AMERICAN PHRENOLOGICAL JOURNAL & MISCELLANY.

T is a remarkable fact, that while the converts to the belief that Phrenology is true, have, within a few years, most astonishingly multiplied, there does not exist on the attacks made upon it, or answer the en- multiplied. quiries which even candid persons are dis-posed to make concerning it. And this is the more surprising since the materials already existing and daily augmenting, with which to enrich such a publication, are al-

most inexhaustible.

The science of medicine has its appropri ate media through which to present to the profession and to students all the new facts which come and all the new facts which come are not all the new facts which come and all the new facts which come are not all the new facts which is not all the new facts which occur, and all the new theories which are advocated in the various institutions of medical science throughout the world; and it is proper that it should be so. The same it is proper that it should be so. The same is true of the other leading professions of law and of divinity. But, notwithstanding the important bearings which phrenologists know their science to have on medicine, and divinity, and law, there is no publication through which, as the appropriate channel, those bearings may be pointed out. It is true that some newspapers, and also one or two works of a less ephemeral character, do (eurrent in Philadelphia or New York) for IHREE copies, or \$10 (current as above) for seven copies sent to one address. To Clergymen and Theological Students, single copies will be furnished at \$1 50 per annum; and to companies of eight or more of such, it will be reduced to \$1 25 per copy, if sent to one address, and the subscription forwarded to the publisher free of expense.

N. B. As funds are already densited for two works of a less ephemeral character, do eccasionally admit articles in favour of phrenology: but these do not meet the present necessity. A periodical which is avowedly whrendegical—one, whose pages shall constitute a permanent depository of facts, and which shall be open for the expression of opinions and the record of principles connectd with there facts, is now needed; and a strong feeling of this necessity, together with a belief that such a wor's is extensively dewanded, and will meet with a couragement and support, has induced the publisher to present the prospectus of "The American Phrenological Journal and Miscellung."

The object of this work will be to prethe very numerous facts, confirmatory and illustrative of the truth of phrenology; to show the true bearings of this science on Education, (physical, intellectual, and moral;) on the Medical Treatment of the Inral;) on the Medical Treatment of the In-sane; on Juriprudence; on Theology, and on Mental and Moral Philosophy. On all these subjects there is encouragement to hope for contributions from several able pens; while the resources of the editor himself will not, it is hoped, be found inconsiderable-

The religious character of the work wil be decidedly evangelical: for one prominent object in giving it existence is, to wrest Phrenology out of the hands of those, who, in ignorance of its true nature and tenden sies, suppose that they find in it an instruwhich to subvert the truths of rewealed religion, and loosen the bonds of hu-man accountability, and moral obligation.— A frequent subject of discussion in our pages will therefore be, The Harmony between the mensurate with the utility of the enterprise.

It seems to be a matter of general surprise that the And on the subject of the religious bearings of our science we respectfully selicit the enquiries and objections, not of cavillers, but of the truly candid, and the conscientiously ways welcome to our pages, and they will always be treated with kindness; as, also, will honest and respectful objectors to Dbo will honest and respectful objectors to Phre-mology. But the captions and cavillers will ensure to themselves our silent contempt; and the ignorant pretender, who seeks to the pains to investigate, may expect a merit

As our object is the establishment of TRUTH, we solicit the communication of facts which are supposed to militate against Phrenology; and we pledge ourselves to publish them, in all cases in which we have satisfactory vouchers for their genuineness; and in which all the facts in the several cases are furnished to us. But as we must form our own judgment of the cerebral development cases on which we express our opinions, it is obvious that we cannot receive, in these instances, the opinions of non-phreno logical or anti-phrenological writers, as to the degree in which the several organs are developed—we must, in every such case, see
the heal or skull, or s cast of it, properly
initial of the war. It will be insued as even a con-

logists,) to enrich the work with their con-tributions, we effer for accepted matter, as The following papers will each insert the The following papers will each insert the lished in Anne-Arundel county, once a week above, to the amount of \$5—forward one is usually aborded by the very first periodicals in our country; but the editor does not promise to endorse all which his correspondents may communicate; nor all which he burg Whig; fluntsville —; Lexington Obmay admit into the work. PROSPECTUS. The undersigned proposes to publish a Wookl Newspaper in the Village of Leonard-Town, S Mary's County, Maryland, to be entitled TIIE

LEONARD-TOWN HERALD.

