Background

House Bill (HB 6) – During the 2008 legislative session, the Maryland General Assembly passed Chapter 360 (HB 6). The Bill establishes state policy that a law enforcement unit regularly using one or more interrogation rooms with the capability to create audiovisual recordings of custodial interrogations shall make reasonable efforts to record interrogations of suspects in connection with cases of murder, rape or sexual offenses in the first or second degree.

On or before December 31, 2009, and annually thereafter, the Governor's Office of Crime Control & Prevention (GOCCP) shall report to the House Judiciary Committee and the Senate Judicial Proceedings Committee, in Accordance with § 2-1246 of the State Government Article on the progress of jurisdictions and the Department of State Police in establishing interrogation rooms capable of creating audio visual recordings of custodial interrogations.

GOCCP has made available to local law enforcement agencies funding through the Byrne – Justice Assistance Grant (BJAG), Law Enforcement Technology (LETC) grant program for, “Custodial Interrogation Equipment.” Additional funds have been made available through the Byrne – Justice Recovery Act (BJRA) since the law was enacted in 2008.

GOCCP has provided \$71,695.00 in grant funding (from December 2009 to November 2010) to agencies that indicated that they needed State support to build out an audio/video custodial interrogation room. Every application for

this purpose area that we have received, we have funded. That is because it is a priority area of the Governor and of the General Assembly as evidenced by the law that was recently passed.

The agencies that have received funding to date are:

Riverdale Park Police Department	\$11,817
Hagerstown Police Department	\$59,878

In the Fall of 2010 GOCCP conducted follow up telephone interviews to update all information from the survey that was distributed in 2009. 154 local law enforcement agencies throughout the State of Maryland were contacted. The survey required each respondent to enter the following data:

- (1) Agency Name
- (2) Number of Rooms in use
- (3) The capability of the room, (i.e., visual, audio or audio/visual)
- (4) Future plans for interrogation rooms,
- (5) Timeline for additions of room and/or equipment
- (6) Source of funding

Of the 154 local law enforcement agencies polled during 2010, 144 or approximately 93.5% responded to the survey. The findings revealed the following:

- there are a total of 119 interrogation rooms statewide;
- 38 agencies have one room;
- 27 agencies have multiple rooms; and
- 79 agencies have no rooms.

The capability of the interrogation rooms:

- 2 interrogation rooms are equipped with only video equipment;
- 2 interrogation rooms are equipped with only audio equipment;
- 36 interrogation rooms are equipped with both audio and visual equipment; and
- 10 interrogation rooms are not equipped with audio or video equipment

In addition:

- 5 agencies use portable video equipment;
- 29 agencies use portable audio equipment; and
- 20 agencies use both portable audio and portable video equipment.

The following is a breakdown of agencies that indicated future plans and timelines for the creation of new or additional interrogation rooms:

- 10 agencies have future plans for new or additional rooms in 0 to 12 months;
- 10 agencies have future plans for new or additional rooms in 12 to 24 month; and
- 124 agencies indicated they have no plans for new or additional interrogation rooms.

Agencies indicated the following plans and timelines for new audio or visual equipment:

- 118 agencies indicated they have no plans.
- 13 agencies will purchase new audio or visual equipment in 0 to 12 months;
- 10 agencies will purchase new audio or visual equipment in 12 to 24 months.

Interrogation room funding sources:

- 42 Local funds
- 11 State funds
- 1 Federal funds

GOCCP looks forward to continuing to support this effort via grant funding and will provide an update on its progress in 2011 as required by law.
