MR. MILLS' DIGHTH ASCENSION.

To the Latters of the Bultimore Visitor.

As held forth in my advertisement, I con menced the inflating my Balloon, which is of a new construction and of unusual megnitude, at perate a vast quantity of gas. The appearance bis, will hold their nectings at such time pended the inflation for about half an hour-bit suit their convenience, provided during which the company sought shelter from ing ready, Miss Phillips was conducted into the arena amidst the shouts of the multitude. She betrayed not the least alarm, but with flushed cheeks, and a cheerful smile, took her seat in the car. I soon followed, and after floating few minutes near the spectators, found that I had too great an ascensive power, and, consequently had to discharge gas, having only tifteen page of ballast with me. The Balloon was then cut leose and slowly arose amidst the shouts of my friends, my fair companion all the while waving her handkerchief to those beneath.

direction of the balloon was at first in N. N. W. course, her average height above the earth being about half a mile. Soon after leaving Fair Mount, I had the

pleasure of hailing some persons at a country seat, and understood them to say that I was about two miles and a half from the city.-The heavens now bear to clear up, and the view of the city was truly beautiful. The noise of even the horses hoofs on the -road was dis tinctly heard, and the shouts of the people were deafening. At 15 minutes after five o'clock I Harford road, which I kept still in view, and understood them to say that I was seven miles regret to say that Capt. S. died in a few minutes from Baltimore, and over the farm of Mr. Peter after he fell, and that he has left a wife and se Simpson, on the old Harford turnpike. I afterwards hailed many persons along the country over which I passed; did not understand disbearing distance. At 20 minutes after 5, passed over the farm of Mr. Benjamin Harts, fourteen miles from the city. Shortly after reached that of Dr. Moore, but could not learn the distance on account of the confusion of voices that were shouting at the time.

At 12 minutes before 6, I passed over the farm of Mr. Stansbury, 19 miles from the city. this time I have in sight of Long Green Academy, under the charge of the Rev. Mr. Morrison, crossing the river in a large pirogue, returning 22 miles from Bultimore. It was a little on my left. I hailed some persons, who told me that I mer Beltast, coming down the river. Most imwas "moving along very handsomely." They prudently the people in the pirogue attempted requested me to come down and take some refreshments, which polite invitation I declined, all the efforts which were made on board to ministratic on account of my very elevated condition, not but could not learn the distance.

What made this trip more plegeant than usu mile above the earth. The appearance of the balloon, in many instances rightened the horses hapily supported her on the waves long enough to afford time for assistance. The four negroes Phillips during the time was perfectly calm and highly delighted; busying herself in throwing out feathers to a pertain when the balloon arose or fell; she always reported the result of her

At about 12 minutes after 6 o'clock, I began to think of descending; and after several efforts to obtain a good hold for my grapples. I at length effected a safe landing at about 20 minutes after from the farm of Mr. Allen Miler, Peach-bottom township, York county, it. forty-five miles from Baltimora.

I am much indebted to Mr. Miller for his this city, travelling all night. Miss Phillips was much delighted with her novel trip, and display. ed more intrepidity than usually falls to the lot

THE STEAMBOAT DISASTER.

We have obtained from Mr. Keeler some fur-ser particulars of the melaneholy explosion or at Advocate. curred, as we stated yesterday, at 4 P. Mr. Walter Butler, Merchant, of Kinderhook (brother of B. F. Butler, Esq.) and John L. Bronk, of Cozsackie, were both knocked down by bricks which struck them in the face. Both f these gentlemen were badly scalded.

The wife of Mr. Smith who was moving from Fort Plain to Kinderhook, and four children were badly scalded. One of the children died yesterday. An infant, wrapped up in its mo-ther's arms, escaped without injury. Mr. Smith was himself at the bow of the boat, and escaped without miury. A Grocer, residing in Beaver-street, whose

name we could not learn, was badly scalded. The Cabin Boy (Frederick Perry) was dread fully scalded, and died in ten hours. Though thus mortally injured, he walked about some time and said he felt no pain, and was unconscious of his fate. Miss Olive Lewis, of this city, was badly, but

it is fliought not dangerously scalded.

