The Maryland Bulletin

VOL. LXXXII, NO. 9

FREDERICK, MARYLAND

MAY 1962

Published monthly at the Maryland School for the Deaf by the Graphic Arts classes during the school year. \$1.00 per year in advance. Subscriptions may begin at any time. Address all communications to: *The Maryland Bulletin*, Frederick, Maryland.

Entered as second-class matter September 4, 1920, at the Post Office at Frederick, Maryland, under the Act of Congress of March 3, 1879.

The Class of 1962

Proudly Dedicates
THE SENIOR NUMBER
to

Miss Hazel K. McCanner

TO MISS McCANNER—Whose warm personality and years of selfless service are well-remembered by the deaf of Maryland. For many years it was Miss McCanner who greeted bewildered parents with their little deaf children, calmed fears and apprehensions, sent notes of re-assurance, made emergency calls, cementing the ties between home and school. Her fine organizing hand has guided innumerable school activities over the years.

Miss McCanner began her services at the Maryland School for the Deaf as secretary to Dr. Ignatius Bjorlee in January, 1921. Later she became the administrative assistant and continued to serve in that capacity.

We take this means of expressing our affection and appreciation to Miss McCanner for her generous and thoughtful concern for the welfare of the deaf students of the Maryland School for the Deaf.

A Message from our Superintendent

TO THE SENIORS

YOUR GRADUATION brings to a successful conclusion the plans set in motion the day you began your education. These plans were carefully made by many people on the staff of the Maryland School for the Deaf. Your parents played a most important part in the support they gave to the school and to you, in your educational efforts. We are confident you will meet the new challenges that await you in this new and important milestone of your lives.

Lloyd A. Ambrosen

A Message from our Principal

TO THE GRADUATES

YOU, THE GRADUATES of the Maryland School for the Deaf, are facing exciting times when the people of our country are being called on to work toward world peace and brotherhood. Each deaf graduate will make his contribution to this noble effort in the years ahead. The faculty and staff of the Maryland School are confident you will meet this challenge. We wish you well.

Not What We Get But What We Give

Alvin Leroy Amberg

WE ARE HAPPY to see you all. Every year graduation time tells the same story of students leaving school to make their way in life. We are sorry to leave, but we cannot remain children forever. We have received a great deal from our school. We have gotten the fundamentals in education and character training. We have enjoyed our friendships with the faculty, staff, and students. As we stand ready to join the great family of wage earners, we hope we will make good returns on the investment the State of Maryland has in us. We welcome you all.

When President Kennedy gave his inaugural address, he said that to preserve our way of life, we must put first, "Not what we get but what we give."

I think President Kennedy came up with the right answer. The way to have is to give. What we must give depends on what is needed at a particular time. This holds true no matter what we want in life.

Two important phases of our lives are the government under which we live and our means of support. Our forefathers worked hard to establish a democratic government. Now certain forces are trying to undermine it. The time has come for us to give. Yet we cannot give unless we have prepared ourselves for giving. We who graduate today realize that we must have a good education. We must give time and thought to it, for unless we understand trends in world affairs, we cannot protect our country against the forces that operate against it. We must not let ignorance or selfishness defeat democracy. In an article: *North Americans, Share Your Democracy with Us*. (Reader's Digest, August, 1961), Jose Figuerre, former president of Costa Rica, asks for funds to help establish democracy in certain South American countries. We complain about high taxes, but we must pay taxes to preserve freedom, not only in our country, but in any country that wants to be free.

The deaf in the United States are Fortune's own children. Never before has so

much been done to help the deaf find their places in life. Written history goes back 6000 years or longer. Education for the deaf had its beginning about 200 years ago. During these 200 years, people who found pleasure in giving won for us an education, a chance to earn a living, and many liberties that the deaf in other countries do not have. Among the givers were superintendents of schools, ministers interested in teaching religion to the deaf, and high-minded citizens who believed in the worth of the individual.

Since we have been given a citizen's place in life, we must take over a citizen's duty. This means many things, but first of all it means that we must be self-supporting. We are not living in a time of social security for the deaf. According to McCay Vernon in the *Silent Worker*, automation has created many problems for us. Manual occupations employing the deaf are disappearing. Centralized businesses having blanket insurance for all jobs, hazardous or otherwise, prevent the deaf from working at certain jobs because they cannot be insured. Furthermore, the problems brought about by automation require educational skills that many deaf people do not have.

