For the Maryland Gezette. CASTLE CROSIER.

(Continued.)
And were not a little relieved, when informed that the besiegers were vanquished, and this time brandishing his seimetar high in air, the welcome news was confirmed on the entrance into their spartment of the Emerald Knight, who directed his brave comrades to join him in the presence chamber, so soon as they saw that derful swiftness and ngility, to which the cele the dead were removed, and the wounded at brated Flying Childers bore no comparison.tended to, and the arrangements of the castle B fore Michael S hatz's (this being the name properly disposed, saying as he left them, my of the German quadruped,) eyes, was a glass devoirs are now to be paid to the fair inmates window, with a curtain of green cloth, to be of the eastle, since no doubt they have need of drawn at pleasure; he was covered with a red consolation. The ladies on his entering apmantle, the rack was of iron, and the manger proached him, and hoped a lasting truce had proached him, and hoped a lasting truce had of copper, neither of which was o costly or taken place. Not zo, ladies fair, replied he, for this day week I have to encounter, in single combat, the Knight of the Burning Flume, who, over the stable, was a gallery on one side, a over the stable, was a gallery on one side, a by this gage, (presenting the gauntlet with a dorned with a state of the animal and his recourtesy that well denoted the high breeding of the rainfluence. In our principal cities, the knight, to Eudocia,) has challenged me to tics, the gappings of a charger, or war horse, vil. Of this nature is the talisman, by the vir- feet higher tue and inducace of which Appolonius Tyante. For throughout the wile border his steed was the best destiny on a level with an outlaw. It ill boots by the laws of chivalry [Milton uses the term] Mamphian chivalry, in describing Pharoah's pursuit of the sojourners of Goshen, over the Red Sea. I be right and proper that I should, but us cause which I vandicate enjoins it on me. Well then, exclaimed Eudocia, he who engages in the secred cause of religion multirail. Retreshments were now brought in and waited only for the coming of the other knights, who soon joined the ladies and their chief-and the company thus assembled, discoursed on the incidents that had scarcely more than an hour occurred. If wing remained some sime with the ladies, the Council of Twelve called a meeting in Montrose Hall, and gave directions for repairing the outworks of the casthem, not knowing but that Red Beard might rally his forces and again besiege the fortress or citadel.

It is worthy of remark, that in the height of the siege, a condor hovered over the Crosicr on the pinnacle of the castle, with outspread wings, which omen augured favourably for its safety; while approaching it, the distressing cries, and piercing screams of the bird attracted the attention of all, and for a brief space suspended the raging elements of strife, which were only resumed by the Knight of the Burning Plume commanding his fortorn hope or serfs, to tear bandit that were ravaging the country far and down the principal banner which had been unfurled during the violence of the storm, and parts. The corps do reserve, thus submitting to the orders of the great bandit, marched with a resolute and firm step towards the object of their attack, when they were, ere they could reach it, overwhelmed by a shower of stones, arrows and darts, and other missiles, which were thrown or east from the towers by the soldiers who manned them. The reception this cohort met with was so hot that not one of them reached the spot where the colour was displayed, being a crimson flag, with purple stars or stripes.

Scarcely had night once more spread its curtains over the earth, when a tremendous yell was heard some hundred yards from the castle most; [This word, in castrametation, signifies a deep trench on the outer wall or rampart. The brink of the moat next the fort is called a cearp, and the opposite one the counterscarp.] this, as we have seen, was in consequence of a marder having been perpetrated. The Emerald, or Sapphire Knight, with the Knights of the Pink brave followers from the castle, and spurring their steeds rowel deep, galloped toward the direction whence the howl issued, but what was facir consternation to find that the Knight of the Burning Plume had again collected in arms, and was laying waste every thing with fire and sword, having just slayed two men who were returning from the mines of Peru, laden with gold for the castle, the others who were with them, and in number seven, escaped, and gained the castle before they could, though closely pursued, be overtaken. The bands, perceiving that the Emerald Knight had with him but an inconsiderable force, sent a detachment of five hundred men to rout the Crosser band, who however were repulsed or driven back with greet slaughter, having I ft one hundred and fifty on the fiel.—This so incensed the ruflian, that he placed himself at the head of his murderous gang, and commenced a general and fugious and reck - battle, which terminated with a loss of at it, a two hundred men—the Emerick with the profameness and vulgarity of lads and the sturning of the castle, which presented his using its semigration and particular treets are infested. Within a few years rented his using its semigration and having the semigration of the castle, which presented his using its semigration and having the semigration of the castle of that was raised by Red Beard, and levelled at pling shops, to rival each other in blasphemy that pert of the skull or head of the Emerald and low ribaldry. It would be well tor the City Knight which was most exposed, and had the Council to watch over the public comfort in this blows taken effect, the Emerald Knight would as in other matters, and pass such ordinances as

