Legislative Services Building, Room 200B, 90 State Circle, Annapolis, MD 21401

Honorable Chairmen and Chairwoman,

In accordance with § 2-1246 of the State Government Article, the Maryland Coordination and Analysis Center (MCAC) is reporting the following information regarding captured License Plate Reader (LPR) data for 2019:

1. **The total number of automatic license plate reader units being operated in the state by law enforcement agencies and submitting data to the center: 481**
2. **The number of automatic license plate reader readings made by a law enforcement agency that maintains an automatic license plate reader database and the number of readings submitted to the center: 16 Law Enforcement Agencies are known to operate their own License Plate Reader storage server. Agencies with an LPR server are required to submit an audit report. MCAC has 14 servers as part of the statewide LPR System. The data on the chart below reflects the data submitted by the agencies to MCAC. Annapolis City Police Department and the Cecil County Sheriff's Office operate an LPR server; however, they do not report to the MCAC.**

The below chart reflects data received by MCAC from allied agencies in 2020.

Maryland Coordination Analysis Center State-Wide LPR System Data Contribution	
Agency	YTD
Anne Arundel County Police Department	47,531,460
Baltimore City Police Department	119,904,891
Baltimore County Police Department	17,939,202
Charles County Police Department	2,339,650
Harford County Police Department	8,014,328
Howard County Police Department	2,304,771
JB Andrews Sharing	206,239
Maryland Transportation Authority (MDTA) Police	250,867,810
MCAC (Maryland State Police)	51,040,872
Montgomery County Police Department	2,257,825
Ocean City Police Department	17,506,825
Prince George's County Police Department	8,293
University of Maryland Police Department	4,285,854
University of Towson Police Department	1,314,203
<b>Grand Total</b>	<b>525,522,223</b>

3. The number of automatic license plate reader readings being retained on the automatic license plate reader database: **525,522,223**
4. The number of requests made to the MCAC: **4,627**
5. The number of requests that resulted in a release of information: **3,095**
6. The number of out of state requests: **399**
7. The number of federal requests: **786**
8. The number of out of state requests that resulted in a release of information: **204**
9. The number of federal requests that resulted in a release of information: **601**
10. Any data breaches or unauthorized uses of the automatic license plate reader database:  
**No**

11. A list of audits that were completed by the center or a law enforcement agency: A random selection of at least 1% of all relevant request (4,627\* 0.01 = 47. Minimum required per MCAC Model Audit Policy is 50). 58 Records were audited.
12. The Department of State Police and any law enforcement agency using an automatic license plate reader system shall adopt procedures relating to the operation and use of the system. The procedures shall include:
  - i. Which personnel in the Center or a law enforcement agency are authorized to query captured plate data gathered by an automatic license plate reader system: **Forty-three (43) Maryland Coordination and Analysis Center employees are authorized to query the database.**
  - ii. An audit process to ensure that information obtained through the use of an automatic license plate reader system is used only for legitimate law enforcement purposes, including audits of requests made by individual law enforcement agencies or an individual law enforcement officer: **The Maryland Coordination and Analysis Center developed and implemented a Model Audit Policy in August 2015. The policy was disseminated to all Maryland law enforcement agencies on October 1, 2015. The audit process is explained above in question #11. See attached supporting documentation.**

**Procedures and safeguards to ensure that Center staff with access to the automatic license plate reader database are adequately screened and trained. The MCAC procedures and safeguards consist of the following training and standards:**

- a. **28 CFR Part 23 - Collection and Exchange of Intelligence Records.**
- b. **Maryland Coordination and Analysis Center License Plate Reader Standard Operating Procedures.**
- c. **8 Hour License Plate Reader Practicum training approved through the Maryland Police Training and Standards Commission.**
- d. **All Maryland Coordination and Analysis Center personnel have a background clearance completed by the Department of Homeland Security and/or FBI.**

**David Engel  
Director  
Maryland Coordination and Analysis Center**

Chief of Police

Honorable Chairmen and Chairwoman,

In accordance with § 2-1246 of the State Government Article, The Anne Arundel County Police Department and Analysis Center (MCAC) is reporting the following information regarding License Plate Reader data for 2020:

1. The total number of automatic license plate reader units being operated in the state by law enforcement agencies and the number of units submitting data to the Maryland Coordination and Analysis Center:

The Anne Arundel County Police Department has a total of 9 fixed LPR sites (36 individual cameras) and 29 mobile units (55 individual cameras operated in pairs). All units operated by the Anne Arundel County Police department submit data to the Maryland Coordination and Analysis Center.

2. The number of automatic license plate reader readings made by a law enforcement agency that maintains an automatic license plate reader database and the number of readings submitted to the Maryland Coordination and Analysis Center.

In 2020, the Anne Arundel County Police Department conducted 47,531,460 license plate reads from both fixed and mobile LPR readers. Barring any technological issues, every reading was submitted to the Maryland Coordination and Analysis Center.

3. The number of automatic license plate reader readings being retained on the automatic license plate reader database.

No license plate readings or data from the calendar year 2020 are being retained in the local Anne Arundel County license plate reader database. The Anne Arundel County Police Department submits all plate reader readings to the Maryland Coordination and Analysis Center and only maintains 24 hours (1 day) of historical readings from its fixed sites, on its local automatic license plate reader server. All LPR readings older than 24 hours (1-day) are automatically purged from the database. The Anne Arundel County Police Department has "zero" retention of "historical" LPR reading obtained from mobile LPR units.

Anne Arundel County Police Department  
8495 Veterans Highway Millersville, Maryland 21108  
(410) 222-8050  
[www.aacounty.org/police](http://www.aacounty.org/police)

**Amal Awad**  
**Chief of Police**

4. The number of requests made to the law enforcement agency that maintains an automatic license plate reader database for automatic license plate reader data, including specific numbers for:

a. The number of requests that resulted in a release of information.

Zero. (There were no requests from another agency to access the Anne Arundel County database.)

b. The number of out of state requests.

Zero. (There were no requests from another agency to access the Anne Arundel County database.)

c. The number of federal requests.

Zero. (There were no requests from another agency to access the Anne Arundel County database.)

d. The number of out of state requests that resulted in a release of information.

Zero. (There were no requests from another agency to access the Anne Arundel County database.)

e. The number of federal requests that resulted in a release of information.

Zero. (There were no requests from another agency to access the Anne Arundel County database.)

5. Any data breaches or unauthorized uses of the automatic license plate reader database.

There were no data breaches or unauthorized use of the automatic license plate reader database.

6. A list of audits that were completed by the law enforcement agency.

The Anne Arundel County Police Department conducted 38 queries of historical data stored on the automatic license plate reader database/server for calendar year 2020. Of the 38 queries, 37 were for a verifiable law enforcement purpose. The remaining 1 query was an audit, system function tests to ensure system functionality or training.

Anne Arundel County Police Department  
8495 Veterans Highway Millersville, Maryland 21108  
(410) 222-8050  
[www.aacounty.org/police](http://www.aacounty.org/police)

**Amal Awad**  
**Chief of Police**

The Department of State Police and any law enforcement agency using an automatic license plate reader system shall adopt procedures relating to the operation and use of the system. The procedures shall include:

1. Which personnel in the law enforcement agency are authorized to query captured plate data gathered by an automatic license plate reader system.

Anne Arundel County Police Index Code 1834 states:

*“Historical data maintained on Anne Arundel County Police computer servers may only be accessed by authorized agency personnel and authorized MCAC members. Only trained personnel may access system data on the Anne Arundel County computer server. Training is provided through the Technology Section. Access to the system is issued through user name, password and access level control as granted by the LPR Administrator via the Technology Section. Accessibility levels determine if personnel can add tags, conduct queries and/or run audit reports. Activity of all users is tracked and logged for audit purposes”....*

Currently there are 9 users authorized to query the database.

