**MYNENEAL.**  
Married, at Richmond, on the 10th inst. by the Rev. Thos. Crowder, Mr. PINKNEY PARTRICK, formerly of Anne-Arundel county, Maryland, to Miss ANNE ELIZABETH SMITH, of Richmond, Va.

**ATTENTION, ANAPOLIS GREATS!**  
YOU are hereby ordered to appear at your usual Parade Ground, State House Hill, on SATURDAY, the 19th inst. at 3 o'clock, P. M. in full winter dress, with arms and accoutrements in soldier like order.

**WILLIAM DAWES, O. S.**  
October 17.

**TO THE PUBLIC.**  
THE subscriber respectfully informs the public, that his MILL is now in operation, being constructed on the latest and most improved plan, under the care of an experienced and competent man. In the course of a short time he expects to employ a person who has as perfect a knowledge of the business as any in the country. The most strict attention will be paid to those who patronize him. He respectfully solicits a share of public patronage.

**Mr. and Mrs. S. F. STREETER'S**  
Boarding and Day School for Young Ladies,  
SARATOGA STREET, BALTIMORE.

**Mrs. S. F. STREETER** has the honor to announce that she has opened a Boarding and Day School for Young Ladies, on Saratoga Street, Baltimore, on the first Monday in September next. She is desirous of raising the standard of attainment in all that contributes to elevate the female character and prepare young ladies for the various duties of domestic life, and the various relations of social and domestic life. The principals will employ every resource within their reach for cultivating the mind, elevating the feelings and polishing the manners of their pupils. Regarding education, not as an end, as to acquire a few scraps of knowledge, but as a means to the formation of a sound intellectual and moral character, and their grand aim will be to present knowledge in so attractive a light and to render its acquisition so agreeable, as to excite a desire for improvement which will continue after the relations of mere school life have been dissolved, and the pupils have entered on the higher and wider school of human life.

**Mr. and Mrs. STREETER** respectfully announce that they will resume the care of the Boarding Department in the Institution formerly under the care of Mr. & Mrs. Hamilton, in Saratoga Street, Baltimore, on the first Monday in September next.

**A LIST OF LETTERS**

REMAINING in the Post Office, Annapolis, Md. on the 20th of September, 1839.

Persons inquiring for letters in this list will please say they are advertised, they will be otherwise to be forwarded.

Mr. Sarah Ann Chaney, Leonida Coates, Henry Coates, Capt. Barlas Clark, Philip Clayton, [2]

Henrietta Davis, Francis Davis, Mrs. Lucy Downing, Mrs. R. Drake, John R. Drake, James Frabeger, Miss M. T. Garner, Capt. Lewis Gardner, G. W. Hughes, [2]

J. C. A. Hobby, [2] H. Hoopes, H. Hoopes, David R. Harland, James Hines, Ellen Holladay, John W. Hammond, Mariah Jacobs, Dorsey Jacobs, Mary A. Johnson, William Kerchner, G. Munroe, McKeaney, G. Munroe, Capt. H. B. Nones, John Norris, Wm. Otis, [2]

Dr. Jas. H. Owings, Edward Pendleton, True Putney, Allen Quinn, G. Robinson, Fleming Robinson, Hicks Root, Samuel Snider, Harriet A. Sanders, Ann M. Shorter, C. G. Slemaker, Charles Stewart, Wm. Stewart, Thos. Sherbert, O. M. Taylor, E. T. Tucker, S. L. Walker, B. S. B. Worthington, Dr. C. Worthington, Alexander Wilson, [2]

Thos. Webster, Catharine P. Welch, Leonard Welch, Richard Yedlhall, F. Zerriast, [3] R. J. CRABB, P. M. October 2.

**STATE LIBRARY,**  
Annapolis, September 7th, 1839.

In pursuance of a Resolution of the General Assembly, Notice is hereby given, That sealed proposals, with accompanying samples, will be received at this office, until Saturday, the 12th day of October next, for furnishing the

**STATIONARY, &c.**  
mentioned in the annexed list, for the use of the Legislative and Executive Departments of this State for the year 1840.