What can we do about this? Here again education counts. We must get a good academic and vocational training in school. That means we must work hard. On graduating, we should join one of the several organizations whose aim is to protect the interests of the deaf. Through such an organization, we can, and should, work for changes in working conditions. Finally, we should give our all to our work. We are more than willing to go all out to win a track meet or a basketball game. We should be willing to prove that we are employable.

Freedom and earning power mean more to us than anything else. Somebody must fight to keep the United States a democracy; somebody must keep the door of employment open for the deaf. That somebody might as well be we who graduate here today.

A Look Into The Future

Robert John Svehla

WHAT IS AHEAD of us, the American people? Where are we headed? Time is bringing changes. Some are good. Others have us guessing.

One change is the advancement of backward peoples and the emergence of new nations. Russia, an agricultural nation in the 1920's, has become our rival in scientific achievement. Colonial peoples in Africa have struck for independence or have become independent. These new nations can in time become as powerful as our South American neighbors are now. Just what impact this will have on our lives, we cannot now foresee.

We, Americans, have never worried about being overpopulated. Other nations, such as China or Japan, might face problems, but not we! I was somewhat shocked when I read recently in an article by Philip M. Hauser, Director of Research, University of Chicago, that our population increase between 1940 and 1960 was 48 millions and that by 2050 we would have a population of 1 billion if the present trend continues. That is something to think about.

The splitting of the atom has given us something to think about too. Defense has become a serious matter. We and other nations are building bombs. The more they build; the more we must produce. We are accused of building bombs for conquest. We are not, but we cannot sit back and let rival nations become so strong that we cannot defend ourselves.

Another result of the splitting of the atom is space exploration. To me this is the most revolutionary change since Columbus discovered that the earth was a ball floating in space. As late as twenty-five years ago, people thought rockets queer devices. After World War II, we started to build rockets in order to explore space. Russia started before we did, and she still leads, but we are forging ahead. We would like for nations to pool space discoveries as in the past nations have worked together to explore the resources of the Antarctic continent. Perhaps in the next decade the United States, Russia, and

other nations will agree to joint scientific space explorations. Some people question the value of these explorations. They say it is all foolishness and object to expending lives and money, but in the day of Columbus people objected, too. Now, as then, we must go ahead—

Something hidden, go and find it . . .

One real good has come from the splitting of the atom, and that is the advance in medicine. In the next quarter of a century, man may be master of creation. That knowledge would open the door to many things. It would mean we would have the power to control cancerous growth and to battle viruses and mental diseases. It would mean the use of electronics to help paralyzed muscles. How can this be? Scientists are making tiny electronic brains to operate crippled or diseased organs of the body. This they call bioelectronics. It will be marvelous and will save many lives. Such devices may even enable the deaf to hear and the blind to see.

How will all these changes affect us, the Class of '62? We do not, of course, know, but we are looking forward with anticipation. We feel that never in the history of man has there been a drama of such magnificence as that being unfolded now. We cannot but believe that the changes of today are but another phase in man's advancement, and that we will live to see the dawning of the most wonderful era in the world's history.

* * *

*Something hidden, go and find it.
Go and look behind the ranges.
Something lost behind the ranges,
lost and waiting for you, go.*

—RUDYARD KIPLING.
"The Explorer"

* * *

*I dipt into the future far as human
eye could see,
Saw the vision of the world and all
the wonder that would be.*

Prophecy

The View Scope

A Story of the Adventures of the Class of '62 as Seen by

Brenda Morrison and Susan Pachino

RECENTLY, when I went to check my deposit box with the aid of the newly invented View Scope, a device that lets one see contents clearly through opaque covering, I saw the title *The Maryland Bulletin*. It brought memories of my classmates at the Maryland School and I wondered how they had succeeded or prospered in life. As I began to turn the pages, I remembered that 20 years previously, in 1962, when Susan and I had attended our first convention of the deaf, we had made a resolution that we should get in touch with our classmates in 1982, using the latest means then at our disposal. That was the so-called View Scope. Idly, I let fingers turn the knob. The first view introduced Alvin Amberg. I paged Susan and together we visited the Class of '62.