2. An audit process to ensure that information obtained through the use of an automatic license plate reader system is used only for legitimate law enforcement purposes, including audits of requests made by individual law enforcement agencies or an individual law enforcement officer.

The Anne Arundel County Police Department’s Staff Inspections Unit is charged with conducting and/or reviewing audits to ensure compliance with rules and regulations pertaining to the legitimate use of LPR data. The Anne Arundel County Police Department received the model policy from the Maryland Coordination and Analysis Center and has adopted its recommended audit method.

3. Procedures and safeguards to ensure that department staff with access to the automatic license plate reader database are adequately screened and trained.

Users of the Anne Arundel County Police LPR system are limited and are required to log onto the LPR software via issued county credentials. Activity within the system is logged. Access and scope of access is regulated by the department’s LPR Administrator and is based on job position, job duties or assignment. Only properly trained individuals are permitted to conduct queries on the Anne Arundel County Police license plate reader database. All users (with database query abilities) must successfully complete a 4-hour training class. All users have had undergone background screening by virtue of their employment with the police department.

**Audit Questions (Step 1)**

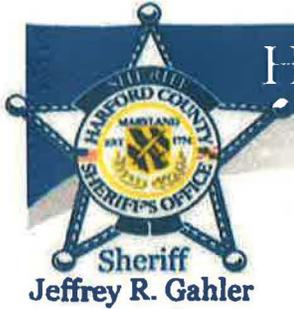

Goal	Question	Answer	Comments
1	Have procedures been adopted relating to the operation and use of the LPR system? [Cite policy number	<u>YES</u> NO	Anne Arundel County Police Department - Index Code 1834 License Plate Reader Program (LPR)
2	Are staff with access to the Automatic License Plate Reader database adequately screened and trained in the proper use of the system and all privacy policies relating thereto?	<u>YES</u> NO	Only LPR administrators and sworn police officers who operate a mobile LPR system are granted access to the local database. All these officers are trained in the proper use and policies governing the use of data.
3	Does the agency maintain training records for each user?	<u>YES</u> NO	
4	Is the training curricula maintained?	<u>YES</u> NO	
5	Are training records annually reviewed for relevancy and effectiveness?	<u>YES</u> NO	
6	Does the agency accept law enforcement requests for license plate data collected by an LPR system?	YES <u>NO</u>	The Anne Arundel County Police Department does not accept outside requests. All outside agency requests are referred to MCAC.
7	If historical data is accessed, does the agency have an audit trail?	<u>YES</u> NO	Access to historical data requires a reason to be logged within the software used to access the historical data. All activity is logged by the LPR software.
8	Is the audit trail maintained for at least 3 years?	<u>YES</u> NO	
9	Have audit procedures been adopted to ensure that information obtained through the use of an LPR system is used only for legitimate law enforcement purposes?	<u>YES</u> NO	The Staff Inspections Unit of the Anne Arundel County Police Department is tasked with ensuring proper use of the LPR system.

Legislative Services Building, Room 200B, 90 State Circle, Annapolis, MD 21401

Honorable Chairman and Chairwoman,

In accordance with § 2-1246 of the State Government Article, the Harford County Sheriff's Office (HCSO) is reporting the following information regarding captured License Plate Reader (LPR) data for 2020:

- 1. The total number of automatic license plate reader units being operated by the HCSO and the number of units submitting data:**

In 2020, the HCSO maintained seventeen (17) automatic license plate reader units (Mobile and Fixed sites).

- 2. The number of automatic license plate reader readings made by a law enforcement agency that maintains an automatic license plate reader database and the number of readings submitted to the center:**

In 2020, the HCSO had 4,963,145 readings. HCSO began electronically sending it's reads to MCAC in August of 2019 and has had a total of 8,465,089 readings since then. HCSO will continue to maintain this partnership with Maryland Coordination and Analysis Center (MCAC).

- 3. The number of automatic license plate reader readings being retained on the automatic license plate reader server:**

In 2020, the HCSO had 4,963,145 readings. HCSO maintains tag read data for a period of 180 days. After 180 days, it is purged from the server.

- 4. The number of requests made to the center and each law enforcement agency that maintains an automatic license plate reader database for automatic license plate reader data, including specific numbers for:**

There were 231 queries of the HCSO LPR reads in 2020. This LPR data is accessible to deputies and detectives of the HCSO upon request through one (1) of the three (3) LPR system administrators, who are trained in the use of the LPR camera systems and the EOC (Enterprise Operations Center), which is the camera system/LPR data interface program. Deputies who wish to operate one of the LPR vehicles receive a four-hour block of instruction. Deputies who wish to have access to remotely monitor the LPR sites for hotlist alerts or to submit a request for HCSO LPR historical data for investigative purposes, receive a one-hour block of instruction on the policies governing the access, use and dissemination of LPR data and in the EOC, so that they may use the information quickly to solve crimes.

- 5. The number of in state requests:**

The HCSO had five (5) requests for LPR data from another Maryland law enforcement agency.

- 6. The number of out of state requests:**

The HCSO had no requests from out of state requests for LPR data.

- 7. The number of federal requests:**

The HCSO had no requests from federal agencies for LPR data.

- 8. The number of out of state requests that resulted in a release of information:**

There were no requests from out of state agencies.

- 9. The number of federal requests that resulted in a release of information:**

There were no requests from federal agencies.

**10. Any data breaches or unauthorized uses of the automatic license plate reader database:**

There were no data breaches or unauthorized uses of the automatic LPR database.

**11. A list of audits that were completed by the center or a law enforcement agency:**

The HCSO LPR auditor conducted an annual audit of LPR queries. There were 231 queries during the year 2020. 50 random queries were selected and an audit was conducted, resulting in a 100% rate of compliance.

When queries of LPR data are requested, officers and detectives are required to provide a police agency case number and the reason for the request before they can proceed. The LPR auditor selects queries at random and checks the case number and reason for the search against the agency's records management database to confirm the case number exists and is for a legitimate law enforcement purpose.

**12. The Department of State Police and any law enforcement agency using an automatic license plate reader system shall adopt procedures relating to the operation and use of the system. The procedures shall include:**

**i. Which personnel in the Center or a law enforcement agency are authorized to query captured plate data gathered by an automatic license plate reader system:** Three HCSO deputies are authorized to query the database, who are LPR Administrators.

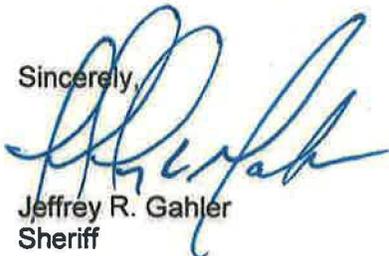

**ii. An audit process to ensure that information obtained through the use of an automatic license plate reader system is used only for legitimate law enforcement purposes, including audits of requests made by individual law enforcement agencies or an individual law enforcement officer:** The HCSO follows MCAC's audit process, which is explained in their Model Audit Policy.

**iii. Procedures and safeguards to ensure that Center staff with access to the automatic license plate reader database are adequately screened and trained.**

The HCSO procedures and safeguards consist of the following training and standards:

- a. HCSO License Plate Reader Policy.
- b. 4 hour License Plate Reader Operator practicum training approved through the Maryland Police Training and Standards Commission for those with vehicle mounted license plate readers.
- c. 1 hour License Plate Reader Dispatcher practicum training for those who remotely monitor license plate reader hotlist alarms.
- d. All HCSO personnel who have access are sworn law enforcement personnel.