shed on the Knight of the Pink, and would have slaughtered him on the apot, had he not adroitly cluded the uplifted scimetar, by spring. ing, with his well trained charger, which was a remarkable leaper, over the head, scimetar and all, of Red Beard, which so estounded him, that his large eyes rolled in their sockets with amazement-he with an imprecation too horrible to repeat, again furiously attacked the Knight of the Pink, with his whole length stretched to the utmost extent, and just as he was a second steed of the Knight of the Pink leapt [The famous stable of the Elector of Hanove-, at Dresden, consisted among others, of a horse of wonthe tournament, and if in your possession will are now considered of great consequence, since prove to me a talisman. [A magical property they are of gay, showy and expensive modering ascribed to that instrument which is considered of the various prismatic colours.] dered as possonsing the power of preventing o- which greatly improve their appearance.] ten

us, according to tradition, wrought wonders, it than before over the bandit's upraised armnot miracles.] Not so, most noble knight, rethis he was afterwards heard to say, worried turned Eudocia, surely you will not put your him more, ripping out an oath, then any thing him more, ripping out an oath, then any thing he had ever met with. Finding that he could me to do so, answered the knight, nor would it effect nothing, he at length gave spers to his horze, and was with the remnant of his gang soon out of sight, having left all the gold, two wegon loads, behind him. The Emerald Knight and his aids returned with their followers to the costle, after an absence of about three hours.

At Castle Crosier th rowere no revels, or ther loose and inordinate pastimes—the knights employed themselves in dispensing charity, and other offices of humanity, and affording protection to their border neighbours, who were great ly harrassed by detected bands of marauders who infested that region-so that Castle Crosier, as well as its environs, was constantly in danger of being stormed, which circumstance rendered it expedient that the force to detend directions for repairing the outworks of the cas-it should be sufficient for the purpose as with a tle, of which many of them were considerably view to repel aggressions, or inroads, or incur-dilapidated, owing to the fierca onset made on siens on the lowly hamlets of a brave and ho-

nest peasantry.

The ladies Eudocia and Atalanta, [Although there is something classic in Ovid's metamorphosing Atalanta into a lioness, yet it would nave been a more suitable transformation had he changed her into a Venus, since she was ce lubrated for her beauty, but we never heard that she was any thing of a virago. The story of Atalanta and the golden apples, is doubtless fa-miliar to our readers ] for that was the name of the other lady, who as well as Eudocia, remained at the castle for security, until the hordes of fastnesses, with their attendants, were engaged waved in triumphant undulations over the ram- in a variety of occupations, that served, together with the occasional conversation of the knights, to beguile their moments, which rendered them perfectly satisfied with, though not entirely re conciled to their condition, conscious as they were, that there was no prospect of their leaving the castle without hazarding their lives A description of those ladies we shall here give r atford.

(To le continued.)

It is announced that the Exploring Expedi ion will sail on the 1st of December.

If the survey now in progress under the dir ection of the State Geologist, Protessor Drea-TEL, had been attended by no other consequences than the discoveries made by that gentie man of large beds of marl on the Eastern shore have the remains of the rink curred. In these collections of the best description of fertilizing material our farmers have an sale than by saying that one for restoring their worn out lands .- Bultimore Com. Adr. American.

