AMERICAN PHRENOLOGICAL JOURNAL & MISCELLANY.

IT is a remarkable fact, that while the converts to the belief that Phrenology is whose object is to advocate its truths, repel the attacks made upon it, or answer the enquiries which even candid persons are dis-posed to make concerning it. And this is the more surprising since the materials al-Youly existing and daily augmenting, with which to enrich such a publication, are almost inexhaustible.

The science of medicine has its appropriate media through which to present to the profession and to students all the new facts divinity, and law, there is no publication through which, as the appropriate channel, those bearings may be pointed out. It is true that some newspapers, and also one or two works of a less ephemeral character, do occasionally admit articles in favoar of phrenology: but these do not meet the present nevance; and for the same reason, subscriptions cossity. A periodical which is avowedly will be liveriably required in Advance. To meet the public demands, we have published a new edition of our first fact. To meet the public termands, or a supply its 1000, the translation of our four first volumes, and the genius of our people for conducting which may be had, stitched, at 50 cents per the business through its whole process, and the price of American laboust as compared with that of siik-producing countries, all were fully canvassed, and the most sceptical became satisfied. The fact is, that our unrestrained freedom in the entertainment and discussion of various and discordant doctrines, religious and political, has imparted to us, as to our English ancestry, an omniverous appetite for knowledge, and a capacity to learn in a few years what cannot be acquired in ages, where all is dull conformity and routine of thought and of action! Thus dle was put in motion before Yankee 'Low-ells' were sold at a profit in China? So willit be with silk. The only question is as to how long it shall take us? With a monthly journal to concentrate and diffuse every ray of floating light on the subject, it was the opinion of the Convention that we may realize and enjoy, in our own day, the boon which indolence and want of concert may procras-tinate, but which nothing short of Turkish
