was of this city who visited the prism yesterday afternoon, from whom we gather the following facts.

The attention of the keeper was first attented to the prisoners by the crics of some of them about halt-offer (welve at high), and about twenty or Unity at the same time. On each were a phi and with violent diarrhox and, in some instance, with vonting and purging, accompanied with pains in the head and the region of the stomach and towels. Assistance was opered of course rendered immediately, and all have of of the stomach and bowels. Assistance was of course rendered immediately, and all here in great measure recovered. In the course in yesferday, the cases increased, until the number was quite large, and is variously attended and from one hundred and four to one hundred and four to one hundred and thirty, probably the smallest complete in correct.

The cause of this strange and sudden distent the case is not known. The food of the prisoners was changed on Sunday, tice having been substituted for potatoes, and it being a very

substituted for potatoes, and it being a very warm day many of them drank freely of ginger beer instead of water. The discuse has been attributed to damaged rice, but it does not appear on examination, that any of the rice has been damaged; others bave attributed it to ergot which may have been in the rye of which their coffee is made; and others again to poison. But no sufficient reason fer any of these conjectures has yet been given, and we are as much in the dark as at first.

The disease has not yet proved fetal or even dangerous, having easily yielded to the prescriptions of the physicians. Although some

of the symptoms resemble the premunitory symptoms of the Cholera Asphyxia; yet no one has been cold or blue at his extremities, and the tongues have been warm as ever. In cks of fact the concurrent testimony of the different physicians has been, that it is not the Assistic Cholera, but the common Chalent siatic Cholera, but the common Chulera Mor-bus, or a disease arising from indigestible

Later Account .- In the Board of Health Commissioners, last evening, the Mayor sta-ted that he had been at Charlestown.—That when he was thereon Thursday last, the ster-ard was directed to throw away a lot of old potatoes which did not appear to be fit for use—that rice was in consequence substituted, of which the prisoners partook on 8a-turday and Sunday. He also stated that Dr. Walker had examined what was left of the food but could find no indications of poison.

Dr. Flint stated that at 7 o'clock, when he left, 113 of the prisoners had been attacked, twelve of whom had returned to their cells recovered. He confirmed in all respects the

account we have inserted above.

Mr. Wells, the Mayor, is an officer of the State Prison Government, which accounts for his visit on this occasion. Mr. Flint probacause bly visited as did other physicians of the ci-alysis ty, to satisfy himself and the public of the mat-true nature of the malady.

By the brig Mary Jane, at New York from Schelle, the Courier and Enquirer has recived Paris papers of the 27th and Bordesux papers of the 20th June. We annex the sum-nary contained in that paper.

An ex-Colonel, M. Kersabiec, has been tried before a military commission at Nartes; and found guilty of having formed part of an ame! body of men, whose object was to charge the government, and of exciting the inhabitants to revolt, but in consequence of Sme extenuating circumstances, the court sestenced him to transportation instead of conferming him to death.—This caused contelerable agitation in the city, and large as-temblages of people in the streets. London, June 50 — Baron Stockwar, the friend and private Secretary of King Leopold, has had several interviews lately with Lord

the King of Holland to comply with the content of the Conference, and on the 14th tinst. An official note was sent to lord palmerston, by order of Leopold, to a similar effect.

The Constitutionnel, with which paper M. Dupin is known to be connected, contains the following paragraphs, and it is observed they were probably comminicated by him:

We believe that we can give the assurance the M. Dupin Aine, in all his connectations with his political friends and with some of the Ministers, has decidedly given it as his opition that the state of siege should be immediately removed. He passed the greater part of yesterday at St. Cloud, and there is no doubt that he has expressed the same opinion to his Majesty.