August 23.

And Saint Mary's and Charles Counties Ad-

vertiser. In presenting to the public the design of publishin

venerable county of Saint-Mary's, and forming too, as important part of the State of Maryland, should have ed so long destitute of a paper printed and pub

The projector of the proposed useful undertaking, confident of a liberal support from an enlightened and generous public, has issued this Prospectus, with the chief intention of devoting himself to usefulness—increasing, as far as his kumble means will permit, the verthrow a science which he will not be at general stock of information, and enlarging the sphere of useful knowledge.

The Herald will be conducted on a neutral principl politics, whether of a general or local charactersonal excitement or bad feeling in the community will be faithfully and strictly guarded against by the pro-

ses. A faithful account of the current intelligence (whether of a foreign or domestic nature) will be laid

may admit into the work. To error, if serious, and especially if it affect the interests of morality and religion, he claims the right of correction, in the form of reply, or of the suppression of the objectionable matter; and communications for which compensation is expected, must be so prepared as to be fit for the public eye.

In conclusion, we may be allowed to say, that the pecuniary value of each number work is patronised. It is not with the de-

LEPORTARY TO PRESCREE.

A NEW PATENT IMPROVED PORTABLE HORSE POW-BR'AND THRESHING MACHINE.

H18 Horse Power will propel Threshing Machines, Clover Mills, Small Grist

The subscriber takes this method of informing the public, that he will be prepared to supply all orders at the shortest notice. The superiority over other machines, contists in ease of operation, durability and simplicity. Being constructed principally of iron, both Horse Power and Thresher, the bearings being surrounded with oil cups, which retain oil sufficient for one day, withwhich retain oil sumceent for one day, witn-out replenishing, supercedes the necessity of hourly application of oil, which renders oth-er machinery so liable to injury from neglect and hazardous to those who superintend them, consequently produced by applying oil during the operation, or from neglect of its mechanical construction. The vertical and horizontal hearings are supplied with oil by mechanical construction. The vertical and horizontal bearings are supplied with oil by nutrition and capillary which is a great saving of oil, and prevents them from becoming dry and injuring the machine, which is so detrimental to other machinery. The Horse Power occupies the space of 3 feet by 3 feet 6 inches, which contains the moving machinery. This machine will thresh all kinds of grain; it also answers the purpose of cleaning clover seed, and with my late improvement is far superior to my former machines. There can be certificates produmachines. There can be certificates produmachines. There can be certificates produ-ced where they have hulled at the rate of the result was an universal conviction that one bushel of clover seed per hour for nine

This machine can be transported in a common cart or wagen, without any inconveni-ence. A further description is deemed unnecessary, as those who would wish to pur-chase, will call and examine for themselves. The subscriber has constantly on hand the above described machines, at his manufactory, in Brandywine Village, Del. where orders will be received and the machines sen to any part of the neighbouring States. Hundreds of certificates can be produced that it is superior to any thing of the kind they ave yet seen.

SEL PLOUBRAGE AMERICAN SILK SOCIETY

RURAL BEOMOMIST.

A Convention which met at Baltimore on the 11th of December last, composed of a great number of gentlemen from various parts of the Union, distinguished for their public services, patriotism, and practical intelligence, the fallowing resolutions were unanimously adopted:

Resolved, That it is the deliberate opinion of this Convention that Silk may be grown in all the United States, not only for domestic purposes, but as a valuable article of commercial export—thereby giving an active employment to American labour and active employment to American labour 18 and 18 an

mercial export—thereby giving an active em-ployment to American labour, and retaining millions of dollars in our country, that are annually sent out of it for the purchase of

silken goods.

