From the Knielerbicker. SUMMER EVENING. WRITTEN AMONG THE BLUE-BIDGE MOUNTAINS.

IT CHARLES CONTANTINE PIST, D. D.

Lat it is evening; down the mountain's side The parting sunmeants clowly in it away: But, ere they fole, a lingering lastre shed. That loiters brilliant on the smileng peal. See how the horizon blushes -- as the last Declining, ling ring radiance of day Skirts the faint eves of Leaven--vaile shown The desert mountain darkness glides appea, And steals the cottage from the impairing eye

Herlit from the copse a plaintive mermar sighs, That scene to tell a t. le of sympathy. 'Cis the lone rivulet, which lately saw and left the standering during on its bosons: When our its gentle bed it stole in mirth, and as it flowed, crimed to the lovely scene.

And is it flowed, estimated to the lovely scene.
And Let me big one to the twilight stream,
To miss the solerum, salent hour away!
But as I more, open the verge of heaven
the full broad moon, no id a nost of clouds.
That stand like broad in buttlegents after,
a weeks bor silvery face, and gives a beam
Replin near, meek, and lovely as the hour.
Sometimes the singry clouds inter her form,
and leaves me to navelf and distinces—yet
arrounds to take the prison, and looks down.
This count that it is her conservisions and price.

Here, Conserving minutes that toos the full.

Here, from this eminence that tops the rill, My eye goes wan heriog to the village nigh, We eye goes wan heriog to the village nigh, Walers many a toper glumoners there, methinks, Contentment cheers the boson—peace and mith Intwine the heart, and give a chern to hid. Where now is that tall spire, which lately gleamed Amid the tright reflections of the day!

All at half vanished—whaded by the night, It rees up unseen, and each fair mansion. Sarally the doubtful moon, is seen no more.

Haded is the voice of nature to her rest

Hashed is the voice of nature: to her nest.
The solitary bird hath gove—and naught.
Save the dirk whip-poor will is heard abroad.
The meadow, but an hour ago alive.
With graing flocks and heres, and echoing blithe.
The gentle music of the ploughments whistie,
Lies cheerless and askep—a lonely waste!
Said making on this more rock fround which.

The gentle mines of the prongonian swindle, Lies cheerless and indice—a lovely waste!

Still resting on this measy rock, from dwhich The night-winds moun, let me include n y roul—For to my soul this sweet to linger here. Turn up finine eye to you bright viails of heavin, All standed o'er with gas of hight secone, That glimmer through the n istuness of night: See how they travel—their unceasing round Meaving berronnias—and ripoted to do The will of their Crotton: All they say—For, to the posts are they speak about—They says through such as it a repute thing. Liwly and dark—and still with head erect, Presames to castleng—his abinghty Lord, And does a decision all grance to his will. We, dressed in gory linght as heaven stell, Supremely litted from those handles wills. To porney through internamedle space, Shoop with submission to the hand that traced The pathway of our once and love to twine A wright of gratified and praise to Hism.

Such is the language which those stars address.

A whath of gratitude and prake to Han.
Such is the language which those stars address. To melancholy man, while from the heath.
Accordant voices rise. Lot it is night—
Langualshed is the trilliant orbor day,
And more is left, save those tright stars above,
To clear the solitary world. So thos,
To clear the solitary world. So thos,
To thinking mant that one day see thy life
Esting ashed by the chilly touch of death.
But still upon thy grave a light shall stream—
And has the torch of Hape calm aided there
By much Religion, to witch over thy dust,
Which life again shall minute and warm.
To contract and the sun shall rice sublime.

Which his ag an shift inflate and warm.

To morrow, and the sun shall rice sublime,
Printing the face of nature; and each scene,
Tinged by its golden beams, shall glow and length,
I raight with new hir's or thou shall be thee down
Within the midnight chambers of the tomb, Within the midnight oblimbers of the tonly. And dirkness shall encompass thee a while; But then the light of Immortality. But then into the old recess, shall shine. And wake thee from thy slumbers: thou shall rise, And role diamners floing glory, live, And role thee on the bolom of thy God.

