SUPPLEMENT TO THE GLOBE.

APPENDIX.

November 22.

THESE works have been published by us for six years. There are now more subscribers for them, probably, than for any other paper published in the United States; certainly more than there are for any other piper published in this District. This large and increasing subscription is conclusive e-vidence of their usefulness. They are inva-luable to all who feel an interest in the proceedings of Congress. No other publication gives them so full, nor half so cheap. It is, indeed, the cheapest publication in the United States—perhaps in the world. Our position at the seat of Government enables us to print them at so low rate. We are compelled to publish the proceedings of Congress in detail, for our daily paper. This done, it requires, comparatively; but a small additional expense to change them to the forms of the Congressional Globe and Appendix. If it were not for these circumstan ces, we could not publish them for four time the sum charged.

The Congressional Globe is made up of the da ty proceedings of the two houses of Congress, and the speeches of the men bers. condensed. The year and nays on all im portant subjects are given. It is published weekly, with small type, on sixteen royal

It is to one address, and the subscription forward true that some newspapers, and also one or two works of a less ephemeral character, do occasionally admit articles in favour of phre occasionally admit articles in favour of phre ulogy: but these do not meet the present ne cessity. A periodical which is avowedly phrenological—one, whose pages shall con stitute a permanent depository of facts, and which shall be open for the expression of opinions and the record of principles connected with those facts, is now needed; and a strong feeling of this necessity, together with a belief that such a work is extensively de-manded, and will meet with encouragement and support, has induced the publisher to present the prospectus of "The American Phrenological Journal and Miscellany."

The object of this work will be to pre serve from oblivion the most interesting of the very numerous facts, confirmatory and illustrative of the truth of phrenology; to show the true bearings of this science on Elucation.