Resolved, That a National Silk Journa ought to be established under the auspices of the Executive Committee, and all the funds over and above the support of said paper ought to be devoted to the advancement of the silk cause in the United States.

Under the latter resolution, J. S. SKINNER postmaster, of Baltimore, was invited to be come the editor of the work, and has con sented to do so-so far as may be consistent with the strict performance of his public duin the course of the discussions which tool

place in the Convention, all the difficulties which have been encountered, and which may yet be apprehended, in the prosecution of the silk culture, as a great branch of Anow, in the words of the resolution, Sill may be grown in the United States, not on ly for domestic purposes, but as a valuable article of commercial export. The suitableness of our soil and climate to the growth and health of the worm, and the trees which supply its food; the capabilities, the habits, and the genius of our people for conducting the business through its whole process, and the price of American labour as compared the price of Amer with that of silk-producing countries, all sity. The Post and Transcript will therefore advectal were fully canvassed, and the most sceptical the adoption of the Independent Treasury System, as a became satisfied. The fact is, that our unrestrained freedom in the entertainment and discussion of various and discordant doc-References to the superiority of this machine may be had in the surrounding counties of Philadelphia, Montgomery, Berks, Lancaster, Chester and Delaware, Pa.; News, Castle, Kent and Sussex, Del.; Cecil, Kent, Queen-Anne's, Talbot, Dorchester, Anne-and routine of thought and of action! Thus Arundel and Harford, Md.; Salem, Cumber-land, Gloucester, Burlington, Monmouth, Mercer and Middlesex, in New Jersey.

JESSE URMY.

P. S. Corp Shelters and Country of thought and of action! Thus has it happened in manufactures as in other things; American ingenuity, unrestrained by prejudice or law, has triumphed over difficulties apparently incompany to the conformity and routine of thought and of action! Thus In presenting to the public the design of publishing a paper at Leonard-Town, it will only be necessary briefly 12 explain the plan to be adopted, and the principles to be pursued, in its course of publication; and impressed with the belief it will be approved by the thinking portion of the community, he does not for a mement doubt they will yield him a patronage community with the willing of the approved wine, near Wilmington.

A REAL BLESSING TO MOTHERS.

A REAL BLESSING TO ANOTHERS.

Dr. Wr. Essand Celebrated Soothing Syrup, for Children Cutting their Tethe
This infallible remody has preserved hundreds of
children, when thought past recovery, from convultions. As soon as the Syrup is rubbed on the game,
the child will recover. This preparation is so innocent,
so efficacions, and so pleasant, had no child will refine to let its guara be rubbed with it. When infants fuse to let its junts be rubbed with it. When infants are at the age of four months, though there is no apparatus of spoth, one bottle of the Syrap eleval be used on the guns, to open the poros. Parents should move be without the Syrap in the insurency where there are young children; for if a child wakes in the night with pain in the guns, the Syrap immediately gives can by opening the pores and healing the guns; thereby preventing Convisions, Fevers, &c.

[[Pronf Positive of the Efficacy of the Efficacy

Preventing Convilsions, Fevera, &c.

(P Proof) Positive of the Efficacy of Dr. Evans' Soothing Syrup.

To the Agent of Dr. Evans' Soothing Syrup:

To the Agent of Dr. Evans' Soothing Syrup:

Dear Sir—The great brooks afforded to my suffering infah, by your Soothing Syrup, in a case of protracted and pain fall dentition, must convince every feeling parent less essential an early application of such an invaluable incidents is to relieve infant misery ampterture. My infant, while tecthing, experienced sufferings, that it was attacked with convulsions, and my wife and asmily supposed that death while foom release the bale from sugulat till, we presented a bitle of your Syrup; which as so m as applied to the gisse a wonderful change was pandaced, and after a flow applications the child displayed obve us relief, and by positiveing in its use, I am gled to inform you, the child has completely recovered and no recurrence of that avail complaint harsince occurred, the teeth are contacting daily and the child enjoys perfect health. I give you my cheerful permission to make this acknowledgenest public, and will gladly give any information on this circumstance.

