

Larry Hogan, Governor  
Boyd Rutherford, Lt. Governor  
Jeannie Haddaway-Riccio, Secretary

December 2, 2019

The Honorable Thomas V. Mike Miller, Jr.  
President of the Maryland Senate  
State House, H-107  
Annapolis, MD 21401-1991

The Honorable Adrienne Jones  
Speaker of the House of Delegates  
State House, H-101  
Annapolis, MD 21401-1991

**Re: Submission of Report regarding Maryland's Chesapeake Bay and Endangered Species Fund**

**Agency:** Maryland Department of Natural Resources

**Report Authority:** Natural Resources Article § 1-706 (MSAR #10398)

Dear President Miller and Speaker Jones:

Please find attached the Department of Natural Resources' annual report on Maryland's Chesapeake Bay and Endangered Species Fund for FY 2019.

The report details the distribution and use of the funds collected from taxpayers' contributions when submitting their annual income tax returns. The Department of Natural Resources receives fifty percent of the donations collected. DNR's Wildlife and Heritage Service, which is responsible for the conservation of Maryland's nongame, threatened and endangered species program, receives the bulk of the department's allocation and this report summarizes how the funds were spent. The remaining fifty percent of the collected contributions are allocated to the Chesapeake Bay Trust.

The Department of Natural Resources appreciates being the recipient of Maryland's taxpayers' generous contributions. We will continue the wise use of these funds to conserve and protect our natural resources for the benefit of all Maryland's citizens.

Should you have any questions or comments regarding this report, please feel free to contact DNR's Legislative and Constituent Services Director, James W. McKittrick, directly at 410-260-8112, or by email at [Jamesw.mckittrick@maryland.gov](mailto:Jamesw.mckittrick@maryland.gov).

Sincerely,

Jeannie Haddaway-Riccio  
Secretary

Maryland Department of Natural Resources  
Wildlife and Heritage Service  
Annapolis, Maryland 21401

2019

## **Chesapeake Bay and Endangered Species Fund**

The Maryland General Assembly created the Chesapeake Bay and Endangered Species Fund in 1988 whereby Maryland taxpayers can donate funds to help restore the Chesapeake Bay and save Maryland's endangered species and nongame wildlife. Taxpayers can make this contribution when submitting their annual income tax return. They can either donate a portion of their tax return to the Chesapeake Bay and Endangered Species Fund or add their donation to the amount of taxes owed the state.

Of the proceeds donated to this fund, 50 percent are distributed to the Chesapeake Bay Trust for bay education and restoration grants and 50 percent are distributed to the Department of Natural Resources to conserve nongame wildlife, threatened and endangered species, and their habitats. The funds are available to promote the conservation, propagation and habitat protection of nongame, threatened and endangered species. Authorized activities may include monitoring, surveying, habitat protection, habitat restoration, public education and urban wildlife programs.

## **Wildlife and Heritage Service**

The Wildlife and Heritage Service is the unit of the Department of Natural Resources responsible for the conservation and management of Maryland's wildlife resources, including nongame, threatened and endangered species.

The service is organized into programs that address game animals, invasive species, Wildlife Management Areas (i.e., public lands for hunting and other wildlife-oriented recreation and protection), technical assistance to private landowners, and public outreach. The program responsible for the conservation of nongame, threatened and endangered species is called the Natural Heritage Program.

## **Natural Heritage Program**

The Natural Heritage Program oversees the conservation of the state's nongame wildlife resources, including birds, mammals, reptiles, amphibians and invertebrates. It is the lead agency for threatened and endangered species conservation in Maryland, including plants and animals. Decisions on the listing of species as endangered or threatened are determined by the program and officially listed through the state's regulatory process. This program also works on species of greatest conservation need, including declining wildlife and rare native plants, as well as rare or unique natural communities.

Within the program there are three functional programs, namely the Science Program, Habitat Conservation Program and Conservation Technology Program.

The Science Program is responsible for species status assessments, threatened and endangered species listing, inventory and monitoring species of concern, applied research, development of natural community classification for Maryland, and restoration of rare or unique ecosystems and natural communities. The state zoologist, botanist, wildlife ecologist, invertebrate zoologist, community ecologist, and restoration ecologist perform

the primary functions of this program.

The Habitat Conservation Program conforms to the department's four regions (Eastern, Central, Southern and Western), with a regional ecologist in each. The staff of this program works closely with public land managers to conserve biodiversity on these state properties. They also work with private landowners, local planning and zoning agencies, and conservation organizations to influence plants and wildlife conservation on private lands. The environmental review process annually reviews 3,000+ projects for potential impacts to threatened and endangered species and other species of concern. The program also supports outreach to private landowners who wish to support habitat for declining species by linking them to funding sources and technical assistance.

The Conservation Technology Program serves as the central data management service. A centralized database houses nearly 40 years of data on the state's rare, threatened and endangered species. This database is part of the NatureServe network, an international association of over 80 programs across all 50 states, Canada, and Latin America. Location and population information for these species are mapped and stored in a standardized geographic information system (GIS). Various mapping products are produced for internal and external users. Generalized location information, called the Sensitive Species Project Review Areas (SSPRA) data layer, is available to the public for planning and environmental review purposes in the Maryland iMap online interactive mapping and GIS data portal.