Sincerely,

Jeffrey R. Gahler  
Sheriff

Honorable Chairmen,

In accordance with § 2-1246 of the State Government Article, the **Howard County Police Department** is reporting the following information regarding captured License Plate Reader (LPR) data for 2020:

- 1. The total number of automatic license plate reader units being operated in the state by law enforcement agencies and the number of units submitting data to the center.**

In 2020, the Howard County Police maintained seven (7) license plate readers on marked cars, four (4) on unmarked police vehicles, and one (1) pole mounted license plate reader.

## HOWARD COUNTY DEPARTMENT OF POLICE

3410 Court House Drive, Ellicott City, Maryland 21043

- 2. The number of automatic license plate reader readings made by a law enforcement agency that maintains an automatic license plate reader database and the number of readings submitted to the center.**

In 2020, the Howard County Police Department had 2,292,974 readings. The Howard County Police Department began electronically sending its reads to MCAC in the Spring of 2016, and will continue to do so.

- 3. The number of automatic license plate reader readings being retained on the automatic license plate server.**

In 2020, the Howard County Police Department had 2,292,974, with each read being maintained for a period of one year. Records are automatically purged after one year, unless it is deemed to possess evidentiary value to a criminal investigation.

- 4. The number of requests made to the center and each law enforcement agency that maintains an automatic license plate reader database for automatic license plate reader data, including specific numbers for:**

There were 997 queries conducted by the Howard County Police Department in 2020. This LPR data is accessible to officers and detectives of the Howard County Police Department, who are trained in the use of the LPR camera system and proprietary software that interfaces with the camera system, the Enterprise Operations Center (EOC). The LPR data is only to be accessed and searched for a legitimate law enforcement purpose. Officers who wish to operate one of the LPR vehicles, or have access to the Howard County Police LPR data, must receive adequate training on policies governing access, as well as use and dissemination of LPR data in EOC.

- 5. The number of out of state requests.**

The Howard County Police Department did not receive any out of state requests or requests from additional Maryland jurisdictions.

- 6. The number of federal requests.**

The Howard County Police Department did not receive any federal requests.

- 7. The number of out of state requests that resulted in a release of information.**

There were no out of state requests.

## HOWARD COUNTY DEPARTMENT OF POLICE

3410 Court House Drive, Ellicott City, Maryland 21043

**8. The number of federal requests that resulted in a release of information.**

There were no federal requests.

**9. Any data breaches or unauthorized uses of the automatic license plate reader database.**

None.

**10. A list of audits that were completed by the center or a law enforcement agency.**

The Howard County Police Department's LPR Coordinator conducted monthly audits of LPR queries. Seventy-eight of 997 queries were selected at random and audited, with one hundred percent compliance rate. Members conducting queries are required to provide a case number and nature of investigation associated with the query.

See attached document for further details.

**11. The Department of State Police and any law enforcement agency using an automatic license plate reader system shall adopt procedures relating to the operation and use of the system. The procedures shall include:**

- 1. Which personnel in the center or law enforcement agency are authorized to query captured plate data gathered by an automatic license plate reader system.**

Trained personnel identified in HCPD Special Order 2011-03 License Plate Recognition Program.

- 2. An audit process to ensure that information obtained through the use of an automatic license plate reader system is used only for legitimate law enforcement purposes, including audits of requests made by individual law enforcement agencies or an individual law enforcement officer.**

HCPD follows MCAC's audit process, which is explained in their Model Audit Policy, received in October 2015.

**HOWARD COUNTY DEPARTMENT OF POLICE**  
3410 Court House Drive, Ellicott City, Maryland 21043

**3. Procedures and safeguards to ensure that center staff with access to the automatic license plate reader database are adequately screened and trained.**

HCPD has a training curriculum, present by MPTC certified instructors, which consists of the following:

- Sworn HCPD law enforcement officers selected
- Lecture and practical instruction of both software and hardware incorporated with automatic license plate readers
- Review of Special Order 2011-03 License Plate Recognition Program

Sincerely,

The Honorable Adrienne A. Jones- Co-Chair  
c/o Department of Legislative Services  
Legislative Services Building, Room 200B, 90 State Circle, Annapolis, MD 21401

Honorable Chairmen and Chairwoman,

In accordance with § 2-1246 of the State Government Article, the Maryland Coordination and Analysis Center (MCAC) is reporting the following information regarding captured License Plate Reader (LPR) data for 2019:

- 1. The total number of automatic license plate reader units being operated by the Cecil County Sheriff's Office and submitting data to the Agency:**

MAIN OFFICE  
107 Chesapeake Blvd., Ste. 112  
Elkton, Maryland 21921  
410-996-5500 410-996-5518 fax

DETENTION CENTER &  
COMMUNITY CORRECTIONS  
500 Landing Lane  
Elkton, Maryland 21921  
410-996-5800 CCDC 410-996-5525 fax  
410-996-5518 CC 410-996-5515 fax

## Cecil County Sheriff's Office Scott A. Adams, Sheriff

During the reporting period, six License Plate Reader Systems report data to CCSO. Three of the LPR systems are mobile units (inoperable for most of the calendar year) and three are a fixed unit.

2. The number of automatic license plate reader readings made by a law enforcement agency that maintains an automatic license plate reader database and the number of readings submitted to the center:

The Cecil County Sheriff's Office captured reads on the Agency server. The server was operational throughout 2020. The same number of reads were submitted.

3. The number of automatic license plate reader readings being retained on the automatic license plate reader database:

As of December 31, 2020, 320,080 reads were on the ALPR database.

4. The number of requests made to the Server:

The number of searches that were conducted in 2020 was 298.

5. The number of requests that resulted in a release of information:

100 reports were exported that contained LPR data.

6. The number of out of state requests: 0

7. The number of federal requests: 0

8. The number of out of state requests that resulted in a release of information: 0

9. The number of federal requests that resulted in a release of information: 0

10. Any data breaches or unauthorized uses of the automatic license plate reader database: No

410-996-5518 CC 410-996-5515 fax

## Cecil County Sheriff's Office Scott A. Adams, Sheriff

### 11. A list of audits that were completed by the center or a law enforcement agency:

A random selection of at least 1% of all relevant requests ( $298 * 0.01 = 2.98$ . Minimum required per CCSO Policy and Procedure is 1% of requests or a minimum of 50) 50 records were audited.

### 12. The Department of State Police and any law enforcement agency using an automatic license plate reader system shall adopt procedures relating to the operation and use of the system. The procedures shall include:

- i. Which personnel in the Center or a law enforcement agency are authorized to query captured plate data gathered by an automatic license plate reader system:

Twenty-eight (28) Cecil County Sheriff's Office employees are authorized to query the database.

- ii. An audit process to ensure that information obtained through the use of an automatic license plate reader system is used only for legitimate law enforcement purposes, including audits of requests made by individual law enforcement agencies or an individual law enforcement officer:

The Maryland Coordination and Analysis Center developed and implemented a Model Audit Policy in August 2015. The policy was disseminated to all Maryland law enforcement agencies on October 1, 2015. The audit process is explained above in question #11.

- iii. Procedures and safeguards to ensure that Center staff with access to the automatic license plate reader database are adequately screened and trained. The MCAC procedures and safeguards consist of the following training and standards:

- a. Cecil County Sheriff's Office Policy #44, updated in 2019 to reflect the deployment of the server.
- b. Eight-hour License Plate Reader Practicum training.