WM. JOHNSON.

I' A gentleman who has made trial of Dr. W. Errar' Soothing Syrup in his family life case of a teething child, wishes us to state that he found it entirely of fectual in relieving pain in the gusta, and preventing the consequences which semestime follow. We cheerfully comply, with his request.—N. York Sun.

I' We believe it is generally asknowledged by those who have tried it, that the Soothing Byrup for Children Cutting Teeth, advertised in another column, is a highly useful article for the purposes for which it is intended llighly respectable persona, at any rate, who have made use of it, do not heatstote to give its virtues the sanction of their names.—Bester Trueeller.

(I' A SEVERE CASE OF TEETH-ING, WPTH SUMMER COMPLAINT, cared by the infallible American Soothing Syrup of

(IT A SEVERE CASE OF TEETII-ING, WPTH SUMMER COMPLAINT, cared by the infallible American Soothing Syrup of Dr. W. Evens., Mrs. McFhersen, residing at No. 8, Madison street, called a few days siece at the medical effect of Dr. W. Evens., 100 Chatham street, N. Y. and purchased a bottle of the Syrup for her child, whe was suffering accruciating paid during the process of ientities, being momentarily threatened with convulcious, its bowels too were exceedingly loose, and no food could be retained on the slomach. Almost immediately on its application, the slarming symptoms entirely cossed, and by continuing the use of the syrup on the gume, the bowels in a short time became quite asteral. As a tribute of gratitude for the benefit afforded the child, the mother learne of her own accord, and freely schetched publicity to the above. Pray be puticular in applying at 100 Chatham street, as there are several counterfeits advertised. No other place in the city has the genuine for sale.

ET IMPORTANT TO MOTHERS.—Children generally suffer much uncasiness from cutting their teeth. Whatever dangerous or fatal symptoms sitend this process of nature, they are produced invariably from the highly irritated and inflamed condition of the part—therefore the principal indications of cure are to abate the inflammation, and to scoften, soothe, and relax the guer. If that is effected, the infant is preserved from subsequent fever, inflammation, spasmodic cough, twiching of tendons, croup, canker, and convulsions, displaying their fatal consequences. If mothers, nurses, or guardians have their babes tortured with painful and protracted dentition, and this notice attracts their stream of the part of the convenience of the part of the convenience of the painful and protracted dentition, and this notice attracts their stream of the part of the painful and protracted dentition, and this notice attracts their stream of the painful and protracted dentition, and the notice attracts their stream of the painful and protracted dentition, and the n ING. WITH SUMMER COMPLAINT,

ea, or guardians have their babes tortured with painful and protracted dentities, and this notice attracts their attention, they should not be deterred from purchasing a bottle of EVANS SOOTHING SYRUP for Children Teething, the incomparable virtue of which in completely relieving the most distressing cases (when applied to the infant's gume as directed) is invaluable. The remedy has restored thousands of children when on the werge of the grave, to the embraces again of their distracted parents, attacked with that awful and mortiferous malady—Cogyvalsions.

DAR ECTIONS.

ferous maindy—Cogvulsions.

DIRECTIONS.

DIP Please shale the bottls when first opened.

When children begin to be in pain with their teeth shooting in their glams, put a little of the Syrup in a tea speen, and wigh the finger let the child's gums be railed for two or three minutes, three times a day. It men not be put to the breast immediately. For the milk would take the spun off too soon. When the teeth are just coming through their gums, mothers should immediately apply the syrup; it will prevent the children having a fover, and indergoing that painful operation of lancing the guns, which always makes the next tooth much harder to come they and sometimes canced eath. Sold at Dr. W. Evans' Office, 100 Chatham street, Mey York; and by all his Agents throughout the Union.