**D. RIDGELY, Librarian.**

**List of Articles wanted.**

10 reams of Folio Post Paper, of good quality.  
120 do Quarto Post, white, blue and gilt, some ruled, and of different qualities.  
6 do Foolscap, good, ruled.  
2 do Demi do  
10 do Envelope do  
6000 best Quills.  
4 gross best Metallic Pens, small size, with 2 gross Handles.  
2 do best Metallic Pens, large do. and one gross Handles.  
3 dozen Quat Bibles best Black Ink.  
4 gross Terry's Japan Ink.  
4 do Blue Writing Fluid.  
25 lbs. best Red Sealing Wax.  
25 lbs. best Red Wafers.  
2 gross Red Tape.  
1 do Sail Needles.  
1 do Ivory Letter Folders.  
1 do Letter Seals, cased wood.  
6 dozen Ink Holders, small size.  
6 do Sand do  
6 do Water do  
1 gross Blue Pasteboards.

**SI00 REWARD.**  
RAN AWAY from the subscribers' Farm Duden, in Anne-Arundel county, a Negro Boy called

**DICK SPARROW,**  
dark skin, and not very tall though well set; he is about 18 or 19 years old. I will give Fifty Dollars if taken in Anne-Arundel county, or in the city of county of Baltimore, and One Hundred Dollars if taken elsewhere.

**R. S. STEUART.**

**A NEW THEORY**

INTERESTING AND APPLICABLE TO THE AFFLICTED WITH

"Diseases of the Stomach, &c. Nervous System, Such as DYSPEPSIA, either Chronic or Acute, under the worst symptoms of restlessness; Lowness of Spirits, and General Emaciation; Consumption, whether of the Lung or Liver; Liver Affections; Jaundice; both Biliary and Spasmodic; Colicness; Worms of a very variety; Rheumatism, whether Acute or Chronic; together with Gout, Sciatica, Pains in the Head, Back, Limbs, and Side, Typhus Fever, Scurvy, Putrid Sore Throat, Fever and Ague, Spasmodic Palpitation of the Heart and Arteries, Nervous Irritability, Nervous Weakness, Hysteria, Tic Douloureux, Cramps, Female Obstructions, Heartburn, Headache, Cough, the Common or Humid, and the Dry or the Whooping; Asthma, Gravel, and Dropsy.

The Blood has hitherto been considered by Empiricks and others, as the great regulator of the human system, and much in the derivation of the ailments to that erroneous doctrine, that the content themselves with the simple possession of this fallacious opinion, without enquiring into the primary sources from whence Life, Health, and vigour emanate, and the various pains, sickness, disease and death. Not so with Dr. Hunt's extensive research and practical experience so eminently qualify him for the profession of which he has been one of the most useful members. He contents—and a moment's reflection will convince any reasoning mind of the correctness of his view—that the stomach, liver, and the associated organs are the primary and great regulators of health, and that the blood in very many instances is dependent on these organs, and that unless medicine reaches THE ROOT OF THE DISEASE, the perfect cure is usually prescribed, save but as fails to cover the ravages of deep-seated maladies. Under these convictions, at the expense of close application, the doctor has discovered a medicine whose searching powers are irresistible, and in prescribing it, is with a knowledge of its being a radical cure in the various diseases already enumerated, even if applied in the most critical cases; but he does not pretend to ascribe to

**HUNT'S PILLS**  
a supernatural agency, although from positive proofs within the knowledge of hundreds, he is prepared to show, that when every other earthly remedy has been given up.

**HUNT'S PILLS**  
have never been known to fail in effecting two very gratifying results, that of raising the level of sickly and languid spirits, and of curing the most obstinate cases of Chlorosis, or Green Sickness, and thus amply rewarding Dr. Hunt for his long and anxious study to attain this perfection in the HALLAZO AAR.

