladies, respectfully asked the fair damset for her free papers; they were immediately produced. It fortunately happened one of our Police officers was present, who, upon examination, discovshowed by soophe of the country and his panys came upon him in a covertient of the party a Merical Control of the Control of t