Miss Stuars, Nice Bennet and Mr. Caldwell of Hudson, were slightly scalded.

Mr. Elias Ford, of Albany, was slightly scald

Two young men on their way to the Colum biaville Manual Labour School, were injured, but not severely.

The son of Mr. Buchnell, mentioned yester-

day, was but slightly-hurt. The sufferers were all removed to the house

of Dr. Vrendenburgh, and Mr. Stevens, a few rods from the boat, where medical relief and all the attentions which humanity could suggest, were promptly administered. It is singular that no person was injured ex-

cept those in the cabins. The crew were passing and repassing the boiler, but received no injury. Mr. Koeler was standing in the rear of the cabin, and ulthough enveloped in steam, its heat was spent before it reached him.

The boat was blowing off steam when the ccident happened. It was supposed, however, that the boiler was not supplied with water.

John Street, beyond Deer Cieck, and his brother William, together with a child and his brother William, together with a child three years old, and young Mr. V. Landry, sunk before any assistance could be rendered to them. l, was not being at any one time more than a Mrs. Poursine, far advanced in the family way, who rowed the pirogue, more lucky than their masters, succeeded in saving their lives by clinging to the mast of the pirogue.

A fish pond about five miles from Providence was poisoned by some Vandal a few days since, and the lives of several persons who had eaten of the fish greatly endangered, many of them being taken alarmingly ill after partaking of them. The cause of this dishplical act was the circumstance of the owner's having prohibited I am much indebted to Mr. Miller for his kindness. After refreshing ourselves and so curing the balloon, we started on our return to this city, travelling all sight. Miss Phillips was much delighted with her novel trip, and displayed with the novel trip, and displayed more intrenidity than usually falls to the less than the country, when a man and his family much be returned by returning the country, when a man and his family in this country, when a man and his ramity must be poisoned for daring to preserve his own undoubted property. It is a 'monopoly' we suppose for an individual to raise fish upon his own land and at his own expense. The address which we noticed on Friday having been presented to Sir Robert Peel, e estly imploring the Baronet to remain at need of the Government, having been rea him by the chairman of the deputation, Sir bert in a tone of deep feeling, replied in the owing words:

Gentlemen-The best return which I make for the very gratifying and encourse assurances of approbation and confidence we are contained in this address, will be a final claration of the principles on which I have ed in having hitherto persevered, under cumstances of unusual embarrassment in attempt to conduct through parliament the sures recommended to its consideration by

When I was unexpectedly su abroad in December last to assist his Mai the formation of a new ministry, I did not myself justified in withholding from the I ny humble services; and the same motives w induced me to obey his Majesty's comman the first instance, satisfied me that it was eq the first instance, satisfied age that it was en ly incumbent upon me to more every effor strict accordance with the specific and letter of constitution, to overcome the many difficu-that were inseparable from the arduous m taking.

I well know that no administration can to conduct the affairs of this country, a which the good will and confidence of the presentatives of the people are, after ma consideration withheld; but although the ceedings at the commencement of the sea were not very encouraging, still I was in h that the proposal of measures founded upon cient institutions of the country, would profor the government that degree of support the House of Commons, which might en them to bring those measures under full and passionate consideration.

In submitting to occasional disappointment defeats, I have acted on the sincere be that in the present state of political parties, the present position of some great public quitions, I was not justified in abandoning the which I had undertaken, and compelling and change of administration, without some. and manifest necessity. I have acted alm der an impression that the House of Comm was influenced in some degree by similar siderations, so long as it did not attempt, by dence in the government, or to enforce any g principle at direct variance with the dec sentiments of the government.

Under any circumstances I never can le back with other feelings than those of the gr est satisfaction, upon the discharge of a po trust, which has procured for me the prood timony of esteem and confidence which you this day placed in my hands.
