## AMERICAN PHRENOLOGICAL JOURNAL & MISCELLANY.

the a remarkable fact, that while the converts to the belief that Phrenology is whose object is to advocate its truths, repel ed, and the attractions of the work be thus the attacks made upon it, or answer the enposed to make concerning it. And this is posed to make concerning the Anthonic of the more surprising since the materials altered the more surprising since the materials altered to the surprising and daily augmenting, with and Miscellary will be issued monthly, comparing on the 2d of October next. to enrich such a publication, are al-

The science of medicine has its appropriate medical through which to present to the prefersion and to students all the new facts which occur, and all the new theories which are adviscated in the various institutions of medical science throughout the world; and it is proper that it should be so. The same is true of the other leading professions of law and of divinity. But, notwithstanding the important bearings which phrenologists know their science to have on medicine, and The science of medicine has its appropriknow their science to have on medicine, and pies will be furnished at \$1.50 per annum; devinity, and law, there is no publication and to companies of eight or more of such, true that some newspapers, and also one or two works of a less ephemeral character, do

N. B. As funds are already depos occasionally admit articles in favour of phrenology: but these do not meet the present necessity. A periodical which is avowedly vance; and for the same reason, subscriptions ubrewological—one, whose pages shall constrong feeling of this necessity, together with

The object of this work will be to preshow the true bearings of this science on Education, (physical, intellectual, and morally) on the Medical Treatment of the Invites on Jurispendence; on Theology, and on Medical Moral Philosophy. On all these subjects there is encouragement to hope for contributions from several able pens; while the resources of the editor himself will not. illustrative of the truth of phrenology; to be sent for one yearthe resources of the editor himself will not, The religious character of the work will went away, a part it is hoped, be found inconsiderable.

which to subvert the truths of revealed religion, and loosen the bonds of human accountability, and moral obligation.—
A frequent subject of discussion in our pages
will therefore be, The Harmony between the tenths of Revelation and those of Phrenology. And on the subject of the religious bearings of our science we respectfully solicit the en-quiries and objections, not of cavillers, but of the truly candid, and the conscientiously fearful. Such correspondents we shall al-ways welcome to our pages, and they will always be treated with kindness; as, also, will honest and respectful objectors to Phreensure to themselves our silent contempt; Annapolis and Elk-Ridge Rail Road Company of the ignorant pretender, who seeks to one of the ignorant pretender, who seeks to one of the ignorance which he will not contempt on the ignorance which he will not be in the ignorance of the ignorance

improving its Agriculture.

SUBSCRIPTION SIXTH VOLUME OF CECEAVITIUD EIET CONDUCTED BY J. BUEL,

of Albany.

N presenting our subscription for the sixth volume of the Cultivator, the Conductor avails himself of the opportunity of tendering his thanks to the gentlemen, whose vo-luntary exertions have given to this paper a circulation almost unprecedented country-and particularly to the numerous correspondents whose communications have enriched its columns. We respectfully invite the continued co-operation of both classes, as an efficient mode of promoting useful improvement, and advancing the prosperity of our country. The plan and price of the Cultivator will remain as they are; but as the publication can only be sustained by a large circulation and prompt payments, much will depend upon the voluntary aid which we expect, and upon the subscriptions being promptly paid in advance.

The Cultivator will continue to treat of

the science of agriculture, to furnish instructions for the best models of practice in all ture, and other rural affairs, and to giv useful lessons for the improvement of the young mind. The Conductor will endeavour to render it a present help, and a vo lume of useful reference, to all who have the ambition to distinguish themselves in rural labours and rural improvements-to help themselves and to benefit society

To meet the public demands, we have pub lished a new edition of our four first volumes. which may be had, stitched, at 50 cents per

JOURNAL AMERICAN SILK SOCIETY

T a Convention which met at Battimore on the 11th of December last, composed of a great number of gentlemen from va-cious parts of the Union, distinguished for their public services, patriotism, and practi-cal intelligence, the following resolutions

RURAL ECONOMIST.

were unanimously adopteds

Resolved, That it is the deliberate opinion of this Convention that Silk may be grown in all the United States, not only for domes. in all the United States, not only for somes-tic purposes, but as a valuable article of com-mercial export—thereby giving an active em-ployment to American labour, and retaining millions of dollars in our country, that are annually sent out of it for the purchase of

silken goods.

