Fourth Year of Waldie's Library. PROSPECTUS OF TWO NEW YOL-UMRS FOR 1836.

THREE years have now clapsed since the proprietor of Waldie's Select Circulating Library laid before the public his original prospectus for a valuable library, the great features of which were cheapness, and the facility of a rapid transportation by mail.

The most ample success has attended the enterprise, and the effects upon the reading community, it is believed, have been whole-

The fourth year will commence on the first Tuesday of January, 1836, at which period it will be necessary to determine the additional amount of copies to be printed, subscriptions being taken only from January of each year. The entire success of the Library is the best guarantee that can be given of its continuance. It was the first to supply books ay mail at a mere per centage of their former costs it has outlived more than thirty puerile attempte at imitation; and has now an extensive list of patrons who are of the most solid of the Union, as well as in foreign countries.

without being compelled to depend on places of public resort, this publication formishes a most valuable desideratum, supplying politic literature of a character to enlarge and improve the mind. The time and actificion of the editor, himself ar reader from inclination as well as futly, are devoted to the pricurement of works of an elevated standard of intellect which may be admitted into every looks and stationary will be furnished at most reader and the control of t ing and conversation. The variety thus colworks, mostly new, embraces Biography, mited r Novels, Voyages and Travels, Sketches, (Tales, and Select History, personal memoirs of extraordinary individuals, and cericus advices to the a of extraordinary individuals, and curious advice advices and to the above.—for instruction in the French The Disorned, venture, &c. &c. An amount equal to fifty duodecimo volumes is thus annually furnished in weekly numbers, at a cost only equal to one of the London works. The plan versally diffused in every part of the Union as to form no inconsiderable portion of the ing and painting, 38 a quarter,—and in fancy work, 86 a quarter.

All money for the use of pupils must be enacquaintance has become really necessary for those who mix in society.

The Library as now conducted disseminates books to all parts of the country in from five to six weeks after their issue in London. Five dollars per annum expended in this way will supply good reading for a whole circle or family; for a cent and a half a day, postage included, a duodecimo book is sent every week, making in the course of the year more than three volumes of Rees's Cyclopedia. One volume of the Library, containing from fifteen to twenty entire works, can be bound at an expense little exceeding that of binding eithtution any but devotional and school books—plainness and simplicity in dress, and a just comony in expenditure, will be expected in anuscenie and instruction, and which must always be worth the price that has been paid for it. The most ample testimony has been spontaneously afforded that this work has contributed to the pleasure of thousands, who, but for the resource it afforded, must have been left with minds unoccupied, or thrown into unprofitable and uncongenial society. This immense supply of periodical reading has thus been welcomed every where as a mass of improvement, and a substitute for the essure where where so has thus been welcomed every where as a mass of improvement, and a substitute for the essure in the substitute for the essure in the essential talk or idle listlessness so apt to employ a large portion of the time of the manny.
