Office of the Saturday News } Philadelphia, November 26, 1836.

THE very liberal patronage bestowed on the SATURDAY NEWS, since its tonmencement in July last, and a desire to meet that patronage by corresponding exer-tions, have induced us this week to publish a *Double Number*—being the largest sheet ever printed in Philadelphia for any purpose, and the largest literary paper ever printed in the United States. To those of our friends who are practical printers, it need not be mentioned that this undertaking has involved serious mechanical difficulties. The largest who have seen the experiment made; and, added to the necessarily increased amount of composition, press work, &c., these supple neutary expenses have made an aggregate cost, which would have deterred many from engaging in the enterprize. A gain of two thousand new subscribers will not repay the

actual cost of this single number.

We flatter ourselves that, besides its extraordinary size, this number presents att contains the whole of Friendship's Offer ing for 1837, the London copy of which costs 84, and has 584 closely printed pages of let-ter press. Distinguished as the present age, and particularly our own country. has been for cheap reprints, we believe this surpasses any former instance. For four cents subscripers to the Saturday News receive, in addition to their ordinary supply of miscellaneous matter, an English annual, the largest receive it, moreover, in a form that, from its

novelty, gives it additional value. Of the general character of the Saturday News we need not speak. That has now become so well known as to require no comment. We may take occasion to say, however, that in enterprize and resources we

A NORTHERN TALE. In the ancient heathen times of the Saxons,

there happened once a great war with the Danes. Adalbero, Duke of Saxony, who had counselled it, now in the hour of carnest conflew the arrows and the javelins; there glanced many valiant blades on both sides; and there sho many bright gold shields through the dark fight. But the Saxons, at every attack, were repulsed, storming of a steep height could deliver the archange a ruinous and destructive flight into

Adalbero conducted the attack. But in vain he forced his fiery charger before the equadron; in vain he shouted through the field the sacred words, "Freedom and Fatherland?" in vain streamed his warm blood, and the blood of the foe, over his resplendent armor. The ponderous mass gave way; and the enemy, secure on the height, rejoiced in their decided victory. Again rushed Adalbero on with a few gullant warriors; again the faint-heatted fell behind; und again the enemy rejoiced.

REVIEW OF THE WEATHER &c. FOR

AUGUST, 1639.
Aside from the distressing drought, nothing remarkable has occurred during the month which has just closed, excepting that on Saturday afternoon and evening of the 11th, there was one of the most extensive, destructive and fatal thunthe Saxons, with feariul cries, shouted, as with derstorms that has taken place within the recollection of any person now living. We have had accounts of its destructive effects from Winheight was carried by storm, and Adalbero, with a sudden shudder, saw the enemy flying through York. At Winchester, the rain fell in such torrents as to fill not only cellars and basements The conqueror returned home in triumph; and but to be several feet deep on the floor of the first story, in the streets at the lower part of the lown; and in the country around, mills, dams nd bridges were swept away; and a young lady

At Deal's island, 140 miles below Baltimore where there were about 300 sails of small vessels at anchor, (waiting to take off a large assemblage of persons who had been attending a camp-meeting.) three-fourths of them were driven on shore by the violence of the gale, and nine were capsized; a number of persons were also believed to have been drowned. The stoutest trees were blown down for a considerable distance around, and Capt. Parrish. on his way down the sound, saw several vessels bottom

and grain, varying in value from one to three thousand dollars: among others that we have seen accounts of, were three in Burlington county, New Jersey; one in Bucks county; Pa.; one in Montgomery county; one or two in Delaware county; one in Lancaster county; one in Lancaster county; one in Charlestown

It is truly gratifying to learn, that while our

annual rumor of "half crops" in relation to corn and potatoes resounds throughout some sections of the country this side of the Alleghanies, yet Southern States, it is generally acknowledged southern States, it is generally acknowledged that they will be abundant. The Louisians pa-pers say that sugar cane and Indian corn never looked more promising; no doubt the crops will be abundant. The editor of the Indiana Chronicle says:—"We have measured some lots and fields of corn which are from 14 to 17 feet high, and will average from 4 to 5 large and perfect ears of corn to each stock;—and, no doubt, the The Arkansas Gazette, says, the crops of corn are very promising in every section of this State. A Missouri paper also says, crops of all kinds which have been gathered, and those to be gathered, will be abundant. A late Richmond (Va.) paper says, the late rains have contributed to revive the corn, and relieve the fears of the nost of the counties in Virginia. And accounts from the Western part of the State of New York, and from every one of the New England States, are of the most cheering character. A late Boston paper says, the county never appeared CORN and POTATOES will be abundant. A late uffer from drought, but the late rains have altered the complexion of affairs, and there will be good crops." So say accounts from Rhode Island, Massachusetts, New Hampshire, Vermont and Maine. A gentleman from the State of Maine says, the crops of Potators will be so aundant there, that after reserving a plentiful supply for home consumption, they will be able to export enough to Philadelphia to supply its market until next June, at from 50 te 75 cents a bushel. It is well known that for many years, some of the finest Mercer potatoes have been brought from Maine to this market .--There will also, be sent, as usual, large quanti-ties from the other Eastern States. The above will be cheering news to the lovers of good potatocs, corn bread and Indian mush.

The month just closed has furnished its full quota of hot weather. There were mine days quota of not weather. Incro were fine days in which the mercury rose to 90 and above, (three days to 95,) and nineteen days it was from 80 to 90 at mid-day, and there were some terrible hot dog nights.
