which occur, and all the new theories which are advocated in the various institutions of medical science throughout the world; and it is proper that it should be so. The same is true of the other leading professions of law and of divinity. But, notwithstanding the important bearings which phrenologists know their science to have on medicine, and divinity, and law, there is no publication through which, as the appropriate channel, those bearings may be pointed out. It is fine that some newspapers, and also one or two works of a less ephemeral character, do occasionally admit articles in favour of phrenology; but these do not meet the present nenology; but the source of the publisher free of expense.

skne; on Jurisprudence; on Theology, and en Mental and Moral Philosophy. On all these subjects there is encouragement to hope for contributions from several able pens; while the resources of the editor himself will not, it is hoped, be found inconsiderable.

The religious character of the work will be decidedly evangelical: for one prominent object in giving it existence is, to wrest Phrenology out of the hands of those, who, in ignorance of its true nature and tendendained by the Mayor, Recorder, Aldermen, and Common Conneil of the city of Annapolis, Tat the Mayor be, and he is here by authorised and required, to issue to the Annapolis and Elk-Ridge Rail Road Company, Certificates of Stock, to be signed by him, and countersigned by the Clerk, with the Seal of the Corporation thereto attached, to an amount not exceeding two thousand five hundred dellars, in such sums as the said Annapolis and Elk-Ridge Rail Road Company may direct, the principal amount thereof to be paid at the end of ten years from the time the same may be issued, with interest at the rate of sixper cent per annum, payable half yearly of the first days of January and July of each year.

A frequent subject of discussion in our pages will therefore be, The Harmony between the truths of Revelation and those of Phrenology. And on the subject of the religious bearings of our science we respectfully solicit the enquiries and objections, not of cavillers, but of the truly candid, and the conscientiously fearful. Such correspondents we shall always welcome to our pages, and they will honest and respectful objectors to Fhrenology.
