THE BOSTON NOTION.

We have received a copy of an immense sheet, bearing the above title; it is probably, and the editor asserts positively, the largest newspape in the world. 'The "Notion" is issued, weekly from the office of the Daily Times at the low price of three dollars per annum, and contains of course all the news of the day; indeed we should think it necessary to manufacture a little. to supply such an enormous demand for "copy," as must be continually rung in the cars of the presiding genius. The paper is quite unique in appearance, and is embellished in all its important departments, with very appropriate emble-matic cuts. One, over the list of obituary notices, we think particularly happy. It repre sents the shell of the chrysalis upon a leaf-of taken from Virginia until the debt is settled. the multicaulis we suppose—from which the butterfly has just escaped, and is taking its flight upwards into a ray of light from above. The cut over the literary notices is also excellent.

Should any of our readers desire an excellent family newspaper from the city of Boston we feel a confidence in commending to their notice for once, a Yankoe "Notion."—Balt. Post.

THE MOBILE FIRES.

The Southern Mail, of this morning, brings us nothing further direct from Mobile.

From letters published in the Charleston pa pers, we find a full corroboration of the reported fire on the night of the 8th. One letter says the fire was discovered to have commenced at the Mansion House, from which it soon extended to the new Hotel on the South and the Planter's & Merchant's Bank on the North. These three fine buildings are now a pile of ruins. From the new Hotel, the flames were communicated to the office opposite, on the west side of Royal street, which was consumed, together has probably destroy meunt in value. The books and papers of the llank were saved—the money was in the vault and it is said is safe. The Post Office was kept in the basement story of the mansion house.

In the fire on the night of the 7th inst. the Episcopal and the small Catholic Churches were destroyed.

MORE FIRES AT NORFOLK.

We have received a slip from Notfolk Herald dated yesterday, 3 p. m. containing accounts of State, thus making 10 majority greater in this to me; but if they decline ascending, detain two fires in that borough. The first was in the smithery, attached to the Coach Factory of House, the democrats number 49 and Whigs 23 Messrs. Mayer & Cormley, on Union street. The timely arrived of the firemen, and their active exertioner soon got the fire under, withou its doing material injury to the adjoining buildings. This fire occurred on Thursday night On Eriday morning as the firemen were return Union street, next door to the Farmer's Bank, flames, but the fire was soon put out.

The kidnapped boys, Hassard and Francis nave both been restored to their parents. The kidnappers, we learn, were not surrendered by the Executive of Virginia, to the officers who went from Worcester with a requisition from Gov. Everett. This refusal to surrender the criminals did not spring from a desire to screen them from the punishment, but was caused by legal restraints. They must first be tried for tidnapping the boys under the laws of Virginia. The Court before which they will be tried, does not sit until December. One of them, too, has been arrested on a civil process, and cannot be

The re-discovery of the Aurora Islands by the New York Exploring Expedition creates considerable interest here, and it appears incredible that six Islands in the longitude of Ric lanciro and latitude 53 deg. 21 min. should have remained to this period, when so many navigators have cruised expressly for them without being known.

They were originally discovered in 1769, ince when months have been spent in search ing for them in vain, and they have been excluded from the latest charts.