Alvin Amberg owns a sports resort in California where he earns his living. He still loves sports, and still takes his daily exercise. We were amazed when Alvin told us that he had become a millionaire and downright astonished to learn he was still a bachelor.

The next to come into view was **Linda Aydelotte**. We caught her ready for a dive into the ocean. We learned she is still living in Ocean City, the place where she was born, and she owns a summer resort at which she caters especially to the deaf. How kind she is!

The next turn brought **Roger Baker**. He was being handed a blue ribbon at the Frederick Fair. Eager to be a farmer, he had worked hard and found success. Modern machinery has lightened the heavy tasks he performed when he was 18 years old.

The next view showed a dancer. We saw **Albert Bertolini** bowing to us. He told us he owns a dance studio and has more pupils than he has time to teach. He invented the dance step called "Orbit."

Another turn and there was **Bram**

Hightman surrounded by children. We learned he is a famous children's doctor. He has a son whom he will take into practice as soon as he gets his doctor's degree.

What is this? Someone is taking a picture. It is **Paul Browning**. He has become a photographer with a studio in Florida. His specialty is taking pictures of glamorous movie stars. Autographed pictures line the walls of his studio.

There is **Stanley Eure** as big as life. He is teaching his son how to jump. Stanley became a noted deaf Olympian, when he broke the 8.0 record. He is married to Linda. A daughter attends Goucher College in Baltimore.

Dorothy Harris danced into view. We were amazed to hear that Dorothy became a famous dancer. She is known as "Dot the Dancer." She is now teaching her youngest to become the dancer she once was.

We turned on **Susan Pachino's** frequency. She is a former Gallaudetian and so is her husband. They live in Baltimore, the place Susan loves best. They have two sons and two daughters. Susan is a teacher at Baer School for handicapped children. How wonderful!

Brenda Morrison's home was glimpsed through a hole in a cloud. She lives with her husband, Preston, in a luxurious ranch house on Mars. Her husband has his own printing business. They have seven children, all boys.

We wondered what had happened to **Leroy Saunders**. We remembered he left M.S.D. to work as a printer before his graduation. After twirling the knob for a few minutes, we found him at his printing shop in Towson. He found success. He is expecting to retire as soon as his son can take over. Europe and the Orient beckon him.

Susan kept turning the knob. Wait...

Class Will

Barbara Haller and James Steele

WE, THE CLASS OF 1961, having studied diligently under the supervision of unimpeachable teachers of the deaf, consider ourselves wondrous wise and therefore capable of making this our last Will and Testament. We bequeath as follows:

Louis Allen—a book, "How to Learn to Type," with the hope that he will succeed in becoming the world's speediest typist.

Linda Bailey—a package of gum. She loves to tantalize the students with her gum chewing. We have suffered enough. Now let others suffer.

Terry Blumenthal—a miniature car. We decided to bestow this on her because she received her driver's license last summer.

Malvin Brown—a tie with the Class of '62 printed on it. We know he is interested in the latest styles and this is the very latest.

Carol Carpenter—a barbecue fork. Carol often goes to camp with the Girl Scouts. She loves to cook outdoors. We hope she will enjoy using it.

Adair Cuthrell—a "cute" record. She is interested in listening to beautiful songs so the Class of '62 bequeats her one.

Doris Fowler—a book on dramatics with the hope that she will become an actress or a movie star.

Hilda Richey—a book of games, so that Hilda will learn how to play and not become an egghead. She is headed straight for the latter unless she learns to play.

Donald Hahn—a game, Scrabble, to satisfy his yearning to play and a book "A Citizens' Duties" to teach him responsibility.

Bram Hightman—a book "How to Wrestle." Bram enjoys watching wrestling on television. We, the seniors, decided to give him this book that he may become a wrestler.

David Machin—a pen, that he may be encouraged to do more writing with . . . for his teachers, of course!

Julia Moody—a book of poems because she loves to read beautiful poetry.

Shelly Gillis—a framed picture of the Class of '62. We want Shelly to remember us even if we have not known her very long.

Stephanie Tag—a book of clothing designs and information because she is interested in foreign dress styles.

Byron Zimmerman—a framed picture of the Class of '62, for we want him to remember us.