Cecil County Sheriff's Office  
Automatic License Reader Audit

Goal	Question	Answer	Comments
1	Have procedures been adopted relating to the operation and use of the LPR system? [Cite policy number]	YES	Chapter 44
2	Are staff with access to the Automatic License Plate Reader database adequately screened and trained in the proper use of the system and all privacy policies relating thereto?	YES	
3	Does the agency maintain training records for each user?	YES	With Training Coordinator
4	Is the training curricula maintained?	YES	
5	Are training records annually reviewed for relevancy and effectiveness?	YES	
6	Does the agency accept law enforcement requests for license plate data collected by an LPR system?	NO	No external agency has access at this time.
7	If historical data is accessed, does the agency have an audit trail?	YES	
8	Is the audit trail maintained for at least 3 years?	YES	
9	Have audit procedures been adopted to ensure that information obtained through the use of an LPR system is used only for legitimate law enforcement purposes?	YES

**SUBJECT:** License Plate Reader (LPR) Program required information per Public Safety Article § 3- 509

**Maryland House Judiciary Committee:**  
The Honorable Luke H. Clippinger - Chair  
House Office Building, Room 101  
6 Bladen Street, Annapolis, MD 21401

**Maryland Senate Judicial Proceedings Committee:**  
The Honorable William C. Smith Jr.- Chair  
Miller Senate Office Building, 2 East Wing  
11 Bladen Street, Annapolis, MD 21401 - 1991

**Maryland Legislative Policy Committee:**  
The Honorable Bill Ferguson - Co-Chair  
The Honorable Adrienne A. Jones - Co-Chair  
c/o Department of Legislative Services  
Legislative Services Building, Room 200B, 90 State Circle, Annapolis, MD 21401

Honorable Chairmen,

In accordance with § 2-1246 of the State Government Article, the Baltimore Police Department is reporting the following information regarding captured License Plate Reader (LPR) data for 2020:

- 1. The total number of automatic license plate reader units being operated in the state by law enforcement agencies and the number of units submitting data to the center:**

**During the reporting period, sixty- eight License Plate Reader Systems reported data to BPD. Thirty- three of the LPR systems are mobile units, thirty-one are fixed units and four are portable trailers.**

2. **The number of automatic license plate reader readings made by a law enforcement agency that maintains an automatic license plate reader database and the number of readings submitted to the Baltimore Police Department:**

**The Baltimore Police Department captured 120,704,862 reads on the Police Department's server. The server was operational throughout 2020. An additional 18,796 reads were submitted by the Department of Transportation's LPR readers. The total number of reads submitted for 2020 was 120,723,658.**

3. **The number of automatic license plate reader readings being retained on the automatic license plate reader database:**

**As of December 31, 2020, one hundred twenty million, seven hundred twenty-three thousand, six hundred fifty-eight reads were on BPD's server.**

4. **The number of requests made to the agency:**

**The number of searches that were conducted in 2020 was 28,763.**

5. **The number of requests that resulted in a release of information:**

**Five hundred forty-six reports were exported that contained LPR data**

6. **The number of out of state requests: 0**

7. **The number of federal requests: 0**

8. **The number of out of state requests that resulted in a release of information: 0**

9. **The number of federal requests that resulted in a release of information: 0**

10. **Any data breaches or unauthorized uses of the automatic license plate reader database:0**

11. **A list of audits that were completed by the center or a law enforcement agency:**

**Two hundred and eighty-eight searches were audited, one percent of 28,763 records that were searched.**

12. **The Department of State Police and any law enforcement agency using an automatic license plate reader system shall adopt procedures relating to the operation and use of the system. The procedures shall include:**

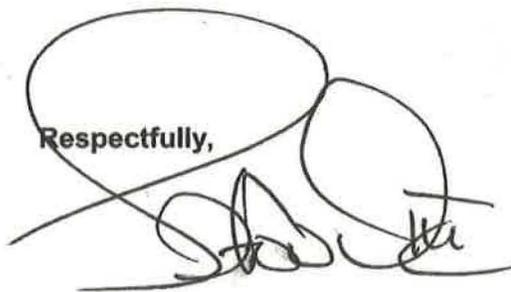

- I. **Which personnel in the Center or a law enforcement agency are authorized to query captured plate data gathered by an automatic license plate reader system:**

**Currently, there are 620 Baltimore Police Department and related agencies employees that are authorized to query the database.**

**ii. An audit process to ensure that information obtained through the use of an automatic license plate reader system is used only for legitimate law enforcement purposes, including audits of requests made by individual law enforcement agencies or an individual law enforcement officer:**

**The Maryland Coordination and Analysis Center developed and implemented a Model Audit Policy in August 2015. The policy was disseminated to all Maryland law enforcement agencies on October 1, 2015. The audit process is attached.**

Respectfully,

A handwritten signature in black ink, appearing to read 'S. Hood', written over a horizontal line. The signature is stylized and somewhat cursive.

**Major Samuel Hood  
LPR Program Director  
Baltimore Police Department**

### Audit Questions (Step 1)

Goal	Question	Answer	Comments
1	Have procedures been adopted related to the operation and use of the LPR System? (Cite policy number)	Yes	The current policy is Policy #1015 that was updated in February of 2019.
2	Are staff with access to Automatic License Plate Reader database adequately screen and trained in the proper use of the system and all the privacy policies related to thereto?	Yes	
3	Does the agency maintain training records for each user?	Yes	Agency records are maintained through sign in sheets for training
4	Is the training curriculum maintained?	Yes	BPD officers attended MCAC's Train the Trainer and now maintain training curriculum for both Car Systems and Investigator trainings.
5	Are the training records reviewed for relevance and effectiveness?	Yes	Users are reviewed for assignment and/ or separation. Curriculum is also reviewed and updated.
6	Does the agency accept law enforcement request for license plate captured data collected by and LPR system?	No	
7	If historical data is accessed, does the agency have an audit trail?	Yes	
8	Is the audit trail maintained for at least 3 years?	Yes	The audit trail is kept for 3 years. Our server came on line in August of 2018.
9	Have audit procedures been adopted to ensure that information obtained through the use of an LPR system is used only for legitimate law enforcement purposes?	Yes

FAX: 410-723-4010

February 16, 2021

TO: House Judiciary Committee, Senate Judiciary Proceedings  
Committee, & Legislative Policy Committee

FROM: Ross Buzzuro, Chief of Police, Ocean City, Maryland

SUBJECT: License Plate Reader (LPR) Program information per Public Safety Article 3-509

**Maryland House Judiciary Committee:**

The Honorable Luke H. Clippinger – Chair  
The Honorable Vanessa E. Atterbeary – Vice-Chair  
House Office Building, Room 101  
6 Bladen Street, Annapolis, MD 21401

**Maryland Senate Judicial Proceedings Committee:**

The Honorable William C. Smith – Chair  
The Honorable Jeffery D. Waldstreicher – Vice-Chair  
Miller Senate Office Building, 2 East Wing  
11 Bladen Street, Annapolis, MD 21401 - 1991

**Maryland Legislative Policy Committee:**

The Honorable Bill Ferguson- Co-Chair  
The Honorable Adrienne A. Jones- Co-Chair  
c/o Department of Legislative Services  
Legislative Services Building, Room 200B, 90 State Circle, Annapolis, MD 21401

Honorable Chairmen and Chairwoman,

In accordance with § 2-1246 of the State Government Article, the Maryland Coordination and Analysis Center (MCAC) is reporting the following information regarding captured License Plate Reader (LPR) data for 2020:

