The power and influence of the republic have risen to a height obvious to all mankind; respect for its authority was not more ap-parent at its ancient, than it is at at its present limits; new and inexhaustible sources of general prosperity have been opened; the effects of distance have been averted by the inventive gethe spirit of our institutions; and the enlarged variety and amount of interests, productions and pursuits, have strengthened the chain of ibatual lependance, and formed a circle of mutual benefits, too apparent ever to be overlooked.

just is the confidence of future safety imparted by the knowledge that each in succession has been happily removed. Overlooking partial and emporary evils as inseparable from the practical operation of all human institutions, and look ing only to the general result, every patriot has reason to be satisfied. While the Federal Gc. vernment has successfully performed its ap; ropriate functions in relation to foreign aff. irs, and concerns evidently national, that of every State has remarkably improved in protecting and developing local interests and individual welfare; and if the vibrations of authority have occasionally tended too much towards one or the other, it is unquestionably certain that the ultimate operation of the entire system has been to strengthen all the existing institutions, and renown.

The last, perhaps the greatest, of the promitent sources of discord and disaster supposed to link in our political condition, was the institution of domestic slavery.
