RE: Reporting of Information Concerning Student Health (MSAR #9854)

Dear Governor Hogan, President Miller, and Speaker Busch:

The attached summary report is submitted in accordance with *2012 HB9, Education – Children and Youth – Reporting of Information Concerning Student Health, Well-Being, and Growth* and *SB 867/HB1401, State Department of Education – Oral Health Education*. The bills require the Maryland State Department of Education (MSDE) to submit to the Governor and the General Assembly a summary of the information reported by the MSDE to the State Superintendent during the certification of the health education state curriculum. MSDE has four required reports that request the same information to be submitted every five years; in future submissions these reports will be submitted simultaneously.

Should you have questions or need additional information, please contact Mr. Christopher Hersl, Educational Specialist for Health Education, at (410) 767-0327 or via email at christopherc.hersl@maryland.gov.

Best regards,

Karen B. Salmon, Ph.D.
State Superintendent of Schools

Summary of Information Concerning Student Health,
Well-Being and Growth
in Maryland's Local School Systems

April 2017

Pursuant to ED § 7-411.1

(MSAR #9854)

The Department of Curriculum, Accountability and Assessment at the Maryland State Department of Education (MSDE) has taken multiple steps to support and facilitate education concerning diabetes, its treatment and prevention, in addition to the topics of dating violence and oral health education in each local school system.

On multiple occasions since the passage of 2009 legislation encouraging dating violence education and 2012 legislation addressing diabetes and oral health, local school system health education coordinators were briefed on the requirements and provided clarification for specific standards that included the required information as well as the obligation to report its inclusion in local curriculum.

Resources from state agencies such as the Department of Health and Mental Hygiene as well as outside advocate and medical groups were shared with local education agencies representatives. Time was dedicated at multiple briefings to allow doctors and other experts to address the group about the importance of the education and specific best practices for inclusion in lessons for students.

As a part of ongoing communication, the Office of Comprehensive Health Education has shared resources that are available for local education agencies through online newsletters and multiple other communication methods. Communication with local districts and partner groups is expected to continue on a regular timeline.

During the 2015 certification of the COMAR 13A.04.18, *Comprehensive Health Education Instructional Programs for Grades Pre-kindergarten – 12*, twenty-four local school systems certified that they had implemented a curriculum that includes diabetes, its treatment and prevention; oral disease prevention and dental health promotion and dating violence as part of their local Comprehensive Health Education curriculum aligned with the state Comprehensive Health Education Framework. Individual responses from school systems are included with this report.

The section below asks for required reporting information based on legislation passed by			

the Maryland General Assembly. Language provided is directly from the appropriate bill.		Yes	No
N.	The local school system's curriculum includes <i>oral health education, including oral disease prevention and dental health promotion.</i> 2012 Senate Bill 867	X	
O.	<i>Beginning with students entering grades 9 in the 2015-2016 school year, the local school system requires that a student shall complete, as part of the health or physical education curriculum, instruction in cardiopulmonary resuscitation that includes hands-only cardiopulmonary resuscitation and the use of an automated external defibrillator.</i> 2014 House Bill 1336	X	
P.	The local school system's curriculum includes <i>diabetes and its treatment and prevention.</i> 2012 House Bill 9	X	

During the 2013-14 academic year a new elementary health curriculum was piloted in the county with full implementation 2014-15. This curriculum guide is aligned to the national and state curriculum and has been approved by the General Curriculum Committee. A1 was checked no because the frequency and duration of the course does not permit instruction and assessment for all information included within the standards. Harford County Public Schools has gone to great lengths to provide this information and instruction in other creative ways such as through the wellness plans of individual schools. The system is constantly evaluating programs of instruction and their implementation.