**DR. HUNT'S PILLS.**  
In the midst of a general and in many instances not unfounded prejudice against many of the medical remedies of the day, Dr. Hunt's Pills have the enviable distinction of universal approbation. They are perhaps the only medicine publicly advertised, which has the full and unreserved testimony of medical men in its favour, if not the only one which gives full satisfaction to its purchasers. Dr. Hunt has the satisfaction of knowing, that his Pills are not only recommended and prescribed by the most experienced physicians, but also taken by those gentlemen themselves, whenever they feel the symptoms of those diseases in which they well know them to be efficacious. He knows this to be generally the case in New York, Philadelphia, Albany, Boston, and in the various cities and towns, where he has resided. That should thus conquer professional prejudice and interested opposition, and secure the agency of the most eminent and best informed physicians in the country to render them useful to all classes, can be fairly ascribed to their undeniable and preeminent virtues.

Enviably however, as this distinction is, it can easily be accounted for from the intrinsic and peculiar properties of the medicine itself. It does not pretend to do much, and it accomplishes all it promises. Dr. Hunt does not pretend, for instance, that his Pills will cure all diseases by merely purifying the blood; but he certainly does pretend, and has the authority of daily proofs for positively asserting that these medicines, taken in the manner directed, will cure a great variety of the diseases of the stomach, the lungs, & the liver, by the impurity of the blood is occasioned. The blood is made from the contents of the stomach; has its red colour and vitality given to it by the action of the lungs, and so it performs its duty in circulating through the veins and arteries like its yellow or bilious excrement, which may be termed its refuse or worn out sediment, collected and discharged by the liver. These viscera, then, are the anatomical mechanism or apparatus by which the blood is manufactured and prepared; and it is therefore obvious that the state of these should be the first consideration of the physician. Now there are various causes that will affect and derange these organs, with which the blood has nothing whatever to do. Thus the stomach may be deranged by indigestion, by a fright, grief, disappointment, heat of the weather, or any other nervous action, and be wholly unable to digest its food. Is the blood to blame for this? A nervous action of long continuance will produce settled dyspepsia, with headache, bile, ment, and physical and mental depression, and it is not the blood to blame for this? Intemperance, by inflaming the coats of the stomach, and leaving it in flaccid prostrate weakness, and an undue quantity and continuance of purgative medicines, by producing a morbid action, will cure a great variety of the diseases of the stomach, the lungs, & the liver, by the impurity of the blood is occasioned. The blood is made from the contents of the stomach; has its red colour and vitality given to it by the action of the lungs, and so it performs its duty in circulating through the veins and arteries like its yellow or bilious excrement, which may be termed its refuse or worn out sediment, collected and discharged by the liver. These viscera, then, are the anatomical mechanism or apparatus by which the blood is manufactured and prepared; and it is therefore obvious that the state of these should be the first consideration of the physician. Now there are various causes that will affect and derange these organs, with which the blood has nothing whatever to do. Thus the stomach may be deranged by indigestion, by a fright, grief, disappointment, heat of the weather, or any other nervous action, and be wholly unable to digest its food. Is the blood to blame for this? A nervous action of long continuance will produce settled dyspepsia, with headache, bile, ment, and physical and mental depression, and it is not the blood to blame for this? Intemperance, by inflaming the coats of the stomach, and leaving it in flaccid prostrate weakness, and an undue quantity and continuance of purgative medicines, by producing a morbid action, will cure a great variety of the diseases of the stomach, the lungs, & the liver, by the impurity of the blood is occasioned. The blood is made from the contents of the stomach; has its red colour and vitality given to it by the action of the lungs, and so it performs its duty in circulating through the veins and arteries like its yellow or bilious excrement, which may be termed its refuse or worn out sediment, collected and discharged by the liver. These viscera, then, are the anatomical mechanism or apparatus by which the blood is manufactured and prepared; and it is therefore obvious that the state of these should be the first consideration of the physician.
