without an increase of expense to the substrue, have, within a few years, most astopishingly multiplied, there does not exist on
the American continent a fingle periodical
whose object is to advocate its truths, repel
the attacks made upon it, or answer the enquiries which even candid persons are disposed to make concerning it. And this is
the more surprising since the materials already existing and daily augmentics, with
which to enrich such a publication are almost inexhaustible.

The science of medicine has its approprioctave pages, making avolume of not less

whose, within a few years, most astowithout an increase of expense to the subsociate of expense to the subsociate the subsociate of expense to the subsociate of expense of the sub-

medical science throughout the worlds and it is proper that it should be so. The same is true of the other leading professions of law and of divinity. But, newithstanding the important bearings which phramingists know their science to have of medicine, and divinity, and law, there is no publication through which, as the appropriate channel, those bearings may be pointed out. It is true that rome newspapers, and also one or two works of a less ephemeral character, do occasionally admit articles in favour of phremotors but these do not meet the recent for the work one year, subscribers and the subscribers and the subscribers and the publisher free of expense.

N. B. As funds are already deposited for man's door." That object has been accomnology: but these do not/meet the precent re-cesury. A periodical which is avowedly phrenological—one, whose pages shall con-stitute a permanent depository of facts, and which shall be open/for the expression of e-pinions and the recycl of principles connect-ed with those facts, is now needed; and a nology: but these do not/meet the present need with those facts, is now needed; and strong feeling of this necessity, together with a belief that such a work is exensively demanded, and with meet with encygragement and support, has induced the publisher to present the prospectus of "The ilmerican Phrenological Journal and Miscellany."

The object of this work will be to present the property with the most interesting of

serve from oblivion the most interesting of the very numerous facts, confirmatory and the very numerous facts, confirmatory and illustrative of the truth of phrenology; to show the true bearings of this science on Education, (physical, intellectual, and moral;) on the Medical Treatment of the hissance; on Interpredence; on Theology, and on Mental and Moral Philipsophy. On all these subjects there is encouragement to hope for contributions from several sole pene; while the resources of the editor himself will not, it is hoped, be found inconsiderable. It is hoped, be found inconsiderable.

The religious character of the work will be

be decidedly evanged ad: for the prominent object in giving it existence is, to wise Phrenol gy out of the hands of those, who, in ignorance of its true nature and tendencies, suppose that they find in it an instrument by which to subsert the truths of re-vealed religion, and lossen the bonds of huvealed religion, and loosen the counts of nu-man accountability, and moral obligation.— A frequent subject of discussion in our pages will therefore be, The Harming American truths of Revelation and those of Parenchay. And on the subject of the religious bearings of our science we respectfully solicit the enof our science we restant and or villers, but of the truly Channe, and the conscientiously fearful. Such correspondents we will always welcome to our pages, and to will ways welcome to our pages, and will always be treated with kininess; as also, will honest and respectful objectors to l'hre But the captions and cavillers will ensure to themselves our silent contempt; and the ignorant protender, who seeks to overthrow a science which he will not be at e pains to investigate, may expect a ricrite.

them, in all cases in which we have satisfactory vorchers for their genumenters and in which all the facts in the several cases are furnished to us. But as we must form our jurgment of the method in all cases on which we sames our opinions, it is obvious that we cannot receive, in

gical works: nor shall we fail to present to dained by the authority aforesaid. That it our readers such matters of interest and inshall be the duty of the Collector of the Cishall be the duty of the Collector of the CiAs the arrangements for the prosecution

logists,) to enich the work what their contributions, we offer for accepted matter, as liberal a compensation per printed page, as is usually afforded by the very first periodicals in our country; but the editor does not promise to endorse all which his correspondents may communicate; nor all which he may admit into the work. To error, il serious, and especially if it affect the interests of morality and religion, he claims the right of correction, in the form of reply, or of the suppression of the objectionable matter; and communications for which compensation is expected, must be so prepared as to be fit for the public eye.

that the pecuniary value of each number will depend much on the extent to which the work is patronised. It is not with the de-

MAMMOTH SHEET.

OFFICE OF THE SATURDAY NEWS ? AND LITERARY GAZETTE.

Philadelphia, November 26, 1856. TILE very liberal patronage bestowed on the SATURDAY NEWS, since its commencement in July last, and a desire to meet that patronage by corresponding exertions, have induced us this week to publish a Double Number—being the largest sheet ever printed in Philadelphia for any purpose, and the largest literary paper ever printed in the United States. To those of our friends who are practical printers, it need not be mentioned that this analysts have been invested. meet that patronage by corresponding exermentioned that this undertaking has involved serious mechanical difficulties. The largest -or one of the largest presses in Philadelphia is used for our ordinary impressionbut this would accommodate only a single page of the mammon sheet, and we were o oliged, therefore, to work four forms at different periods. The care used in preparing the paper—in removing and folding the sheets, &c., can only be estimated by those who have seen the experiment made; and added to the necessarily increased amount o composition, press work, &c.. these supple mentary expenses have made an aggregate cost, which would have deterred many from engaging in the enterprize. A gain of two thousand new subscribers will not repay the

actual cost of this single number. We flatter ourselves that, besides its extraordinary size, this number presents at-tractions that entitle it to some attention.— It contains the whole of Friendship's Offering for 1837, the London copy of which costs 84, and has 384 closely printed pages of letter press. Distinguished as the present age, and particularly our own country, has been for cheap reprints, we believe this surpasses any former instance. For four cents subscribers to the Saturday News receive, in addition to their ordinary supply of miscellaneyet received for the coming season; and they receive it, moreover, in a form that, from its novely, gives it additional value.

Of the general character of the Saturday News we need not speak. That has now become so well known as to require no com ment. We may take occasion to say, however, that in enterprize and resources we yield to no other publishers in this city of elsewhere, and we are determined that our paper sh. Il not be surpassed. We have entered the field prepared for zealous competition, and we stand ready in every way to rea lize our promise, that no similar publication shall excel that which we issue. Our articles, both original and selected, we are not ashamel to test by any comparison which can be a dopted; and there is no periodical in the United States, monthly or weekly, which might not be proud of many of our contributors.

The issuing of this number may be regarded as an evidence of our intention and ability to merit success. Nor will it be the only effort-From time to time, as opportunity of fers, we proprose to adopt extraordinary means for the interest and gratification of our subscribers.