Albert Bertolini—a book "How to Dance" is given to Albert with the hope that he will become a skillful dancer in the future.

Dorothy Harris—a necklace to add perfection to faultless attire.

Signed and sealed this eighth day of June, nineteen hundred and sixty-two.

English—Miss Wohlstrom

Mathematics—Mr. Swaim

The Junior Bulletin

TIME FLIES

When I was eight years old, I watched the older girls and boys graduate from school. I was in a hurry to graduate, too, but now I am amazed to be a senior. I have tried to improve in my lessons this year. I like all my subjects, but my favorite has always been arithmetic. English and reading have been very hard for me. I must continue to study these after I leave school. History, science, and orientation have been interesting lessons. My favorite sport is soccer. I have tried hard to play better basketball, but some players are better than I. I like track. I have taken part in the mile relay, pole vault, 880-yard dash, and hop, step, and jump. I hope to get a job in carpentry after leaving school, but I will take any job at first. —Roger Baker.

EDUCATIONAL TRIPS

The educational trips I have had begin with New York. I was only twelve then. I saw the Statue of Liberty and the Museum of Natural History. Both were interesting. Another important city was Washington. There I saw the Wax Museum and the Capitol. Pennsylvania was next on the list. I saw Independence Hall and Valley Forge. I had a wonderful time. Recently, when the New Era Club girls went to see the Luray Caverns in Virginia, I saw many beautiful formations. I traveled on the Skyline Drive through part of the National Park. My educational trips should end with the Senior trip to New York, but a bout of sickness is sending me home instead. —Linda Aydelotte.

A THRILLING EXPERIENCE

In my early teens I wanted to go to Europe during the summer vacation, but my family could not afford the trip.

In 1960, I was very lucky. I made a record high jump in track events. This gave me a chance to join the International Olympics for the Deaf in Helsinki, Finland, during the summer of 1961. It was thrilling to see the different countries in Europe that I had previously studied in geography. I had many interesting experiences. In United States most farm-work is done by machinery. In Europe I

saw men plow the ground, cut grain, using a scythe, and spade up potatoes. Some women helped the men. Switzerland was the most beautiful. The mountain tops were covered with snow. It was very cold when I was up in the mountain.

I will never forget what I saw and learned in Europe. It was the most wonderful event of my school career.

—Stanley Eure.

* * *

Prophecy . . .

(continued from page 143)

There is something familiar about this woman. It is none other than **Alice Spencer**. She lives with her husband Clyde in Gaithersburg, Maryland. They have three daughters and one son. Alice works as a typist while Clyde is a printer at the Gaithersburg Co.

We were looking for **James Steele**. He was nowhere on earth. With the skies full of man-made satellites, rockets, and other space craft, it was a long time before we finally found him on a large ranch on Venus. We learned that he owns it, and in addition, he has a printing business and a real estate office. Being a prosperous farmer and businessman, he and his wife, Mary, and their four children have enough money to enjoy life.

Bob Svehla went to Gallaudet College in 1962. We heard he worked in Washington so we turned the Scope there. He told us that after he graduated, he found a good job in the government. He is happy making science experiments. We are not allowed to know his secrets.

Ebbie Bosworth came into view with a whirr! There he is writing out his bill after polishing off a dental job. He is a very busy man. We agree with him, for he hardly found time to talk with us.

Barbara Haller hoped her husband would be a veterinarian. Her wish was granted. They live on an enormous ranch which include horses, cows, dogs, and other pet animals. They have one set of triplet girls. Having mutual interests, they are living a wonderful life together.

We turned off the View Scope. It was wonderful to know that all in the Class of '62 had turned out to be good hardworking citizens of the United States no matter where in her territories they lived.

Sportlight

Carmen S. Tiberio

With a bevy of graduates having sung their "swan song" with the MSD track team . . . The Orioles closed out their best track season in years.

Two major meets were held, the Wayne Zimmerman Memorial Meet at Walkersville which is so named in memory of a student athlete there, and the Frederick County Meet. The Orioles placed third in both meets and gave a very good account of themselves.

The Orioles lacked depth—numbers, with only 10 to 13 participating, but brought home a good portion of the blue ribbons, 12 in all, in contrast with the lone blue ribbon won by Eure last year.

