AMERICAN PHRENOLOGICAL JOURNAL & MISCELLANY.

nishingly multiplied, there does not exist on scribers. More fraquent illustrations and the attacks made upon it, or answer the enquiries which even candid persons are disposed to make concerning it. And this is the more surprising since the materials already existing and daily augmenting, with and Miscellany will be issued morthly, comment to enrich such a publication, are almost inexhaustible.

The science of medicine has its appropri-The science of medicine has its appropriate media through which to present to the profession and to students all the new facts which occur, and all the new theories which are advocated in the various institutions of are advocated in the various institutions of it is proper that it should be so. is true of the other leading professions of law and of divinity. But, notwithstanding the important bearings which phrenologists know their science to have on medicine, and divinity, and law, there is no publication which, as the appropriate channel, those bearings may be pointed out. It is true that some newspapers, and also one or two works of a less ephemeral character, do occasionally admit articles in favour of phrenology: but these do not meet the present nenotogy: out used to the distribution of the consisty. A periodical which is avowedly whrenotogical—one, whose pages shall constitute a permanent depository of facts, and the constitute of the constitution o which shall be open for the expression of o-pinions and the record of principles connect-ed with those facts, is now needed; and a strong feeling of this necessity, together with a belief that such a work is extensively deand support, has induced the publisher to present the prospectus of "The American Phrenological Journal and Miscellany."

The chief test this work will be the control of the Am. Phren. Jour., care of A. Walde.

The chief test this work will be the control of the Am. Phren. Jour., care of A. Walde.

The object of this work will be to preserve from oblivion the most interesting of the very numerous facts, confirmatory and illustrative of the truth of phrenology; to show the true bearings of this science on Education, (physical, intellectual, and morals) on the Medical Treatment of the Instant rais) on the Deaded Fred Members on Jurisprudence; on Theology, and on Mental and Moral Philosophy. On all these subjects there is encouragement to hope for subjects there is encouragement to hope for contributions from several able pens; while the resources of the editor himself will not, it is hoped, be found inconsiderable.

The religious character of the work will be decidedly evangelical: for one prominent object in giving it existence is, to wrest Phrenology out of the hands of those, who, In ignorance of its true nature and tenden-cies, suppose that they find in it an instru-ment by which to subvert the truths of re-vealed religion, and loosen the bonds of hu-man accountability, and moral obligation.— A frequent subject of discussion in our pages will therefore be, The Harmony between the truths of Revelation and those of Phrenology. And on the subject of the religious bearings of our science we respectfully solicit the enquiries and objections, not of cavillers, but of the truly candid, and the conscientiously fearful. Such correspondents we shall always welcome to our pages, and they will their talents, integrity and patriotism, always be treated with kindness; as, also,

The projector of the proposed use will honest and respectful objectors to Phre the pains to investigate, may expect a merit- of useful knowledge. ed rebuke.

nology; and we pledge ourselves to publish all cases in which we have satisfactory vouchers for their genuineness; and in which all the facts in the several cases are furnished to us. But as we must form our own judgment of the cerebral developement in all cases on which we express our opinions, it is obvious that we cannot receive, it these instances, the opinions of non-phreno-logical or anti-phrenological writers, as to the degree in which the several organs are the head or skull, or a cast of it, properly certified to be true to nature.

Fifty Cente will be charged if not paid before the exceptified to be true to nature.

Original Essays on Phrenological subjects will form part of the Journal; as also, Reviews of Phrenological and Anti-Phrenological works: nor shall we fail to present our readers such matters of interest and im-

signal works ince shall we fail to present the work in the present the part of the part of

sire or expectation of gain test it is offered to the community, but from moral considera-tions: from a desire to know and to promulgate truth. Hence should a large subscription list be obtained, a considerable propor I I is a remarkable fact, that while the con-verts to the belief that Phrenology is largement and improvement of the work, the American continent a single periodical embellishments will, in that case, be inserted, and the attractions of the work be thus

IMPORTANT TO FARMERS

A NEW PATENT IMPROVED PORTABLE HORSE POW-ER AND THRESHING

forming the public, that he will be prepared to supply all orders at the phortest notice.

The superiority over other machines, consists in case of operation, durability and simplicity.

Being constructed principally of this Convention that Silk may be grown in all the United States, not only for domestic purposes, but as a valuable of convention of the convention of th plicity. Being constructed principally of iron, both Horse Power and Thresher, the bearings being surrounded with oil cups, which retain oil sufficient for one day, without replenishing, supercedes the necessity of hourly application of oil, which renders other machinery so liable to injury from neglect.

