R. LITTELL has much pleasure in an-nouncing to the patrons of the Musr-un, that he has made arrangements for the future publication of the work in a style much superior to the present—and nearly approaching what he has always desired that it should appear in. The circulation of the work is now so large, as to make it important to the proprietor that he should be able to give his whole attention to it. This has hitherto ocen prevented by the care and labour attendant upon a multifacious and which extended bu-With the view of completing more quickly the publication of Lodge's Portraits and Memoirs of Illustrious and Noble Cha effecting a settlement of accounts extending over the whole of the United States—and of making arrangements in all parts of the country for the vigorous prosecution of the publi-cation of the Museum, he has made a contract with Mr. Adam" Waldie of this city to print the work, attend to its distribution, and manage all the financial concerns appertaining to it after the present year.

Mr. Waldie is a practical printer, not surpassed in taste by any other in the country; and as he is advantageously and generally known as the publisher of the Select Circulating Library, it is supposed that he will have it in his power greatly to promote the sale of the Museum. He has contracted to issue it promptly, and thus will be corrected the greatest fault which has heretofore attended its management. The changes in the appearance of the work will be as follows: 1. A great part of most of the Reviews and Magazines is composed of interior articles, and we confidently appeal to those readers of the Museum who have been in the habit of looking over the British Journals, whether we have not already, in a very great degree, succeeded in copying all that was worth preservation.

As the work will now be considerably enlarged, we shall be able more fully to accom-plish this object.

Tis now six months since this publication was commenced in Philadelphia—and although the publishers have used no extraneous means to circulate a knowledge of its merits, yet such is the satisfaction monitested by that portion of the public who have been made adjustment with its character and contents, that its list of patrons continues constantly and rapidly to increase. This paper is now distributed regularly every week over a wide portfoun of the Union, and the most satisfactory assuments are received that it will eventually become one of the most popular among the numerous excellent perfolicies which issue from the American press. No exertions will be spared to establish its permanent requantion more extensively; and if the liberal sanction of those for whom it is a specially designed shall warrant, as alture improvement—both as regards typographical meatures and embalishment—will be materially advanced.

The enclosed may at least be a literary curiosity, be ing the production of a vagrant, and written in one o the cells of our Alms House. The author writes from sad experience, and describes his own condition as wel will appreciate the accuracy of his delineation, and ev noet lamoutable that one capable of such writing should become so degraded as to make his own debasement the theme of his nuse. If you think it worthy of publication, it is at your service.

THINGS IN LONDON.-June, 1835. I have been travelling to and fro about this immens city for a week, -- and I have seen neither the beginning nor end. I have walked for males, and then I was miles from the end. I have sought the end in long rides in city—one perpetual glittering of shops,—one continued trampling of feet, one endless rattling over the parements. Not yet have I been over the Thames, and there is a great city over there. Not yet have I seen a single show, and yet I have run about till I was wearied and flushed with sights and povelties innumerable. In place for the beginning of an observation,—but there seems to be none here. The very insgritude of the distances to be run over deters one from attempting it a all. There is so much to see that one does not know where to begin to see it. Six New Yorks would make but one London.—The whole of Maine crowded upon one continuous territory, and then multiplied by four would not make one London, -so thickly is man jostled by man,-such is his love for society! How would Daniel Boone feel here! he who could not endure the his dog? The Penny Post which is established here is a most admirable contrivance for connecting together the parts of this great metropolis. Before I had seen prettier things, I funcied Boston Common to be the most charming place on earth of the kind; but St. James's Park is as much its superior in boauty, as that is the superior of the common field. A-bout it, there is most delusive regular tregularity. Art bout it, there is most definite regular fregularity. Are has so managed, as to concern visit in nature. The trees have seemed to come up as they pleared. The bushes apparently have had their own way. The margin of the Luke is not as on Beston Common of regularly laid stones, but of stones apparently tumbled in by some chance or other. In all these things the English so much excel us, that we have the lessons of

so much excel us, that we have the lessons of years to learn. The Parks in and about London are manysome public, more private; but all little Edens, made, admirably beautiful by art, and enjoyed the more as in such a wide spread city. I wand-red over Hyde Park, by the house of the Dake of Wellington, over Green Park, and by Regent's Park, the largest in the city, much of which however, is private property. Where, ver the English could reserve a green spot to be orna-mented with walks and shaded by trees, much to their credit they have reserved it,-and this it is which has made the West End of London, the fashionable end, so charming a residence. Regent street seemed like a street of palaces,—and many of the people in it, and sobout it in the fushionable hour, such is the rush of carringes,—the display of pomp and tinsel—appeared as if they had dropped from some more dazzling sphere.

There is a place in it called the Quadrant, in form of a quadrant,—and a prettier place for cill et architecture could not well design at an equal expense. And then the shops (they never say stores here as we do)—I can-not describe the wealth they display, such is the profu-sion of it,—of silks and jewelry—of silver and gold—of all that can attract or fascinate the eye, set forth in un-rivalled tastes. An American workin (I never say lady when I can help it except in a certain case for woman is a better word) would grow framic here, unless sho had money enough to spend,—and then if she had, have merey on her hasband's pocket abild so many tempta-tions! Indeed I can hardly avoid purchasing abusest every cheap portable thing I see, and overy thing-is cheap here compared with our prices, as I see by the labels of prices in the windows, every thing in the silk, woolen, and linen line—of holiery and stocks and neck-cloths, and jewelry. &c., but as to what is leather, or of count, and jewerry, a.e., tours to what is leather, or of itather, the price here is neglity double what it is in America. Of books, I make no purchases—guide books except. The price is encourage, Finny Kembly's work for example selling for a but four dollars, for there is an excise of about six centish pound on paper, and the ex-pense of advertising, without which a book will not sell here, is monstrous. But—the splender of the sheps of London I could not exfiggerate in description, if I were to make the attempt. f All the wealth and splendor of the world seems to contre and sparkle in some of them.
