The few had remained in the Hall returned to it, d themselves, for some time with con-res as to the cause of the explosion; and eneral opinion seemed to be, that it was ed by a Torpedo or bomb, placed, fordiabolical purpose, in the upper rooms. ngth one proposed a search, and a few sollowed him, notwithstanding the sugon that perhaps other torpedos would pre-

y explode. Iter diligent search, the mystery was ex-ied. It appears that a black servant had sent to the room, over the central part he Hall, to light it up. He opened the containing the gas pipe, to let off some A quantity of gas had, it seems, escafrom the pipe, and was confined in the flame of the candle, held by the servant, exploded, knocking him over, tearing to es the closet door, and breaking through ceiling beneath, as before described. No on was injured, and order being at length ored, the proceedings of the meeting were inued.

OF THE MISSISSIP!

OF THE MISSISSIP!

St. Pelers, May 25, 185

Dr. Addison Phillen:

Dear Sir—I arrived at this place yetler day from an expedition through the Chipper wa country on the sources of the Mississippy accompanied by a detachment of from a der command of Lient Allen, of the 5th in fantry.

der command of Lieut. Allen, or the state of lattry.

A commanding influence has been exercised, in farmer years, over some parts of this extensive regions by the Northwest Company, and, since its fall, by the Hudson's Bay Company, who appose our traders strenuously on the lines, sind supply their clerks with high wines, to attract the Indian population to their posts. Pulitical and commercial power go trigether,

Jury having been impannelled before the ecclaireisement had taken place.

To counteract the political is fluence thus esteted, has been among the offects of the espelition, and to keep them all peage with the government, and with each other. The latter has been a task of difficulty is the state of hottle feeling, among the Chippewas and Sioux, has acquired the involvency of a herefoliately fead. War partied are continually trespassing upon the terretorial boundaries of each other; and fresh salips have been danced, after the Indian manner, at Red Lake, and of Leech Lake, during the time of my passing through the country.—

War has been the engrossing theme, and it will be recollected that Italy is one of the countries which is to be free from the scourge. Facts having as yet corresponded with progmains, and emisted them with arguments that a savage people could appreciate, while arridrum, and the scalp yet, were sent forth from other parts of the premises.

We found the waters of the Mississippi in The daily decrease of the cholera is to be

a good state for ascending, and I availed my if of this circumstance to carry into effect dedesire of visiting its actual sources,-a ist which has continued to be problematicilia our geography. Pike placed it at Leech Like in 1806. Gov. Cass carried it much mber north, and left it at Red Cedar Lake, is 1320. But it was then ascertained that its kingdom of France)
surces were considerably north and west of
Selike. I encamped the expedition (with methoops, and heavy baggage) at this last med lake, and proceeded up the river in fresmall birch canoes, capable of containing me man and his bed, in addition to the Indi

mand Canadian who conducted it.

The Mississippi, above this point, expands its several lakes, the largest of which is alled Traverse. A few miles above this, it formed by the junction of a southwest and orthwest branch. We ascended the former, through a number of lakes, to its source, in a small creek; being an inlet into a lake. From thence we made a portage of six miles with our canoes, into La Biche or Ibasca lake, the latter being a derivative from veritas ca-ut,) which is the true source of this celebra-

us back to our party at Red Cedar, or Cass Lake. Very respectfully, dear sir, your friend and obedient servant.