This year's blue ribbon crop consisted of Stanley Eure, who incidentally was undefeated all season in the high jump and who completed two seasons as Frederick County Champion.

Paul Abbott was also undefeated in his specialties the half mile and the mile. Paul was the top-point winner and workhorse of the MSD tracksters. He will be back for another year and if he keeps up his determined pace, he will rewrite the record books in the distance events.

Both Eure and Abbott were mainstays of the Orioles' record-breaking mile relay team, along with Sylvester Butts and Robert Svehla, with Jaschik as back-up runner.

Sylvester Butts carried both 440 races

to blue ribbon conclusions. He served as captain of the team and was an excellent all around team man with high inspirational qualities.

David Machin was another workhorse of the Oriole's cinder squad. He pulled more than his load in the broad jump, hop-step-jump, 220 dash, 100 dash, and the 440 and 880 relay team.

After a slow start, Robert Svehla improved rapidly, helping pace the record making mile relay team.

Roger Baker made 9 feet 6 in the pole vault, but Ebbie Bosworth took record honors with a 10-foot effort, in his first

Cheerleaders

Kneeling (left to right): C. McGee, M. Keller, C. Simmons, L. Dolan. Standing: C. Fidler, M. Koubek, T. Blumenthal, S. Pachino, L. Montgomery, Mrs. Behrens, Advisor.

Soccer

First row (left to right): J. Robison, mgr; M. Childs, V. Mainon, R. Baker, S. Gotton, A. Bertolini, A. Richey, mgr. Second row: A. Nikstaitis, L. Reedy, S. Butts, A. Amberg, L. Bowie. Third row: R. Svehla, R. Jaschik, B. Zimmerman, D. Bosworth, B. Hightman. Fourth row: Mr. Parker, coach, D. Machin, S. Eure, P. Browning, L. Saunders, L. Setler, P. Abbott, M. Jones.

and last year with the team.

Tommy Whitten, nursing a physical condition, nevertheless, got his share of first places and several other ribbons.

In multi-meets the Orioles closed out with a 13-6 record, and with eight blue ribbons in the County meet, our boys did very well.

Those boys hanging up their spiked shoes for the last time via graduation are: Stanley Eure, Robert Svehla, Roger Baker, Ebbie Bosworth, Albert Bertolini, and student managers Bramwell Hightman and Alvin Amberg.

With a spanking new quarter-mile track nearing completion on the newly acquired land at the southeast corner of the school,

MSD track fortunes should improve a great deal more and records are sure to be re-written.

Also singing his "swan song" as one of the track and field coaches is Wayne Walters, who is moving to Louisiana in the "sugar bowl" country. We are sorry to see him go, and wish him well.

Total points earned this year by the top lettermen are thus noted:

Paul Abbott 82½, Stanley Eure 48½, Sylvester Butts 43, David Machin 43, Robert Jaschik 24½, Ebbie Bosworth 21, Tommy Whitten 20½, Roger Baker 15, Robert Svehla 14, and Milbert Jones 10.

And so like the "Bowery Bums" used to say at the conclusion of the season . . . until next year!

Farewell

WE WANT to thank all of you, the Board of Visitors, the superintendent, the principal, the teachers, the school staff, and the houseparents for helping us. You are the people who have known and understood our problems.

We are all thankful to Mr. Ambrosen. He has done a wonderful job on our campus. The new primary building means comfort for many little boys and girls. But this is not the one we are thinking about. Mr. Ambrosen has many other plans to improve our school. Some have been started. Others are still in the planning stage. There will be a new vocational shop and an athletic field. Also, we will have new boys and girls dormitories. Everything is changing. We, the Seniors of 1962, wish we could stay in this new model school. We are very proud of Mr. Ambrosen, the superintendent of the Maryland School for the Deaf. He has done great things and is very thoughtful of us.

Miss Kent, our principal, has worked to keep us interested in education. She has continuously studied the problems connected with deafness so that we could be placed in the classes in which we could make the best progress. We are grateful.

We shall miss our teachers and houseparents. The lessons have been hard but with your help we mastered lessons both in knowledge and citizenship. We will think about you when we meet problems to solve without your help in the future.

"Farewell to thee" says the class of 1962. This does not mean that we will leave you forever. We will come back and tell you the important things we learn out in the world. Our advice now is to study hard, and time will pass rapidly. The world is entering the Space Age. Educated men and women are needed.

