TEMPERANCE CONVENTION IN ANNE-ARUNDEL. The friends of temperance must be gratified at the efforts which are now being made throughout our country to advance its influence.

The evils of Intemperance are now admitted to be beyond exaggeration—no man can number them. The efficiency of these Societies, even their few opposers, now holding back their support, expressly admit, though they refuse their co-operation on various pretexts.

In this country especially has much been done, and we are gratified to say we hail this contemplated convention for this county as an event likely to establish on a firm basis Temperance among us.

Heretofore the meetings of the County Temperance Society have taken place during the sessions of the county court when most persons who came to town were engaged, and when in point of fact we all know little has been done.

In this country where the most numerous religious sects are the Episcopalians and the Methodists we certainly do expect great zeal and activity.

The last Convention of the former church held in June, passed the following resolution. Resolved, That the members of this convention have witnessed with great satisfaction the progress of the temperance reformation, and that it is recommended to all the members of the church in this diocese, to favour and advance the temperance cause, and to afford it the benefit of their example and influence.

placed next to 'the Friends' in their efforts to promote Temperance by the discipline of their church. These conferences have made the disease of ardent spirits a condition of membership. Soon will the other conferences confirm this act, and then will the discipline of that church be restored in this important particular to its ancient purity.

We do therefore expect that the Ministers and members of these two churches will fulfill the expectations of the public in the active support of a cause in which their churches have taken such interest, and especially aid with their presence and support the efforts of this convention—of course we do not intend to insinuate any thing unfavourable to other denominations of christians in relation to this subject.

Let us conclude by inviting our friends of all denominations and parties to lay aside their differences, and to meet as men and citizens of these United States in this convention, and by one joint effort, put forth their united strength for the promotion of their fellow creatures, and the preservation of their country.

IN THE NEW YORK ASYLUM FOR 46 YEARS, it was 44 1/2 in the Connecticut Hospital, for 5 years 50-10. The last is the most signal instance of success. Generally it would seem that the management in the French hospitals exceeds that in any other part of the world.

Although it is usual to hear that Royalty is daily becoming less agreeable to the people of this and other countries, it is worthy of remark that at no period, during the last century, has there been so many sovereigns, whether absolute or constitutional, anxious by their conduct to conciliate the good will and secure the affections of their subjects.

CHARLES HARPER, Mayor Cincinnati, Aug. 12, 1853. THE CHOLERA. This disease continues its fearful visit to different points in Ohio. At Lebanon there have been a number of deaths during the last week. Among its victims that neighbourhood we regret to see Mr. J. S. Davall of Mill Grove. At Columbus it has nearly disappeared, while a number of deaths there being reported including those in the Penitentiary. There have been a number of cases in Hebron, perhaps not exceeding 20. At Dayton cases occasionally occur, but they have not assumed an epidemic character. At New Richmond, Ripley, and places on the Ohio, it has been severe and raging. South of the Ohio the papers all report a gradual decline. There was but one case reported on the Ohio, on the 10th inst., six days having taken place in the preceding days. It had totally disappeared from the penitentiary. At Cincinnati, during the week ending the 8th inst., there were 71 deaths, which 53 were by cholera. The general opinion of the city was said to be rapidly improving, and during the three days preceding there had been but one death from cholera. A part of Missouri has been severely visited. The latest accounts are truly alarming.
