OF THE AMERICAN PHRENOLOGICAL

quiries which even candid persons are disposed to make concerning it. And this is the more surprising since the materials already existing and daily augmenting, with and Miscellany will be issued monthly, com-which to currich such a publication, are al-

ate mentia through which to present to the profession and to students all the new facts which occur, and all the new theories which are advocated in the various institutions of medical science throughout the world; and it is proper that it should be so. The same is true of the other feading professions of law and of divinity. But, notwithstanding the important bearings which phrenologists know their science to have on medicine, and divinity, and law, there is no publication through which, as the appropriate channel, those bearings may be pointed out. It is true that some newspapers, and also one or two works of a less ephemeral character, do occasionally admit articles in favour of phrenological—one, whose pages shall constitute a permanent depository of facts, and which shall be open for the expression of opinions and the recard of principles connects. stitute a permanent depository of facts, and which shall be open for the expression of opinions and the record of principles connected with those facts, is now needed; and a every case, be mid. strong feeling of this necessity, together with wanded, and will meet with encouragement Waldie, 46 Carpenter-street, Philadelphia, and support, his induced the publisher to and communications for the work to the Entpresent the prospectus of "The American Ton of the Am. Phren. Jour., care of A. Phrenological Journal and Miscellang."

The object of this work will be to preserve from oblision the most interesting the very numerous facts, confirmatory and containing it to the publisher, the work wil illustrative of the truth of phrenology; to be sent for one year. show the true bearings of this science on Elucation, (physical, intellectual, and moral) on the Medical Treatment of the Insent; on Juriprudence; on Theology, and on the Medical Control of the Insent; on Juriprudence; on Theology, and on the Control of the Insent; on Juriprudence; on Theology, and on the Insent the In Montal and Moral Philosophy. On all these subjects there is encouragement to hope for contributions from several note pens; while contributions from several note pens; while not become the subject of the several pensal for the several pensal pe the resources of the editor himself will not, it is hoped, be found inconsiderable.

The religious character of the work will be decidedly evangetical: for one prominent object in giving it existence is, to wrest Parenology out of the hands of those, who, in ignorance of its true nature and tendencies, suppose that they find in it an instruwhich to subvert the truths of revealed religion, and loosen the bonds of hu-man accountability, and moral obligation.-A frequent sueject of discussion in our pages will tierefore be. The Harmony between the truthe of Revelation and those of Phrenology. And on the subject of the religious bearings of our science we respectfully solicit the enquiries and objections, not of cavillers, but truly cindid, and the conscientiously feufal. Such correspondents we shall always welcome to our pages, and they will personal estate of Jonathan Sappington, late always be treated with kindness; as, also, of Anne-Arundel county, deceased. All ways welcome to our pages, and they will will honest and respectful objectors to Phreand the ignorant pretender, who seeks to overthrow a science which he will not be at the puns to investigate, may expect a megit-

As our object is the establishment of Thern, we solicit the communication of facts which are supposed to militate against Phrenology; and we pledge ourselves to publish them, in all cases in which we have satisfactory vouchers for their genuineness; and in which all the facts in the several cases are furnished to us. But as we must form our own judgment of the cerebral developement ON application by petition of Alexander own judgment of the cerebral developement in all cases on which we express our opini- Testament of John Claytor, late of Anne-Athese instances, the opinions of non-phrenothese instances, the opinions of non-phrenological or anti-phrenological writers, as to
tors to exhibit their claims against the said tive to foreign, domestic and lecal markets, and the getors to exhibit their claims against the said invested for trade, full and satisfactory. developed—we must, in every such case, see once in each week, for the spice of six sucthe head or skull, or the cast of it, properly cessive weeks, in one of the newspapers

certified to be true to nature.

Original Essays on Phrenological subjects will form part of the Journal; as also, Reviews of Phrenological and Anti-Phrenological works: now shall we fail to present to our readers such matters of interest and imour realers such matters of interest and importance as may be found in foreign Phreno-logical works of standard excellence, and which are not generally accessible to the American public. Our racers we pledge ourselves shall be bona-fide such; and, as often as pra treathe, we small accompany our deas pra ticapic, we shart action pair of a scriptions with illustrative cuts: indeed, we intend and expect that scarcely a number will be issued without two ar more such cuts. To entourage Phrenologists of talent (and especially professional men who are Phreno-

logists.) to enrich the work with their contributions, we offer for accepted matter, as liberal a compensation per printed page, as is usually afforded by the very first periodisusually afforded by the very first periodicals in our country, but the editor does not promise to endorse all which his correspondents may communicate; nor all which he may admit into the work. To error, it serious, and especially if it effect the interests of morality and religion, he claims the right of correction, in the form of reply, or of the suppression of the objectionable matter; and communications for which compensation is communications for which compensation is

tions: from a desire to his want to promul-gate truth... Hence should a large substrip-tion list be obtained, a considerable proper-This a remarkable fact, that while the continuous true, have, within a few years, most astonishingly multiplied, there dues not exit on the American continent a single periodical whose object is to advocate its truths, repel the attacks made upon it, or answer, the enquiries which even candid persons are disputed.

A T a Convention which most at Halting on the 11th of Peccenter last, compared of a great number of gentlemen from their public services, natriotism, and practical intelligence, the following resolutions were unanimously adopted?

Resolved, That it is the deliberate opinion for the convention that Silk may be served.

of this Convention that Silk may be grown in all the United States, not only for dence. silken goods.

Resolved, That a National Silk Journal

ought to be established under the auspices of the Executive Committee, and all the funds over and above the support of said paper the silk cause in the United States. Under the latter resolution, J. S. SRIBERE,

postmaster, of Baltimore, was invited to become the editor of the work, and has consented to do so-su far as may be consistent with the strict performance of his public du-

In the course of the discussions which took which have been encountered, and which of the silk culture, as a great branch of A merican industry, were fully considered; and the result was an universal conviction that may be grown in the United States, not on article of commercial export. The seita-bleness of our soil and climate to the growth and health of the worm, and the trees which supply its food; the capabilities, the habits and the genius of our people for conducting the business through its whole process, and the price of American labour as compared with that of silk-producing countries, all were fully canvassed, and the most sceptical became satisfied. The fact is, that our unrestrained freedom in the entertainment and discussion of various and discordant doctrines, religious and political, has imparted to us, as to our English ancestry, an ownerous appetite for knowledge, and a capati ty to learn in a few years what cannot be an and routine of thought and of action! The has it happened in manufactures as in other things; American ingenuity, unrestrained by ties apparently insurmountable! How long, be with silk. The only question is as to how long it shall take us? With a monthly jour-Reg. Wills, A. A. County.