> BREACH OF MARRIAGE PROMISE. Baltimore County Court has recently been engaged in the trial of a case involving a breach of the marriage promise. The suit was brought on behalf of Miss Louisa Wallace, a respectable young lady of Harford, against Dr John cupied the attention of the Court for nearly a thour and dollars. Counsel for plaintiff Mesers. Constable, Martin, Lee and Jenkings; for d fendent, Messrs. Johnson and McMahon .- Balti more American.

The most casual observer must have been rented his using his scinetar arm, having lost in the two skirmishes only twenty men, he him dent that it calls loudly for the adoption of self, received five wounds, since he was in the heat of each engagement-his wounds were parents neglect most grossly their respective obhowever slight, he being cased in armour. The ligations when they suffer youths under their Knight of the Pink was of great assistance to charge to run at large at night; and congregate Bellano, since he twice parried the scimetar in the neighbourhood of engine houses and tipdoubtless have been severely wounded. This will make such offences penal, and see that their so infuriated the bandit that he impetuously ordinances shall be enforced.—Bal. Am.

A steamhoat arrived at New York on Thursday from Newburg, with a cargo of butter, pork, poultry, &c. valued at \$50,000.

The Stonington Rail Road is now open for regular travel.

SICKNESS AT WEST POANT.

From the following extract of a case: i will be seen that the Typhus fever has and riging at West Point, and proved fatal in two instances among the corps of Cadets.

"U. S. Military Andeny, " West Point, N. Y.

"FEIEND BURKE:-We have to deplore the death of two of our fellow cadets. Benjamin F Baden, a member of the 4th class, and an only son of a widowed mother, (his fither, on officer in the army, died in Florida some nine months since.) die I on Wednesday, the 19:h inst after an illness of only six days, with the Ty phus fever. Also, on the 25th inst. Augustus M. Davidson, of North Carolina, a member of the 3d class, died with the same disease.

Their funerals were both attended on the day following their deaths respectively, by the corps of eadets, officers, and professors. They were buried with military honours.

The typhus fever has prevailed here to some There have been several others sick with it, besides those mentioned, but I believe here are none considered dangerous now. It was thought by some a few days ago, that it would be necessary to break up the organization of the institution, for a short time at least, but I am in hopes now that it will not be the case."-New Port Argus.

PAINFUL OCCURRENCE.

On the afternoon of Sunday last, a little boy bout 18 months old, the son of a Mr. Samuel King, of Camden, N J. was observed suddenly to exhibit signs of great agony. Upon stripping him to ascertain the cause of his distress, a neeale was found to have entered his body just beow the breast bone, the head of which could be seen protruding from the skin. The father en deavoured to extract it with his fingers, but in the confusion of the moment it was broken off, of the central eclipse. and a physician was sent for Dr. Harris, who immediately attended, could feel the needle in the flesh, and while he was engaged in making of Greenwich. In a few seconds afterwards it an incision, for the purpose of reaching it, he discovered that the spirit of his little patient but the lungs, and the cons quent suffusion of blood had caused immediate sufficiation .- Phil. Inq.

HYDROPHOBIA.

Messes, Dearborn and Co. have published the title pamphlot, so often mentioned in the papers | nular path being 420 miles in bread h. It reach as forthcoming, in which is set forth the remedy or hydrophobia prescribed, and it is said with cut, nearly to Ruleigh in North Carolina. great success, by Henry Hughss, a private soldier in one of the British regiments stationed at exact centre of the eclipse will pass, are Morgan, nourly expected to be landed at our wharf. It Montreal. The remedy is simple, easily pro- Berkly, Jefferson Loudoun, Fairfax, and Acco cured and easily administered, and the pro gator-who does not profess to be the discoverer-affirms that it has invariably proved efficacious. The pamphiet consists of 30 pages, 27 of which are occupied by a treatise on the hor rible disease. If the remedy offers but one chance in a hundred for success, no one should remain ignorant of it a moment longer than the time required to obtain possession of the pam phict. We will not further interfere with its inexhaustible source from which to draw manure remedy is a preparation of mercury.- N. Y.