In all the United States, not only for domestic purposes, but as a valuable article of committee purposes, but as a valuab and hazardous to those who superintend them, consequently produced by applying oil during the operation, or from neglect of its mechanical construction. The vertical and horizontal hearings are applied with all the finds of the superings are applied with all the silk cause in the Traines and above the support of said paper ought to be devoted to the adsancement of mechanical construction. The vertical and horizontal bearings are supplied with oil by nutrition and capillary which is a great saving of oil, and prevents them from becoming dry and injuring the emachine, which is so detrimental to other machinery. The Horse Power occupies the space of 3 feet by 3 feet 6 inches, which contains the maying machinery. This machine will thresh all kinds of grain; it also answers the pyrpose of cleaning clover seed, and with my late improvement is far superior to my former machines. There can be certificates produced where they have hulled at the rate of

chase, will call and examine for themselves. The subscriber has constantly, on hand the above described machines, at his manufactory, in Brandywine Village, Del. where ordera will be received and the machines sent to any part of the neighbouring States. Hun-dreds of certificates can be produced that it is superior to any thing of the kind they ave yet seen.

References to the superiority of this machine may be had in the surrounding coun-ties of Philadelphia, Montgomery, Berks, Lancaster, Chester and Delaware, Pa.; New Castle, Kent and Sussex, Del.; Cecil, Kent, Queen-Anne's, Talbol, Dorchester, Anne-Arundel and Harford Md.; Salem, Cumber-laud, Gloucester, Burlington, Monmouth, Mercer and Middlesex, in New Jersey. The Post and Transcript will be devoted to Politics, Commerce, Agriculture, Arts, Literature and Nous.

I. POLITICS.—The Post and Transcript will be the firm and undersating advecate of the dectrines of DENOCRATIC REPUBLICANISM, which constitute the fundacental elements of our social and political system. As this declaration imports, on the great question of Na. tional Politics, the paper sull be of the "strict con-structionist" school, maintaining that the action of Ga-vernment should be limited to the exercise of these powers which are specifically enumerated in the constiution. It will consequently oppose the measure those, who by a loose interpretation of this magna CHARTA of our liberties, seek the ostablishment at chemes subversive of the principles upon which the fair fabric of our government is reared, and which, un. fusion and anarchy from which no checked, tend to confusion and anarc relief can be found but in despotism.

Among these schemes, regarded as of obviously den erous tendency, is that of a National Bank, which lowever harmless or useful it might be in the full strength and unanimity of the republic, would, in a period of danger,—its branches penetrating every part of the country, and in the words of Jefferson, "acting pose serious and alarming obstacles to the operations of government.

The assumption of the right to impose a tariff torond the duties necessary to supply the constitutional wants of government; the appropriation of the public money upon schemes of internal improvement, and the interference of government with the domestic institutions of the States, particularly with the institution of Slavery, will be equally opposed as encroachments upon the constitution and upon the rights of States.

The liability of the Banks to periodical convulsions and their inability to comply, at all times, with the conditions upon which they are employed by the Tressury, as evinced by the suspensions of 1837, render the mea-sure of dispensing with their agency in conducting the fiscal operations of Government one of obvious ces. sity. The Post and Transcript will therefore advocate the adoption of the Independent Treasury System, as a

measure calculated to relieve government from the conit liable—one which will insure stability and uniformity in its fiveal action, and reduce the potent influence of the Executive ever a league of deposite Banks, to the mere power of appointing the few officers necessary to ty to learn in a few years what cannot be acquired in ages, where all is dull conformity will be supported as a judicious fiscal measure, Bank. and routine of thought and of action! Thus ing Institutions will not be opposed. On the contrary has it happened in manufactures as in other their interests—with such checks as are calculated to things; American ingenuity, unrestrained by prejudice or law, has triumphed over difficulssential to the prosperity and advancement of the

nal to concentrate and diffuse every ray of depend much upon the energy and zeal of those to floating light on the subject, it was the opi-AGENTS.

Price-Three Dollars per annum poctor IV. EVANS' SOOTHING XY RUP, FOR CHILDREN TEETH

Prepared by himself.

TO NOTHERS AND NURSES.

Ta: passage of the Teeth through the gums produces trailesous and dangerous symptoms. It is known by markers that there is great irritation in the mouth and can drain the process. The gums swell, the secreture of saliva is increased, the child is seized with frequest and sudden fits of crying, watchings, starting in the steps, and spasms of peculiar parts; the child shrieks rich etireme violence, and thrusts its fingers into its mouth. If these precursory symptoms are not speedily inflictated, spasmodic convulsions universally supervene, instead on the steps of the subject of the steps of the subject of t

A REAL BLESSING TO MOTHERS. Or. IV. Evans' Celebrated Soothing Sy-

rup, for Children Cutting their Teeth.

Dr. W. Evans' Celebrated Soothing Syrup, for Children Cutting their Teth.