MISSIONARY LETTER.

We hardly know which most to admire-the wit and humour of some of the expressions, or the tone of pious cheerfelaess in others which compose the following extract of a letter from E. N. Sawtell, one of the foreign chaplains of the American Seamen's Friend Society, to the of 5th inst. which says:committee of the Society, in New York:

HAVEE, June 8, 1837. You are indeed putting my faith to the test. My spirits sunk within me at getting no remittance by the Utica. To obtain funds here is entirely out of the question, for the prevailing opinion is, that all America has failed, from General Jackson down to the shoe black. In my letter, by Mr. Stoddard, I more than intimated

zles me. My situation is quite unlike that of a jin the same rate, for all of our prisoners in their palling sight of a rattlesnake, with his head at the floor of the vault! There, forgotten broken merchant, who, sometimes perhaps, out possession.
of the fragments of a vast estate, may line his. The Bro pockets with something to feed his family. For one to stop payment is to stop eating—and I need not tell you what would be the next stoppage in I think in the absence of something definite this stopping process; in all probability it would be that of breathing-quite a serious failure that, particularly to a public speaker. Several Ten thousand men can be raised for that purgentleman in question. Mr. Thomas, who is no
little occurrences, however, have of late tranpuse in thirty days here in Texas, and 1, supold hunter, had seen rattlesnakes before. And spired, which encourage me to hope that in angling about I may yet catch a fish with money

A few days ago a hand cart stopped at my door loaded with chickens, ducks, fi h, a turkey, a calf's head and feet; indeed, for variety, it bore no small resemblance to Peter's sheet, and I strongly suspect, that the same hand that let down the sheet had something to do in this matter. It uppears that on the arrival of the Utica, their fresh provisions, which are packed in ice, must be disposed of, and in their dispos-als the officers kindly remembered their chaplain. They have ever manifest as a deep interest in the cause of the chapel since I have been here. The Lord be praised, and a thouand thanks to them.

came the talor with 're cloines. Surely, ignorant. thought I, el need to take no thought for my life, what I shall cat, nor for my body, what I shall cat, nor for my body, what I shall cat, nor for my body, who I in the Jews of old, who I in the Jews of old, who I in the Jews of old, who I in the small village of Biclodin, twelve years poid on a certain day in the following week; Herald. clouds thickened and darkened around me to suit me better than my new coat. I found, how- tent .- Poston Adv. ever, the chapel full of people, and many I knew to be Americans. I noticed particularly, one keen, black-eyed gentleman, who listened just as though he loved the truth. After preachto call for this to pay my tavern bill;" but he who holds the win is in his fist did not suffer it FURTRER PARTICULARS OF A HORRID o change, and that debt about which I was so faithless and unbelieving, is paid.

EXTRAORDINARY TWINS.

De Morgentsjerna, (a Swedich journal.) con-In the small village of Biclodin, twelve years rare birds, such as I thought could not exist latage, two male twins were born, joined together in fancy. The manner in which his aviary is back to back, and placed in such a position that when one stood up he was obliged to carry his of two immense rocks he has thrown a fine wire brother on his back, his legs above and his head grating, embracing in its extent four or five below; in this position they could change alterbelow; in this position they could change alternately. The children were both perfectly formed, and their growth has been equal, which gives rise to the idea that the adherence is nei-ther organic nor so firm but that they may be separated; this, at least, is the opinion of the medical men who have visited them. What is curious is, that they change their positions with great regularity; when on- is fatigued he utters quarter of an hour, with such precision, that the number of turns they make serves as a clock to their parents. About a year ago, while they were playing, they executed a number of evo lutions, or somersets, in such a way that they went over a great deal of ground with much rapidity; and since this discovery they have been employed as messengers, as they are able to reach any spot with greater rapidity than a horse. The summerset is similar to that executed by clowns; who throw themselves over with the hands and feet. The only difference Living for years in this solitude, he unconsciousis that the movement is perfectly natural to the ly formed friendships with the springs, the twins. In the country they are called the brothers furstiva, (thur booted brothers.)