### **Use of the Fund**

The Natural Heritage Program receives the majority of the Chesapeake Bay and Endangered Species Funds allocated to the Department of Natural Resources for nongame, threatened and endangered species.

In FY19 the amount spent by the Natural Heritage Program was \$350,100. This comprised 13 percent of that program's operational budget. The total FY19 budget for the program was \$3,151,604. Most of these funds were used to match federal funds from the U.S. Fish and Wildlife Service for endangered species and wildlife diversity conservation. The majority of the projects listed below are funded primarily with these federal funds and matched with tax checkoff dollars, with the exception that most of the plant projects are funded with state money only. Federal funds are only available for federally-listed threatened or endangered species.

The Office of the Secretary also received a portion of Chesapeake Bay and Endangered Species Funds to support the various administrative functions of the department. These administrative functions include personnel, legal, accounting, communications and computer support. In FY19 the amount allocated to the Office of the Secretary was \$49,900.

## **FY19 Expenditures of the Chesapeake Bay and Endangered Species Fund**

### Office of the Secretary

Object 01: Salaries and Wages \$ 49,900.00

### Wildlife and Heritage Service

Object 01: Salaries and Wages \$ 255,730.85

Object 02: Technical and Special Fees \$ 6,569.67

Object 03: Communications \$ 3,151.41

Object 04: Travel \$ 3,435.74

Object 06: Fuel and Utilities \$ 3,309.31

Object 07: Motor Vehicle Operations and Maintenance \$ 26,433.01

Object 08: Contractual Services \$ 40,445.13

Object 09: Supplies and Materials \$ 6,448.60

Object 10: Equipment Replacement \$ 4,301.28

Object 11: Equipment Additional \$ 0.00

Object 12: Grants, Subsidies & Contributions \$ 0.00

Object 13: Fixed Charges \$ 275.00

## **Wildlife Conservation Projects Funded by the Chesapeake Bay and Endangered Species Fund – FY19**

The following projects were conducted by the Natural Heritage Program during July 2018 through June 2019. These projects were funded in part by the Chesapeake Bay and Endangered Species Fund. For wildlife related projects, these tax checkoff funds were used to match federal funds. For plant related projects, Chesapeake Bay and Endangered Species Funds supported the project entirely or in part since federal funds are only available for federally-listed threatened or endangered plant species.

### Wildlife projects

- Assess response to Puritan tiger beetle habitat restoration
- Assess the status of rare, threatened and endangered animals
- Assist with the development of the 3<sup>rd</sup> Maryland-DC Breeding Bird Atlas
- Bog turtle population and habitat monitoring
- Conduct bat acoustic and mist net surveys
- Conserve diamond-backed terrapin populations
- Coordinate development of the Maryland Bird Conservation Partnership
- Freshwater mussel monitoring
- Hellbender monitoring and habitat enhancements
- Investigate occurrence of white nose syndrome in hibernating bats
- Monitor Allegheny woodrat populations
- Monitor and conserve colonial waterbird populations
- Monitor wintering golden eagles
- Monitor hibernacula for wintering bats
- Monitor Puritan and northeastern beach tiger beetles
- Participate in regional bird conservation efforts, including conservation planning for

- black rail
- Improve pollinator habitats
- Provide assistance to the Important Bird Area Program
- Provide technical assistance for bog turtles
- Provide technical guidance to private landowners interested in migratory bird habitat management on their lands
- Provide technical assistance for land management for rare butterflies
- Targeted inventory and monitoring for rare animal species

#### Plant projects

- Assess the status of rare, threatened and endangered plants
- Assist with development of Maryland Plant Atlas
- Delmarva bay ecosystem restoration on the Eastern Shore
- Establish deer exclosures to protect rare plants
- Management of invasive species at Soldiers Delight Natural Environment Area
- Monitor seabeach amaranth reintroduction on Assateague Island
- Monitor sensitive joint-vetch populations
- Natural community classification and inventory
- Rare plant herbarium collection management
- Rare plant inventory and population monitoring
- Research on endangered and threatened plants for conservation planning, such as Kate's Mountain clover
- Restore and manage sandplain gerardia habitat
- Shale barrens restoration in Western Maryland, Sharptown Bog in Eastern Maryland
- Swamp-pink population monitoring

#### General biodiversity projects

- Assist with assessment of lands for state acquisition or easements
- Biodiversity assessment of department lands
- Conduct environmental reviews for impacts to species at risk
- Update Maryland's Biodiversity Conservation Network map
- Complete a Natural Areas Inventory to describe and help preserve priority sites within the Biodiversity Conservation Network
- Educate the public about nongame wildlife, threatened and endangered species, and natural communities
- Manage the rare, threatened and endangered species database
- Participate in regional conservation planning
- Participate in Northeast Regional Conservation Needs projects
- Technical assistance for land use planning and management

#### **Promotional Efforts**

By law, no more than 5 percent of the donations collected in a given year may be used to promote the tax checkoff. The department provides up to 5 percent of the annual allocation of the Chesapeake Bay and Endangered Species Fund to the Chesapeake Bay Trust to develop and fund the promotional campaign each year. In FY19, the amount provided to the Trust was \$22,808. This amount is included in the reported department expenditures in object 08 (contractual services).