**MAYOR**  
RICHARD W. MEEHAN

**CITY COUNCIL**

MATTHEW M. JAMES  
*President*

ANTHONY J. DELUCA  
*Secretary*

PETER S. BUAS  
JOHN F. GEHRIG, JR.  
J. FRANKLIN KNIGHT  
LLOYD MARTIN  
MARK L. PADDACK

**CITY MANAGER**  
DOUGLAS R. MILLER

**CITY CLERK**  
DIANA L. CHAVIS, CMC

[www.oceancitymd.gov](http://www.oceancitymd.gov)

P.O. BOX 158 • OCEAN CITY, MARYLAND • 21843-0158

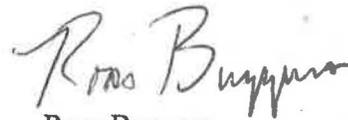

City Hall – (410) 289-8221 • FAX – (410) 289-8703

1. The total number of automatic license plate reader units being operated by the Ocean City Police Department.  
**Fixed Sites: 12**  
**Route 50 – 4 Cameras**  
**Route 90 – 2 Cameras**  
**140th Street- 6 Cameras**
  2. The number of automatic license plate readings made by the Ocean City Police Department.  
**Fixed Sites – 17,506,825**
  3. The number of automatic license plate reader readings being retained on the automatic license plate reader database. **Reads are retained for a 60-day period to ensure the data is successfully transmitted to the Maryland Coordination and Analysis Center, then deleted.**
  4. The number of requests made to the Ocean City Police Department. **Eight Six (86)**
  5. The number of requests that resulted in a release of information. **Fifty (50)**
  6. The number of out of state requests. **One (1)**
  7. The number of federal requests. **Zero (0)**
  8. The number of out of state requests resulting in a release of information. **One (1)**
  9. The number of federal requests that resulted in a release of information. **Zero (0)**
  10. Any data breaches or unauthorized uses of the automatic license plate reader database.  
**No**
  11. A list of audits completed by the Ocean City Police Department. **See attached.**
  12. Any law enforcement agency using an automatic license plate reader system shall adopt procedures relating to the operation and use of the system. **The Ocean City Police Department developed and implemented Standard Operating Procedure OPS-012 outlining departmental procedure for operation and use of L.P.R. systems.**
    - i. Which personnel in the law enforcement agency are authorized to query captured plate data gathered by an automatic license plate reader system. **There are only four (4) Ocean City Police employees authorized to query L.P.R. data.**
-

- ii. An audit process to ensure that information obtained through the use of an automatic license plate reader system is used for legitimate law enforcement purposes, including audits of requests made by individual law enforcement agencies or an individual law enforcement officer. **See attached request form / audit.**
  
- iii. Procedures and safeguards to ensure that staff with access to the automatic license plate reader database are adequately screened and trained. **The four (4) authorized personnel all have background clearances.**

For additional information, please contact the Ocean City Police Department License Plate Reader Administrator DFC Edward Newcomb at 410-723-6610 or at [enewcomb@oceancitymd.gov](mailto:enewcomb@oceancitymd.gov).

Ross Buzzuro  
Chief of Police  
Ocean City Police Department

Goal	Question	Answer	Comments
1	Have procedures been adopted related to the operation and use of the LPR System? (Cite policy number)	Yes	Standard Operating Procedure OPS-012
2	Are staff with access to Automatic License Plate Reader database adequately screen and trained in the proper use of the system and all the privacy policies related to thereto?	Yes	All License Plate Reader users must receive training prior to being given access to the viewer software
3	Does the agency maintain training records for each user?	Yes	
4	Is the training curriculum maintained?	Yes	
5	Are the training records reviewed for relevance and effectiveness?	Yes	
6	Does the agency accept law enforcement request for license plate captured data collected by and LPR system?	Yes	
7	If historical data is accessed, does the agency have an audit trail?	Yes	
8	Is the audit trail maintained for at least 3 years?	Yes	
9	Have audit procedures been adopted to ensure that information obtained through the use of an LPR system is used only for legitimate law enforcement purposes?	Yes	See attached request form

Ocean City Police Department  
**Standard Operating Procedure**

**S.O.P.-OPS 012**  
Effective: 07/27/2011

**Subject: Automated License Plate Recognition**

**Table of Contents**

- I. Purpose:**
- II. Definitions:**
  - A. A.L.P.R.**
  - B. Read**
  - C. Alert**
  - D. Hit**
  - E. Hot List**
  - F. A.L.P.R. System**
  - G. Active A.L.P.R. Data**
  - H. Historical A.L.P.R. Data**
- III. Policy:**
- IV. Procedures:**
  - A. General**
  - B. Administration**
  - C. A.L.P.R. Deployment and Use**
  - D. A.L.P.R. Data Sharing and Dissemination**
  - E. Maintenance**

**I. Purpose:**

The purpose of this policy is to provide employees with guidelines on the proper use of automated license plate recognition (A.L.P.R.) systems.

**II. Definitions:**

- A. **A.L.P.R.** Automated License Plate Recognition.
- B. **Read:** Digital images of license plates and vehicles and associated metadata (date, time, and geographic coordinates associated with the vehicle image capture) that are captured by the A.L.P.R. system database.
- C. **Alert:** A visual and/or auditory notice that is triggered when the A.L.P.R. system receives a potential "hit" on a license plate.
- D. **Hit:** A read matched to a plate that has previously been registered on an agency's "hot list" of vehicle plates related to stolen vehicles, wanted vehicles, or other factors supporting investigation, or which has been manually registered by an operator for further investigation. A hit is not conclusive confirmation of a match.
- E. **Hot list:** A database of license plate numbers of stolen cars, vehicles owned by persons of interest, and vehicles associated with AMBER Alerts that are regularly added to "hot lists" circulated among law enforcement agencies. Hot list information can come from a variety of sources, including stolen vehicle information from the National Insurance Crime Bureau and the National Crime Information Center (NCIC), AMBER Alerts, Department of Homeland Security watch lists, Maryland Motor Vehicle Administration lists, as well as Departmental lists. These lists serve an officer safety function as well as an investigatory purpose. In addition to agency supported hot lists, operators may also manually add information to hot lists in order to be alerted if and when a vehicle license plate of interest is "read" by the A.L.P.R. system.
- F. **A.L.P.R. System:** A.L.P.R. cameras and/or computers and software that are affixed, either permanently or temporarily to a law enforcement vehicle or to a fixed object.
- G. **Active A.L.P.R. Data:** Information provided to an A.L.P.R. operator in real-time in the form of alerts that a license plate number contained in the hot list is near an A.L.P.R. unit. This includes A.L.P.R. data recorded during a patrol shift that is contained in the ALPR and has not been transferred to the historical database server.
- H. **Historical A.L.P.R. Data:** A database containing the dates, times, and locations of individually identifiable motor vehicles that is stored for future use

### III. Policy:

A.L.P.R. systems are primarily used for the identification of stolen vehicles, stolen license plates, and wanted and missing persons. It is the policy of the Department that A.L.P.R. systems will be utilized only by sworn employees or by authorized administrators who are trained in the use of A.L.P.R. systems.

### IV. Procedures:

#### A. General

1. The use of A.L.P.R. systems and access to its database records is restricted and shall be used in accordance with the manufacturer's recommendations and this policy
2. No employee shall use or authorize the use of A.L.P.R. database records for reasons that are not legitimate law enforcement purposes. Misuse of this equipment and associated databases, or data, may result in disciplinary action.
3. A.L.P.R. systems and A.L.P.R. database records and any associated media are the property of the Department and are intended for law enforcement purposes.