From the Southern Literary Messenger. ECLIPSE OF THE SUN IN 1839.

The sun will be celipsed, visibly throughou the United States, on the 18th of September next, between 3 and 6 o'clock. P. M. The eclipse will not be total, but annular: that is, the moon, being too near the sun to hide it entirely from our view, will leave its margin visible, like luminous ring (annulus.) to those beholders whose place makes the moon pass directly beween them and the sun's exact centre.

The tract of the country, to which the celipse ill be thus central, is stated in the American Almanac to be the following:

Beginning to be visible in the unknown re gions near the North pole, the central annular clipse will pass through Kamtchatka in Asia, the British Possessions in North America, not far his death had agreed to seave Alton and remove west of Hudson's Bay, Lake Superior, Wisconhis press, but was dissuaded by Dr. Beecher and his press, but was dissuaded by Dr. Beecher and the British Posessions in North America, not far sin Territory, Michigan, Lake Erie, the N. E. part of Ohio, the Southeastern part or Pennsylvania, the west part of Maryland, northern part of Virginia, southern part of Maryland castern shore of Virginia, and into the Atlantic Ocean; its course being from N. W. to S. E. The e- as the stone house in schich the press was, conclipse will be annular, over a space of 420 miles tained more than \$140,000 worth of goods, ex-

The ring, in the places where it may be seen will continue only from four to about six and a half minutes.

At Baltimore, the college will begin at 6 minutes past 3, P. M. The Ring will be formed at 25 minutes past 4; and be central at 271 ninutes past 4. The celipse will end at 40 ninutes past 5.

At Washington City, and Richmond, the everal phases will be within a small fraction of minute, of the same time as at Baltimore.

At Raleigh, within about 2 minutes of the ame time. But there, no ring will appear .-The sun will be a very slender erescent.

This crescent will be wider and wider, with norns less and I sa sharp, as we go south and Southwest, or north and northeast, from the path

This path first touches the earth at a point near the North Pole, a little east of the meridian attains its greatest northern latitude (88°.) whilst for the first 8 minutes it moves rapidly winged its way to Hrx who give it. This will be the last central eclipse of the sun risible in the United States, until that of May 26th, 1854; which will be also annular. The total eclipse of the sun will be August 7th,

NOIS.

"ALTON, Wednesday evening, Nov. 8.

The curse of Abolitionism has again fallen the publication of that paper. upon our town. Yesterday morning at 4 o'-We understand that the steamboat Ccylon, ed from the Missouri Fulton, and put into God-that the press had arrived at the wharf, and my owned at Pittsburg, and bound to New Orleans from Louisville was burnt to the water's edge, of the friends of Mr. Lovejoy. During the day ly repaired to the wharf, and remained there on Tuesday last, near Salt river, thirty miles of yesterday much excitement prevailed, and below the Falls of the Ohio. The Ceylon was during the evening many individuals collected full of frieght and passengers. The cargo was with a full determination to destroy it. The principally consumed; but the passengers escaped, without any loss of life. - Cin. Whig. AURORA SEEN THROUGH A SNOW
STORM.

The snow storm of yesterday, which, at sunset, had covered the earth and all things near it with a mantle of the purest white closed earth. with a mantle of the purest white, closed early upon (or was fired upon by Mr. Lovejoy, when in the evening with a most curious and beautiful he, Mr. L. received a mortal wound from some phere, the surface of the earth, the trees, the have peace and quietness, and trust in God that

the crowd attacked the house of Messrs. Godnight, but finding it defended, they retired. In a short time afterwards the attack was renewed. At each time no violence was manifested, ex-The light was most intense in the north west | cept to demand the press. Those in the house creased and diminished in brightness, until, at expressed their determination to resist, it was to desist, and at the same time informed them half past six, only a slight tinge of red remained on the sky. It is presumed that places favored with a clear sky, enjoyed a splendid exhibition a fire kindled on the reof. The fire when first perty, and that serious consequences might em-

A number of Western Indiane, engaged for of the Aurena Borealis, the light of which was kindled did not harn freely, and a second person hind a pile of lumber on the wharf below, fired both of which entered Mr. L's. body, near or in the chest. Mr. L. dropped the gun he was in into the house, and as he reached the Clerk's room full on the threshold and expired instantly.

