The Congressional II. Battee a control of the delivering application and the said act prescribed for the present application. The condition of the present application and the said act pres

The object of this work will be to preserve from oblivion the most interesting of one or two insertions, and forward a paper the very numerous facts, confirmatory and containing it to the publisher, the work and illustrative of the truth of phrenology; to be a served to the publisher, the work and illustrative of the truth of pure nology; to show the true bearings of this science on Education, (physical, intellectual, and morals) on the Medical Treatment of the In August 23. socie; on Jurisprudence; on Theology, and on Moral Philosophy Oa all these subjects there is encouragement to hope for contributions from several and pens; while the resources of the chiter houself will not, it is hoped, be found inconsiderable.

The religious character of the work will be decidedly evangelical: for one prominent object in giving it existence is, to west Phrenology out of the hands of those, who, in ignorance of its true nature and tend ncies, suppose that they find in it an instruwhich to subvert the truths of revealed religion, and loosen the bonds of human accountability, and moral obligation .-A frequent subject of discussion in our pages will therefore be, The Harmony between the truths of Revelation and those of Phrenology. And on the subject of the religious bearings of our science we respectfully solicit the enquiries and objections, not of cavillers, but of the truly candid, and the conscientionally fearful. Such correspondents we shall always welcome to our pages, and they will always be treated with kindness; as, also, will honest and respectful objectors to Phrenology. But the captious and cavillers will ensure to themselves our silent contempt; and the ignorant pretender, who seeks to o-verthrow a science which he will not be at the puns to investigate, may expect a merit-

As our object is the establishment of TRUTH, we suffert the communication of facts which are supposed to militate against Phre-nology; and we piedge oursides to publish them, in all cases in which we leve satisfactory vouchers for their genuineness; and in at the rate of six per cent per annum, paya which all the facts in the several cases are furnished of us. But as we thus form our wn judg aent of the cerebial nevelopement own judg and of the cerem Guercon pennent 2.