#### B. Administration

1. The Department shall designate an employee(s) with administrative oversight for A.L.P.R. system deployment and operations who is (are) responsible for the following:
  - a. Establishing protocols for access, collection, storage, and retention of A.L.P.R. databases and associated data.
  - b. Establishing protocols to preserve and document A.L.P.R. reads and "alerts" or "hits" that are acted on in the field or associated with investigations or prosecutions.
  - c. Establishing protocols to ensure the security and integrity of data captured, stored, and/or retained by the A.L.P.R. system.
  - d. Ensuring compliance with the terms of any M.O.U. (memoranda of understanding) associated with A.L.P.R. systems.
2. Designated, trained personnel shall check equipment on a regular basis to ensure functionality and camera alignment. Equipment that falls outside expected functionality shall not be used and shall be removed from service until the A.L.P.R. system is tested and repaired if necessary.
3. A.L.P.R. systems diagnostics and repairs, hardware or software, shall be made by Department authorized sources.

C. A.L.P.R. Deployment and Use

1. At the start of each shift operators shall ensure that the A.L.P.R. system has been updated with the most current hot lists available.
2. Operators can obtain the current hot list at <https://sftp.mdot.state.md.us/> Operators shall then enter their user name and password and obtain the file.
3. Upon receiving an alert, prior to initiating a stop, the A.L.P.R. operator shall utilize whatever information is available to determine the accuracy of the hit by;
  - a. Visually verifying that the vehicle plate number matches the plate number captured by the A.L.P.R. system, including both alphanumeric characters of the license plate and the state of issuance.
  - b. Verify the current status of the information provided by the hit through the Communications Section or MCT query. Receipt of a hit is not sufficient probable cause to initiate a stop without verification. Verification of the information is essential before initiating a stop, furthering the investigation or taking any enforcement action.
4. If an operator verifies a hit as being accurate, the operator shall take appropriate action in accordance with Department policy and procedure.
5. In each case in which a hit is received, the operator should record the disposition of the hit into the A.L.P.R. system by selecting either "Accept" or "Misread"
6. Administrators and operators may manually enter information into the A.L.P.R. system database. Whenever information is manually entered into the database;
  - a. It must be for legitimate law enforcement purposes.
  - b. It is the responsibility of the person entering the information to remove the information once it no longer serves a legitimate law enforcement purpose.
7. Searches of historical A.L.P.R. data within the A.L.P.R. system database shall be conducted in accordance with established departmental policies and procedures.

D. A.L.P.R. Data Sharing and Dissemination

Both active A.L.P.R. data and historical A.L.P.R. data should be considered "for official use only" and can be shared for legitimate law enforcement purposes:

1. When A.L.P.R. data is disseminated outside the Department, it should be documented in a secondary dissemination log.
2. Information sharing among agencies should be dictated in accordance with M.O.U.s or established Departmental policies.

**E. Maintenance**

1. A.L.P.R. operators shall not attempt to modify the A.L.P.R. system equipment or software
2. A vehicle equipped with an A.L.P.R. system shall not be driven into any automatic car wash
3. A.L.P.R. camera lenses may be cleaned in accordance with the manufacturers' recommendations
4. A.L.P.R. operators shall notify a supervisor and the A.L.P.R. Administrators via official channels of any A.L.P.R. equipment needing maintenance or repair.

Honorable Chairman and Chairwoman,

In accordance with Maryland State Government Article 2-1246, the Maryland Transportation Authority Police (MDTAP) submits this report on its use of License Plate Readers in 2020.

Currently the MDTAP uses a deployment of LPR technology at locations throughout Maryland. This deployment consists of nine (9) fixed locations and sixteen (16) mobile units. The nine fixed locations have a total of 84 cameras and the sixteen mobile systems have a total of 32 cameras for a total of 116 cameras in deployment. All cameras are networked to the Maryland Coordination and Analysis Center (MCAC). All reads pass through the MDTA server and then onto MCAC.

MDTA Police Headquarters  
Colonel Kevin M. Anderson, Chief of Police  
4330 Broening Highway • Baltimore, MD 21222  
mdta@mdta.maryland.gov • 410.537.7777 • 711 (MD Relay) • mdta.maryland.gov • epassmd.com

In Calendar year 2020, the MDTAP LPR deployments yielded 241,442,259 reads from the fixed and mobile systems. All reads were submitted to MCAC. No reads remain on the MDTA server past fourteen (14) days.

In 2020 the MDTAP queried the LPR database a total of 116 times. During that time information was released to Maryland law enforcement agencies on nine (9) occasions. Out of the 116 queries, three (3) were for out of state law enforcement agencies and the MDTAP received one (1) request from a federal agency. During that time information was released to one (1) out of state agency.

In 2020 the database was not accessed without proper documentation.

At this time there have been neither known data breaches nor any unauthorized access to the LPR database. Attached is a list of audits conducted by the MDTA.

## **Executive Summary**

License Plate Reader Compliance Audit  
Period: January 1, 2020 through December 31, 2020

The Maryland Transportation Authority (MDTA) Office of Audits has completed its audit to determine if controls were functioning adequately for compliance with State law have been established over access and use of the License Plate Reader (LPR) system and captured plate data. In 2014, Maryland Legislators replaced language in Maryland Annotated Code, Sections 3-509 and 4-326 to address authorized uses of Automatic License Plate Readers and captured plate data. A requirement was added for the Maryland Coordination and Analysis Center (MCAC) to develop a model audit policy for access to and use of automatic license plate reader data. MCAC established its policy dated August 27, 2014 requiring that controls over access and use be audited and the audit results are due to the Senate Judicial Proceedings Committee, the House Judiciary Committee, and the Legislative Policy Committee, based on data from the previous year, on or before March 1 of each year beginning in 2016.

MCAC is the central server to upload and store, read and alarm LPR data from law enforcement agencies across the state of Maryland. In addition, MDTA Police retains LPR data on its server which can be accessed for 14 days before the information is purged.

Based on our review, controls were functioning adequately for compliance with State law over access and use of the License Plate Reader (LPR) system and captured plate data. The audit did not disclose any findings that warrant inclusion in the report.

## **Background Information**

### **Introduction**

License Plate Reader (LPR) systems, provide automated detection and image capture of license plate information. The LPR system consists of high-speed cameras, mounted either at a fixed location or on a mobile patrol vehicle, and a computer to convert data from electronic images of vehicle license plates into an electronically readable format, which then compares the information against specified databases of license plates. If a match is detected, an audible sound occurs and a visual alarm shows the license plate image with the linked information. The system attaches camera identification, date, time, and location information, to include GPS coordinates to the digital image. The image is then maintained electronically in a central location.

The Maryland Coordination and Analysis Center (MCAC) operates a central server to upload and store, read and alarm LPR data from law enforcement agencies across the state of Maryland. Additionally, Maryland Transportation Authority (MDTA) Police retain LPR data on its own server for 14 days before the data is purged. After the 14 day period, information is only available from the MCAC server.

In 2014, Maryland Legislators replaced language in Maryland Annotated Code, Sections 3-509 and 4-326 to address authorized uses of Automatic License Plate Readers and captured plate data. As a result, Maryland law enforcement agencies and the MCAC implemented certain procedures and regulations. This law went into effect October 1, 2014. MCAC established a model audit policy dated August 27, 2014 requiring that controls over access and use be audited and the audit results are due to the Senate Judicial Proceedings Committee, the House Judiciary Committee, and the Legislative Policy Committee, based on data from the previous year, on or before March 1 of each year beginning in 2016.