Appointments to the Staff

The new position of Assistant Principal has been filled by the appointment of Kenneth R. Lane. Mr. Lane received his B.A. from Gallaudet College and an M.A. degree in curriculum and administration from Louisiana State University. He taught in the West Virginia, Louisiana, and Washington Schools for the Deaf, since his graduation from Gallaudet. Mr. Lane is married and has two children. He will report for duty on July 1.

Mr. Paul E. Barr, our new Boys' Physical Education teacher is a graduate of Shepherd Teachers' College, and for his M.A. degree he attended West Virginia University. Mr. Barr has had experience in public schools of West Virginia with his most recent position as physical education instructor at the well-known Handley High School, Winchester, Va. Mr. Barr is married and has two children.

We are looking forward to the contribution these fine people will make to our school.

Visitors from Denmark

Mr. and Mrs. Peter Knudsen of Fredericia, Denmark, visited our school last month. Mr. Knudsen is Headmaster of the School for the Deaf in Fredericia. In 1959-60 we had the privilege of serving as President of the Frederick Rotary Club. In that year Peter Knudsen was also President of the Fredericia Rotary Club. We corresponded that year because of the similarities in the names of our cities, having the same vocational classification, and serving our Rotary Clubs in identical capacities. When Mr. Knudsen came to Frederick we discovered we both assumed our positions in the same year 1955.

Mr. and Mrs. Knudsen were delightful guests and charmed us all. They are visiting several other schools for the deaf in the United States and will return to Denmark in late May.

Elizabeth Benson Honored

As an alumnus of Towson State Teachers College, Towson, Md., Miss Elizabeth Benson will receive an award for outstanding achievement. Miss Benson is Dean of Women at Gallaudet College. She is the daughter of Mrs. Minnie English Benson of Frederick, and the late Harry G. Benson. She is the sister of our Miss Mary Alice Benson, a teacher in the Primary Department.

Miss Benson will be further honored on June 4 when Gallaudet College will confer on her an honorary Doctor of Letters degree. This occasion is the 98th commencement exercises at Gallaudet College.

We congratulate Miss Benson on her fine achievement and recognition.

Administrative Changes

Mr. Roy M. Stelle, Superintendent of the Colorado School for the Deaf and the Blind, will assume the duties of Superintendent of the New York School for the Deaf in White Plains. Mr. Stelle succeeds to the position held by the late Dr. Daniel T. Cloud.

Mr. Armin Turechek, Assistant Superintendent of the California School for the Deaf at Riverside, will become the Superintendent of the Colorado School for the Deaf and the Blind.

Our best wishes go to these two fine men. They have both excellent training and previous experience that eminently qualify them for the new positions they are assuming during this summer.

Four Students to Attend College

We are happy to announce that four of our students will be going to Gallaudet College in September. Our congratulations go to Alvin Amberg, Brenda Morrison, Susan Pachino, and Robert Svehla.

Mizpah

Go thou thy way, and I go mine,
 Apart-but not afar,
Only a thin veil hangs between
 The pathways where we are,
And God keep watch 'tween thee and me
 This is my prayer,
He looks thy way—He looketh mine
 And keeps us near.

I know not where thy road may lie
 Nor which mine will be,
If thine will lead through parching sands
 And mine beside the sea,
Yet God keep watch 'tween thee and me,
 So never fear,
He holds thy hand—He claspeth mine
 And keeps us near.

Should wealth and fame perchance be thine
 And my lot lowly be,
Or you be sad and sorrowful
 And glory be for me,
Yet God keep watch 'tween thee and me,
 Both are his care,
One arm around me and one round thee
 Will keep us near.

I sigh sometimes to see thy face
 But since this may not be
I leave thee to the love of Him
 Who cares for thee and me,
"I'll keep ye both beneath my wings,"
 This comforts—dear,
One wing o'er thee—and one o'er me,
 So we are near.

And though our paths be separate
 And thy way be not mine—
Yet coming to the mercy seat
 My soul shall meet with thine,
And "God keep watch 'tween thee and me"
 I'll whisper there,
He blesses me—He blesses thee
 And we are near.

—JULIA A. BAKER.
