BY WILLIAM DARBY, ESQ. OF MARYLAND. AUTHOR OF A VIEW OF THE UNITED STATES

THEODORE DWIGHT, JR. ESQ. OF NEW YORK.

The importance to the citizens of the U. nited States, of a copious and accurate Gazetter of our country, will not, is believed, tor a single moment be questioned. Whatever be a man's station in life, whether public or private, he frequently almost daily, feels the convenience and necessity of such a book of reference. Of similar works, embracing the Universe, it may with truth be said of the most voluminous of them, that they are neces sarriy brief, and greatly deficient in reference to our own country. This is undemable—not to our own country. This is undemable—not true in ended to comprise in this collection, could it be otherwise in a work, which in the compass of 800 or 1000 pages, comprises s

wide a field. i; and these changes are not to be found re

this deficiency, the compilers of the prosed Gazetteer have undertaken to supply. And in presenting it to the public for their pa will be found as copious - as complete - and as accurate - as the nature of the case will admit The names of the respectable gentlemen who ave undertaken its compilation-one of who already well known as the author of severavaluable geographical works-woll, it is believed, be a sufficient goaranty of the fidelity and recursey of the proposed volume. The labour of more than two years has already been bestowed upon it; and it is presumed that access has been had, to every publication which could in any degree enhance the value of the work. These facts, together with the high commenda tions bestowed upon the first edition of the work, and the rapidity of its sale—(it having ueen entirely disposed of within four months from the day of its publication) - induces the publisher to undertake a second and improved edition A Map of the United States, (not contained in the former) will be added to the work; and the publisher confidently believes. that such in asures have been taken to secure a careful revision of the first, as will ensure th these facts in mind, he trusts that the propos ed volume will be found more rich in every kind of information proper to be stored in such a work-in historical, geographical, political, literary, and statistical information country, its institutions, and resources, than