### **Scope and Methodology**

The Office of Audits conducted an audit of LPR Compliance for the period January 1, 2020 through December 31, 2020. The objective of this audit was to determine if controls were functioning adequately for compliance with State law over access and use of the LPRs and captured plate data. Our audit procedures included inquiries of appropriate personnel and inspections of documents and records related to the controls over access and use of the LPR systems. We also performed other auditing procedures that we considered necessary to achieve our objectives. We believe that the evidence obtained provides a reasonable basis for our findings and recommendations.

MDTA management is responsible for establishing and maintaining effective internal controls. Internal control is a process designed to provide reasonable, but not absolute, assurance that objectives pertaining to the reliability of records and the effectiveness and efficiency of operations, including safeguarding of assets and compliance with applicable laws, rules and regulations, are achieved. Because of inherent limitations in internal control, errors or fraud may nevertheless occur and not be detected.

The Office of Audits acknowledges and appreciates the courtesy and cooperation extended by MDTA Police during the audit.

**Key Statistics**

The following information on LPR use and results was provided by the MDTAP Commander Electronic Enforcement Unit.

**MDTA 2020 LPR Totals**

<b>Reads</b>					
<b>241,442,259</b>					
<b>Warrants</b>	<b>Stolen Vehicles</b>	<b>Stolen Plates</b>	<b>Traffic Arrest</b>	<b>Criminal Arrest</b>	<b>Traffic Stops</b>
<b>47</b>	<b>28</b>	<b>3</b>	<b>5</b>	<b>3</b>	<b>1,258</b>

**Results**

Based on our review, controls were functioning adequately for compliance with State law over access and use of the License Plate Reader (LPR) system and captured plate data. There were 116 searches of the data base of which one search was for system testing while the remaining 115 searches were related to 22 separate requests of information for documented law enforcement purposes. The 22 separate requests resulted in 10 releases of information from the data base. The audit did not disclose any findings that warrant inclusion in the report.

**Subject:** License Plate Reader (LPR) Program  
 Required Information Per Public Safety Article § 3-509

14  
2-19-2021

Honorable Chairpersons:

In accordance with § 2-1246 of the State Government Article, the Charles County Sheriff's Office is reporting the following information regarding captured License Plate Reader (LPR) data for 2020:

- 1. The total number of automatic license plate reader units being operated in the state by law enforcement agencies and the number of units submitting data to the center:**

Currently, there are twenty-five (25) LPR units operated in Charles County.

- 2. The number of automatic license plate reader readings made by a law enforcement agency that maintains an automatic license plate reader database and the number of readings submitted to the Charles County Sheriff's Office:**

Total reads for 2020: 2,339,541

- 3. The number of automatic license plate reader readings being retained on the automatic license plate reader database:**

Total reads retained in the system for 2020: 12,542,214

**4. The number of requests made to the agency:**

Total requests for 2020: 794

**5. The number of requests that resulted in a release of information:**

Total in which information was released in 2020: 516

**6. The number of out-of-state requests:**

0 requests were made from out-of-state

**7. The number of federal requests:**

0 requests were made from federal agencies

**8. The number of out-of-state requests that resulted in a release of information:**

There were 0 out-of-state requests which resulted in a release of information

**9. The number of federal requests which resulted in a release of information:**

There were 0 federal requests which resulted in a release of information

**10. Any data breaches or unauthorized uses of the automatic license plate reader database:**

There were no data breaches or unauthorized uses of the LPR database

**11. A list of audits that were completed by the center or a law enforcement agency:**

A random selection of all queries done in 2020 of at least 1%. 794 requests .01=7.94 MCAC. Model audit requires a minimum of 50 records audited. 50 requests were audited.

**12. The Department of State Police and any law enforcement agency using an automatic license plate reader system shall adopt procedures relating to the operation and use of the system. The procedures shall include:**

- i. **Which personnel in the center or law enforcement agency are authorized to query captured plate data gathered by an automatic license plate reader system:**

Forty-seven (47) Charles County Sheriff's Office employees are authorized to query the database

- ii. **An audit process to ensure that information obtained through the use of an automatic license plate reader system is used only for legitimate law enforcement purposes, including audits of requests made by individual law enforcement agencies or an individual law enforcement officer:**

The MCAC has an audit process which is explained in the Model Audit Policy which was sent out to all Maryland law enforcement agencies on October 1, 2015. The process is explained above in question 11. See attached supporting documentation.

The Charles County Sheriff's Office has created training procedures and safeguards to ensure that access to the automatic license plate reader database are adequately screened and trained. Those procedures are as follows:

- a. Review of Charles County Sheriff's Office Policy 3-240
- b. Power Point Presentation explanation of using the system
- c. Review of ELSAG EOC User Guide
- d. Pass NCIC criminal background check

Services  
Legislative Services Building,  
Room 200B, 90 State Circle,  
Annapolis, MD 2140

**Honorable Chairmen,**

In accordance with 2-1246 of the State Government Article, the Towson University Police Department is reporting the following information regarding captured License Plate Reader (LPR) data for 2019:

- 1. The total number of automatic license plate reader units being operated in the state by law enforcement agencies and the number of units submitting data to the Maryland Coordination and Analysis Center:**

The Towson University Police Department has a total of:

6 fixed LPR sites (10 individual cameras) and  
1 mobile units (2 individual cameras operated in pair).

All units operated by the Towson University Police department submit data to the Maryland Coordination and Analysis Center.

2. **The number of automatic license plate reader readings made by a law enforcement agency that maintains an automatic license plate reader database and the number of readings submitted to the Maryland Coordination and Analysis Center:**

In 2020, the Towson University Police Department obtained 1,314,203 license plate readings. Barring any technological issues, every reading was submitted to the Maryland Coordination and Analysis Center.

3. **The number of automatic license plate reader readings being retained on the automatic license plate reader database:**

The Towson University Police Department submits all plate reader readings to the Maryland Coordination and Analysis Center and only maintains the past twenty four (24) hours of readings on its local automatic license plate reader database (Barring any technological issues). The number of readings in the database varies from day-to-day due to fluctuating traffic patterns.

No license plate readings from the calendar year 2020 are being retained in the local Towson University Police license plate reader database.

4. **The number of requests made to the law enforcement agency that maintains an automatic license plate reader database for automatic license plate reader data, including specific numbers for:**

Note: The Towson University Police does not accept requests from outside law enforcement agencies for automatic plate reader data.

- a. **The number of requests that resulted in a release of information:**

Zero. (There were no requests from another agency to access the Towson University Police database.)

- b. **The number of out of state requests:**

Zero. (There were no out of state requests to access the Towson University Police database.)

- c. **The number of federal requests:**

Zero. (There were no requests from federal agencies to access the Towson University Police database.)

- d. **The number of out of state requests that resulted in a release of information:**

Zero. (There were no requests from another agency to access the Towson University Police database.)

- e. **The number of federal requests that resulted in a release of information:**

Zero. (There were no requests from federal agencies to access the Towson University Police database.)

5. **Any data breaches or unauthorized uses of the automatic license plate reader database.**

There were no known data breaches or unauthorized use of the automatic license plate reader database.

**6. A list of audits that were completed by the law enforcement agency:**

The Towson University Police Department conducted an audit on the automatic license plate reader database for calendar years 2015, 2016, 2017, 2018, 2019, and 2020 queries.

Members of the Towson University Police Department, for investigative or administrative tasks, queried the Towson University Police "ELSAG" Enterprise Operations Center (EOC) database 14 times in calendar year 2020. 14 queries were selected for audit as a specified minimum. The audit findings are attached to this letter.