This infallible remedy has preserved hundreds of children, when thought past recovery, from convulsions. As soon as the Syrup is rubbed on the game, the child will recover. This preparation is so infigent, self-actious, and so pleasant, that no child will refar to let its gums be rubbed with it. When infants are at the age of four months, though there is no apparance of teeth, one bottle of the Syrup should be used on the gums, to open the pores. Parents should be used on the gums, to open the pores. Parents should be used on the gums, to open the pores. Parents should be used on the gums, to open the pores. Parents should be used on the gums, to sprup in the nursery where there are young children; for if a child wakes in the night with pain in the gums, the Syrup in mediately gives ease by opening the pores and healing the gums; there-by percenting Convulsions, Fevers, &c.

Dr. Evans' Soothing Syrup.

To the Agent of Dr. Evans' Soothing Syrup. Dear So-The great benefit afforded to my suffering infant by your Soothing Syrup, in a case of protracted and passful dentition, must convince every feeling parent were smital an early application of such an invaluation of such an invaluation of such an invaluation of the relieve infant misery and torture. My infant, while teething, experienced such acute sufferage, that it was attacked with convulsions, and my wife and amily supposed that death would soon release the history my which as so nas applied to the gums a wonderful dange was produced, and after a few applications the child displayed ob our relief, and by continuing in its us, I am glad to inform you, the child has completely my which as so nas applied to the gums a wonderful thange was produced, and after a few applications the child displayed ob our relief, and by continuing in its us, I am glad to inform you, the child has completely provided to the gums a wonderful provided to the gums a wonderful provided to my provided to the gums

will gladly give any information on this circumstance.

WM JOHNSON.

If A gentleman who has made trial of Dr. W. E. ras' Soothing Syrup in his family, (in case of a teething child,) wishes us to state that he found it entirely effectual in relieving pain in the gums, and preventing the consequences which sometime follow. We cheerfully comply with his request:—N. York Sun.

If We believe it is generally acknowledged by those who have tried it, that the Soothing Syrup for Children Cetting Teeth, advertised in another column, is a highly useful article for the purposes for which it is intended, lighly respectable persons, at any rate, who have made they fit, do not healtate to give its virtues the sanction of their names.—Boston Traveller.

PASEVERE CASE OF TEETHING. INTI'LSUMMER COMPLAINT.

ING. WITH SUMMER COMPLAINT, ING, IVITH SUMMER COMPLAINT, cared by the infallible American Soothing Syrup of Dr. W. Evans. Mrs. McPherson, residing at No. 8, Maison street, called a fow days since at the medical scale of Dr. W. Evans, 100 Chatham street, N. Y. and purchased a bottle of the Syrup for her child, who was saffering exeruciating pain during the process of teation, being momentarily threatened with convulsions, its bowels too were exceedingly loose, and no first could be retained on the stomach. Almost immediately on its application, the alarming symptoms entirely ceased, and by continuing the use of the syrup on the guns, the bowels in a short time became quite satural. As a tribute of gratitude for the benefit afforded the child, the mother came of her own accord, and freely sanctioned publicity to the above. Pray be puricular in applying at 108 Chatham street, as there are several counterfeits advantaged. No other place in the city has the genuine for sale.

principle in applying at 100 children in several counterfeits absorting. No other place in the city has the genuine for size.

IT IMPORTANT TO MOTHERS.—Children in the city has the genuine for size.

IT IMPORTANT TO MOTHERS.—Children in the highly suffer much uneasiness from euting their test. Whatever dangerous or fatal symptoms attend this process of nature, they are produced fivariably from the highly irritated and inflamed conduction of the parts—therefore the principal indications off cure are to abate the inflammation, and to soften, soothe, and relax the standard fever, inflammation, spasmodic cough, ratching of tendons, croup, carrier, and convulsions, displaying their fatal consequences. If mothers, nurses, or guerdians have their balfs tortured with painful and protracted dentition, and this notice attracts their intention, they should not be deterred from purchasing a bottle of EVANS SOOTHING SYRUP for Children Testhing, the incomparable virtue of which in completely relieving the most distressing cases (when applied to the infant's gums as directed) is invaluable. The remedy has respect thousands of children when eathevergo of the grave, to the embraces again of their distracted parents attacked with that awful and mortificous malady—forvulsions.

DIRECTIONS.

WF Please shake the bottle when first opened.
When children begin to be so fain with their teeth shooting in their gums, putsal little of the Syrup in a traspoon, and with the finger let the child's gums be rabed for two or three minutes, three times aday. It as that be put to the brasat immediately for the milk would take the syrup off too soon. When the teeth are just coming through their gums, mothers should immediately apply the syrup; it will prevent the children having a fever, and undeknoing that painfui operation of lancing the gums, which always makes the next tooth much harder to come they and sometimes causes death. Sold at Dr. W. Evank Office, 100 Chatham street, Nev York; and by all his Agents throughout the Union. Agent,

JEREMIAH HUGHES, Annapolis, Md.