Resolved, That a National Silk Journal ought to be established under the auspices of the Executive Committee, and all the funds over and above the support of said paper ought to be devoted to the advancement of the silk cause in the United States.

postmaster, of Baltimore, was invited to become the editor of the work, and has consente. to do so-so far as may be consistent with the strict performance of his public da-

In the course of the discussions which took place in the Convention, all the difficulties which have been encountered, and which may yet be apprehended, in the prosecution of the silk culture, as a great branch of American industry, were fully considered; and the result was an universal conviction that, now, in the words of the resolution, Silk may be grown in the United States, not only for domestic purposes, but as a valuable article of commercial export. The suitableness of our soil and climate to the growth and health of the worm, and the trees which supply its food; the capabilities, the habits, and the genius of our people for conducting the business through its whole process, and the price of American labour as compared with that of silk-producing countries, all were fully canvassed, and the most sceptical became satisfied. The fact is, that our un-restrained freedom in the entertainment and liscussion of various and discordant doctrines, religious and political, has imparted to us, as to our English ancestry, an omniverous appetite for knowledge, and a capaci-ty to learn in a few years what cannot be acquired in ages, where all is dull conformity and routine of thought and of action! Thus has it happened in manufactures as in other things; American ingenuity, unrestrained by prejudice or law, has triumphed over difficul-ties apparently insurmountable! How long, may it be asked, after our first cotton spindle was put in motion before Yankee Lowells' were sold at a profit in China? So willit be with silk. The only question is as to how long it shall take us? With a monthly jour-

those who may feel disposed to patronize it. TERMS.

Two Dollars a year, or six copies for Ten Dollars, always to be paid before the work is sent. All subscriptions to begin with the first number of the year, and in no case will the work be sent to any subscriber longer than it shall have been paid for.

All Editors of papers who may desire to see Silk added to the list of American Staples; and who will have the kindness to insert this prospectus, will be entitled to a cospy of the Journal.

PETER PINCKNEY, Com. of Deeds. A CASE OF TIC DOLOREUX.

A CASE OF TIC DOLOREUX.

Mb. J. E. Johnson, wife of Capt. Joseph Johnson, of Lyan, Mass. was severely afflicted for ten years with The boloroux, violent pain in her head, and vomiting, with a burning heat in the stomach, and unable to leave her roam. She could find no relief from the advice of strend physicians, nor from medicines of cuy kind, until after the had commenced using Dr. Evans' medicine, of 100 Canthum street, and from that time she legan to amend, and feels satisfied if she continue the medicine a few days longer, will be perfectly cured. Reference can be had as to the truth of the above, by calling at Mrs. Johnson's daughter's Store, 350 Grand st. N.Y.

A perfect cure effected by the treatment of Dr. W. Eraa. Mr. John Gibson, of North Fourth street, Wilitumsburgh, afflicted with the above complaint for three
years and nine months; during which time he had to
use crutches. His chief symptoms were excruciating
pain in all his joints, but especially in the hip, shouldr, knees and ankles; an aggravation of the pain towards night; and for the most part all times from the
external heat, an obvious thickening of the fascia and
ligaments, with a complete loss of muscular power.—
For the benefit of those afflicted in a similar manner,
Mr. Gibson conceives it meet to say that the pains have
entirely ceased, and that his joints have completely recovered their natural tone, and he feels able to resume
his ordinary business. PARALYTIC RHEUMATISM .-
