On Saturdayweek before last, as the Rev. It is supposed, was strongly attached to board the steambat Tobacco Plant, Captain Organ, a scene obcurred, the description of the French Princess. The Duke of Orlean is supposed to have expressed his displeasure. board the steambat Tobacco Plant, Captain Org., a scene occurred, the description of which cannot fail to touch every generous heart. The boat was rounding to for the purpose of effecting a landing about 16 miles above Clarksville. The curvature in the course of the boat had made a proud swell in the water and a whirlpool near the wheel of the boat. Without waiting or give an alarm or a thought to his own danger the Rev. Mr. Pitts plunged in after the child, As he struck the water the child had sunk; and while he was somewhat embarrassed withhis overcoat floating out upon the waters, he watched the rising, caught the child as it carpe to the surface, and swam above with the senseless little sufferer, and had the happiness to see its assembled vitality return, and place it in the surface, and swam above with the senseless little sufferer, and had the happiness to see its assembled vitality return, and place it in the until he reached the shore. The grateful feelings of friends at such a rescue may be imagined-they can never de described.

We are informed (sys the Columbian Telescope,) that on the 6th of this month, seven negroes belonging to Mr. Moses B. Livings-ton, of St. Matthew's Parish was burnt to death, the cabin in which they dwelt being consumed in the middle of the night. The cause of the accident is not known. Mr. Livingston, was himself considerably injured, in endeavouring to rescue them, after the fire had made much progress.

Lord Grenville, formerly a distinguished politician, has also paid the debt of nature. He ferved many years in the Cabinet with Mr. Pitt and other eminent persons. You will find a sketch of his life in all the papers. Col. The latest accounts from Lisbon, which are to the 14th of January fore decidedly of a favourable nature for the constitutionalists. both with regard to the present conditions of the contending armies and likewise the prospect of an immediate settlement of party lifferences, which have so long existed amongst the courtiers in Lisbon .- Some movements of an important and active nature, were expected shortly to be made against Santarem, where much discontent and sickness ex-isted.

The following is from the correspondent of the London Courier, dated,
Lisson, Jan. 11.

I can give you no further information; but next week will probably be very fertile in events, as there is every appearance that something important is intended to be done.—No

intervention is to be made in concert with the French Government-England to furnish six thousand troops towards the expedition.

SPAIN. It is not certain that a new ministry bad been formed in Spain, but the Paris journals 1834.
of the 17th and 18th of January, contain reports that the Marquis de las Amarillas will be called upon to form a new Administration in Spain, and will be enabled by possessing also a seat in the councel regency, to give a unity to the system of Government which the opposition of the council to the Ministers, his sometimes destroyed. There is as vet, however, no confirmation of the report, that he has actually received the appointment.— According to letters from Madrid, his ac-cession to office would go a long way tewards reconciling all parties, except the Car-

Dis. Jackson & Draper. These gentlemen had leeches applied by means of silver tubes to the biside of the throat, and the result has been, we understand, very satisfactory.

The application of leeches to the inside of the throat is entirely new, but we have no doubt of its utility in many cases.