**7. The Department of State Police and any law enforcement agency using an automatic license plate reader system shall adopt procedures relating to the operation and use of the system. The procedures shall include:**

**I. Which personnel in the law enforcement agency are authorized to query captured plate data gathered by an automatic license plate reader system.**

Towson University Police General Directive 2.442.04 states:

"Investigations Unit Officers and Officers assigned to supervise the Communications Unit are the Only Employees who are allowed to:

1. Run Investigative Queries on Locally Collected, Active LPR Data;  
And
2. Manage (e.g. Upload, Modify, or remove) local listings."

Currently there are 6 users authorized to query the database.

**II. An audit process to ensure that information obtained through the use of an automatic license plate reader system is used only for legitimate law enforcement purposes, including audits of requests made by individual law enforcement agencies or an individual law enforcement officer.**

The Towson University Police Department's Communications Unit is charged with conducting and/or reviewing audits to ensure compliance with rules and regulations pertaining to the legitimate use of LPR data. The Towson University Police Department received the model policy from the Maryland Coordination and Analysis Center.

**III. Procedures and safeguards to ensure that department staff with access to the automatic license plate reader database are adequately screened and trained.**

Use of the Towson University Police LPR system is restricted to certain personnel and users are required to log onto the LPR software via issued departmental credentials (Active Directory method). Activity within the "ELSAG" Enterprise Operations Center (EOC) is logged. Access and scope of access is regulated by the department's LPR Administrator and is based on job position, job duties, or assignment. Only properly trained individuals are permitted to conduct queries on the Towson University Police license plate reader database. In addition, the following policies and procedures exist in the Towson University Police Manual of General Directives:

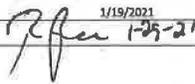

- 2.442 License Plate Recognition Program
- Comm 09.02 License Plate Recognition System
- PS 02.14 Local LPR Listings

**Respectfully Submitted,**

**Maryland Legislative Policy Committee:**

The Honorable Bill Ferguson- Co-Chair  
The Honorable Adrienne A. Jones- Co-Chair  
c/o Department of Legislative Services  
Legislative Services Building, Room 200B, 90 State Circle, Annapolis, MD 21401

Honorable Chairmen and Chairwoman,

In accordance with § 2-1246 of the State Government Article, the Maryland Coordination and Analysis Center (MCAC) is reporting the following information regarding captured License Plate Reader (LPR) data for 2019:

- 1. The total number of automatic license plate reader units being operated in the state by law enforcement agencies and the number of units submitting data to the center: The University of Maryland at College Park Police Department has eight (8) fixed automatic license plate readers located at six (6) entrances to Campus, and two automatic license plate readers mounted to a single vehicle that is non-recording.**
- 2. The number of automatic license plate reader readings made by a law enforcement agency that maintains an automatic license plate reader database and the number of readings submitted to the center: In 2019, the University of Maryland College Park Police**

## Audit Questions (Step 1)

Department had 9,539,404 automatic license plate reads. All reads were submitted to the Maryland Coordination and Analysis Center.

3. The number of automatic license plate reader readings being retained on the automatic license plate reader database: The University of Maryland College Park Police Department retains a temporary automatic license plate reader database. Individual license plate information is stored for period of ninety (90) days after initial read. After that time, the data is automatically purged from the server. The University of Maryland at College Park Police Department does not maintain a permanent database of automatic license plate reads
4. The number of requests made to the University of Maryland College Park Police: 527
5. The number of requests that resulted in a release of information: 170
6. The number of out of state requests: 0
7. The number of federal requests: 0
8. The number of out of state requests that resulted in a release of information: 0
9. The number of federal requests that resulted in a release of information: 0
10. Any data breaches or unauthorized uses of the automatic license plate reader database: No
11. A list of audits that were completed by the center or a law enforcement agency: A random selection of at least 1% of all relevant request ( $4,858 * 0.01 = 49$ . Minimum required per MCAC Model Audit Policy is 50). 50 Records were audited.
12. The Department of State Police and any law enforcement agency using an automatic license plate reader system shall adopt procedures relating to the operation and use of the system. The procedures shall include:

- i. Which personnel in the Center or a law enforcement agency are authorized to query captured plate data gathered by an automatic license plate reader system: The University of Maryland at College Park, Police Department restricts access to its automatic license plate reader system based on assignment.

The Security Operations Center currently has one sworn Lieutenant, a full-time Manager, four full-time Supervisors, and seven part-time lead Monitors that can query historical automatic license plate reader information in conjunction with their duties in conducting historical CCTV video reviews as part of the Security Operations Center's Review Team.

Additionally, the Police Services Bureau Commander (Major), the Internal Affairs sergeant, seven Criminal Investigators, three IT personnel and two service technicians can query historical automatic license plate reader information as part of their duties.

## Audit Questions (Step 1)

ii. An audit process to ensure that information obtained through the use of an automatic license plate reader system is used only for legitimate law enforcement purposes, including audits of requests made by individual law enforcement agencies or an individual law enforcement officer: The Maryland Coordination and Analysis Center developed and implemented a Model Audit Policy in August 2015. The policy was disseminated to all Maryland law enforcement agencies on October 1, 2015. The audit process is explained above in question #11.

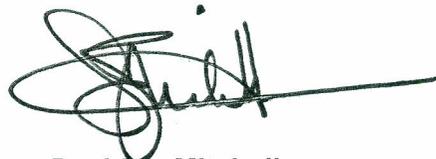

Procedures and safeguards to ensure that Center staff with access to the automatic license plate reader database are adequately screened and trained. The University of Maryland Police Department procedures and safeguards consist of the following training and standards:

All members of the Security Operations Center Video Review Team receive training in the use of the Automatic License Plate Reader Enterprise Operations Center Software as part of their training in becoming part of the Review Team. Full-time Security Operations Center employees undergo a complete background investigation during their initial hire. Part-time employees undergo a basic criminal history background check during their initial hire as required by NCIC. All Security Operations Center employees complete an Information Technology Security Awareness Course as required by NCIC as part of their training.

All sworn employees (SOC Commander, PSB Commander and Criminal Investigators) receive training on the use of the Automatic License Plate Reader Enterprise Operations Center software as part of their assignment. All sworn employees undergo a complete background investigation as part of their initial hire as Law Enforcement Officers. Sworn users have also received training on Information Technology Security Awareness as part of their NCIC certification.

All IT and service technicians undergo complete background investigations prior to being hired. They also complete Information Technology Security Awareness Courses as required by NCIC.

Sincerely,

A handwritten signature in black ink, appearing to read 'David B. Mitchell', with a long horizontal line extending to the right.

David B. Mitchell  
Chief of Police/Director of Public Safety  
University of Maryland College Park

### Audit Questions (Step 1)

Goal	Question	Answer	Comments
1	Have procedures been adopted related to the operation and use of the LPR System? (Cite policy number)	Yes	MCAC Model Policy for LPR adopted by ATAC
2	Are staff with access to Automatic License Plate Reader database adequately screen and trained in the proper use of the system and all the privacy policies related to thereto?	Yes	Clearances/ Employment Screening and Onboarding Process
3	Does the agency maintain training records for each user?	Yes	Paper records maintained by UMPD training unit.
4	Is the training curriculum maintained?	Yes	Yes. Scheduled for review in 2020
5	Are the training records reviewed for relevance and effectiveness?	Yes	Yearly and following training.
6	Does the agency accept law enforcement request for license plate captured data collected by and LPR system?	Yes	RFS Process
7	If historical data is accessed, does the agency have an audit trail?	Yes	
8	Is the audit trail maintained for at least 3 years?	Yes	
9	Have audit procedures been adopted to ensure that information obtained through the use of an LPR system is used only for legitimate law enforcement purposes?	Yes