Those in the house now proposed surrender. ing, if the fire was put out. The crowd with. out ascended, and carried water in their hats to extinguish the flames. The doors were then thrown open, and as the crowd rished in two guns were fired, by some of those entering. The bill from one of the guns holged in the one cle a Mr. Roff, one of the defenders of the house, and it is yet doubtful, whether he will not lose his leg. The other hall longed in the foot of Mr. Weller. Several other persons in the house were injured, in attempting to escape.— As soon as the crowd had sobtained possession they took the press, broke it up into many pic-ces, and threw it into the aver. All then dispersed, and by two in the morning the town was again quiet.

The Mayor, we learn, was on the ground, at-tempting to arrest the distarbance, but without any effect. He narrowly escaped being wounds ed or killed, as a kall perforated his hat.

Mr. Lovejoy and Mr. Bishop were both interred yesterday, and every thing seemed to in-dicate, that the storm had subsided. Report states that Mr. L. on the evening preceding some others from doing so, on the ground, that the war had been commenced there and must be terminated there.

If the press had not been surrendered, a large amount of property must have been destroyed,

clusive of the building.

Every one must legret this unfortunate occurrence, but the gull of the transaction will ever rest with these who madly and obstimately persisted in the attempt to establish an abolition ress there. They were warned time after time of the consequences, and urged by every consideration, not to press the attempt; but to all they turned a deaf ear, and public opinion will hold them responsible for the fatal consequences.

THE AFFAIR AT ALTON. The following is the official account given by the Mayor of the recent affair at Alton: MAYOR'S OFFICE, CATY OF ALTON. Nov 8, 1837.

TO THE PUBLIC. In order that the public mind may be correct; informed of the lamentable and fatal tragedy that was enacted in our city on the night of the 7th inst., and with a view of preventing and correcting distorted statements of the proceedings of the mob, and those persons against whom the attack was directed, I deem it incumbent on has so long agitated the peace and tranquillity the crizens of Alton. Without recurring to the causes or results of the previous excitepress and its final destruction, I shall confine ny statement to the last, and most melancholy occurrence, which has befallen our city.

For several days past it had been announced and generally believed, that a printing press was had also been the correct rumour, that this press was intended for the re establishment of the "Alton Observer." The circulation of these rumours produced no small degree of excitement among those who had taken a decided stand against the abolition sentiments that were understood to have been disseminated through the columns of the Observer. Various reports RIOT AND DEATHS AT ALTON ILLI- of a threatening character against the la NOIS.

Of the press were in circulation, which led the triends of the Observer and its editor to make violence should be offered by those opposed to

On Tuesday about 3 o'clock in the morning. lock, P. M. a fourth abolition press was land. I was called from my lodgings, and informed until the press was landed and stored in the warehouse of Messrs. Godfrey, Gilman & Co. There were no indications of violence or resistance on the part of any one at that time.-The arrival of the "abolition press" (as it was called) was generally known in the early part of that day, which served to re kindle the excitement. Representation was made to the Common Council of the threatening reports which were in circulation. The Common Counil did not, however, deem it necessary to take any action on the subject. Gentlemen directly interested in protecting the press from mob viclence, decmed it expedient to guard the warenouse with men and arms, in readiness to resist iolence, should any be offered. During the early part of the night of Tuesday, it was re-ported through the city that there were from 30 to 40 armed men originard within the warehouse.

About 10 o'clock at night 20 or 30 persons appeared at the south end of the warehouse and gave some indications of an attack. Mr. W. S. Gilman, from the third story of the warehouse, addressed them without, and urged them to desist, and at the same time informed them

sue. Those with said they would no stroyed; said they person, or other pr he Press. To wi press should not be side then repaired ing, and attacked stones, &c. and co or 20 minutes, who of the windows named Luman Bis He was carried to mob withdrew and tion of a small nu Upon the first
