

PROSPECTUS OF THE AMERICAN PHRENOLOGICAL JOURNAL & MISCELLANY.

It is a remarkable fact, that while the community, but from moral considerations: from a desire to know and to promote truth. Hence should a large subscription list be obtained, a considerable proportion of the profits will be devoted to the enlargement and improvement of the work.

THE SCIENCE OF MEDICINE has its appropriate media through which to present to the profession and to students all the new facts which occur, and all the new theories which are advocated in the various institutions of medical science throughout the world.

THE OBJECT OF THIS WORK will be to preserve from oblivion the most interesting of the very numerous facts, confirmatory and illustrative of the truth of phrenology; to show the true bearings of this science on Education, (physical, intellectual, and moral) on the Medical Treatment of the Insane on Jurisprudence; on Theology, and on Mental and Moral Philosophy.

THE RELIGIOUS CHARACTER of the work will be decidedly evangelical: for one prominent object in giving it existence is, to wrest Phrenology out of the hands of those, who, in ignorance of its true nature and tendencies, suppose that they find in it an instrument by which to subvert the truths of revealed religion, and loosen the bonds of human accountability, and moral obligation.

AS OUR OBJECT is the establishment of TRUTH, we solicit the communication of facts which are supposed to militate against Phrenology, and we pledge ourselves to publish them, in all cases in which we have satisfactory vouchers for their genuineness; and in which all the facts in the several cases are furnished to us.

ORIGINAL ESSAYS on Phrenological subjects will form part of the Journal; as also, Reviews of Phrenological and Anti-Phrenological works: nor shall we fail to present to our readers such matters of interest and importance as may be found in foreign Phrenological works of standard excellence, and which are not generally accessible to the American public.

TO ENCOURAGE Phrenologists of talent (and especially professional men who are Phrenologists) to enrich the work with their contributions, we offer for accepted matters, as liberal a compensation as printed pages is usually afforded by the very first periodicals in our country; but the editor does not promise to endorse all which his correspondents may communicate; nor all which he may admit into the work.

IN CONCLUSION, we may be allowed to say, that the pecuniary value of each number will depend much on the extent to which the work is patronized. It is not with the de-

ire of expectation of gain that it is offered to the community, but from moral considerations: from a desire to know and to promote truth. Hence should a large subscription list be obtained, a considerable proportion of the profits will be devoted to the enlargement and improvement of the work.

TERMS: 1. The American Phrenological Journal and Miscellany will be issued monthly commencing on the 23d of October next.

2. Each number will contain at least 32 octavo pages, making a volume of not less than 384 pages, corresponding in point of mechanical execution with the best periodicals of the day.

3. The work will be furnished to subscribers at \$2 per annum for a single copy; \$5 (current in Philadelphia or New York) for three copies, or \$10 (current as above) for seven copies sent to one address.

4. Subscriptions, and letters of business may be addressed to the publisher, ADAM WALDIE, 46 Carpenter-street, Philadelphia, and communications for the work to the Editor of the Am. Phren. Jour., care of A. WALDIE.

5. To editors who will give this Prospectus one or two insertions, and forward a paper containing it to the publisher, the work will be sent for one year.

6. Postmasters throughout the country will please to act as agents for this Journal. August 23.

\$20 REWARD. DAN AWAY from the subscriber, living near Pig Point, on Monday morning last, a Negro Boy named Washington, about 18 or 19 years of age.

A NEW AND CHEAP PERIODICAL.

Attention is requested from our readers to the following prospectus of a new, and even a cheaper book periodical, which will be issued from this office in the first week of next January. It will not be so convenient a form for binding as the day, which are such sought after, but are comparatively dear, and which cannot penetrate the interior in any mode half so rapidly as by mail, in which volumes of books are prohibited.

Books at Newspaper Postage. WALDIE'S LITERARY OMNIBUS. NOVEL AND IMPORTANT LITERARY ENTERPRISE!!

IT was one of the great objects of "Waldie's Literary," to make good reading cheaper, and to bring literature to every man's door. That object has been accomplished; we have given to books wings, and they have flown to the uttermost parts of our vast continent, carrying society to the secluded, occupation to the literary, information to all.

THE SCIENCE OF AGRICULTURE, to furnish instructions for the best models of practice in all the departments of husbandry, in horticulture, and other rural affairs, and to give useful lessons for the improvement of the young mind.

SHERIFFALTY.

At the friendly solicitation of a number of the Voters of Anne-Arundel County, the subscriber is induced to offer his services as a Candidate for SHERIFF of said County, and will endeavour so to discharge the duties, if honoured with their confidence, as to give satisfaction.

JOHN S. SKIDDEY. November 8, 1838.—le.

I know of no pursuit in which more real or important services can be rendered to any country, than by improving its Agriculture. WASHINGTON.

SUBSCRIPTION TO THE SIXTH VOLUME OF THE CULTIVATOR, CONDUCTED BY J. BURL, of Albany.

IN presenting our subscription for the sixth volume of the Cultivator, the Conductor avails himself of the opportunity of tendering his thanks to the gentlemen, whose voluntary exertions have given to this paper a circulation almost unprecedented in our country.

THE CULTIVATOR will continue to treat of the science of agriculture, to furnish instructions for the best models of practice in all the departments of husbandry, in horticulture, and other rural affairs, and to give useful lessons for the improvement of the young mind.

JOURNAL OF THE AMERICAN SILK SOCIETY AND RURAL ECONOMIST.

A Convention which met at Baltimore, on the 11th of December last, composed of a great number of gentlemen from various parts of the Union, distinguished for their public services, patriotism, and practical intelligence, the following resolutions were unanimously adopted:

Resolved, That it is the deliberate opinion of this Convention that Silk may be grown in all the United States, not only for domestic purposes, but as a valuable article of commercial export—thereby giving an active employment to American labour, and retaining millions of dollars in our country, that are annually sent out of it for the purchase of silken goods.

Resolved, That a National Silk Journal ought to be established under the auspices of the Executive Committee, and all the funds over and above the support of said paper ought to be devoted to the advancement of the silk culture in the United States.

Under the latter resolution, J. S. SKIDDEY, postmaster, of Baltimore, was invited to become the editor of the work, and has consented to do so—as far as may be consistent with the strict performance of his public duties.

IN the course of the discussions which took place in the Convention, all the difficulties which have been encountered, and which may yet be apprehended, in the prosecution of the silk culture, as a great branch of American industry, were fully considered; and the result was an universal conviction that, now, in the words of the resolution, "Silk may be grown in the United States, not only for domestic purposes, but as a valuable article of commercial export."

THE CULTIVATOR will continue to treat of the science of agriculture, to furnish instructions for the best models of practice in all the departments of husbandry, in horticulture, and other rural affairs, and to give useful lessons for the improvement of the young mind.

THE CULTIVATOR will continue to treat of the science of agriculture, to furnish instructions for the best models of practice in all the departments of husbandry, in horticulture, and other rural affairs, and to give useful lessons for the improvement of the young mind.
