THE SENTINEL.

BENJAMIN F. WADDY,

Georgetown, D. C. is our authorized Agent for receiving subscriptions and advertisements.

LATE FROM CALIFORNIA AND OREGON.—California news by pony express to September 19th, has been received at St. Joseph's, Mo.

CALIFORNIA.—There is no State news of importance. The quadrangular political canvass is progressing actively, with no new indications as to the probable result.

OREGON.—Important political news from Oregon is received and published in the San Francisco papers:

"The Oregon legislature met at Salem on the 10th ult. The house organized by choosing for speaker Benjamin Harding, a Douglas democrat, who voted at the last two elections for Mr. Logan, the republican candidate for Congress. T. McPatten, a republican, was elected chief clerk; Mr. Allen, a Douglas democrat, assistant clerk; and Mr. Leverage, a republican, sergeant-at-arms. This organization was regarded by the Breckinridge members as an indication that a Douglas-republican coalition was already formed to elect Col. Baker and S. W. Nesmith United States senators. The constitution of Oregon requires two-thirds of all members elected of each house to form a quorum to do business. Upon receiving the news of the organization of the house six of the Breckinridge senators bolted, absconding from Salem early in the morning of the 11th inst., thus leaving the State senate without a quorum, and in that condition it has continued up to the latest accounts. The names of the senators who withdrew are Florence, Monroe, Berry, McHenry, Fitzhugh, and Shelby, the latter a son-in-law of Gen. Lane.

"A resolution was passed by the Senate empowering the sergeant-at-arms to compel the attendance of the absent members, and to call to his aid whatever force was necessary to do so.

"It is probable that two United States senators will be elected by the coalition between the Douglas men and the republicans.

"Col. E. D. Baker has received the republican nomination in caucus, and will be one of the senators chosen if any election takes place at all. This is generally conceded upon all sides.

"Both houses had adjourned until the 17th inst."

HON. H. W. HOFFMAN ON THE STUMP.—This gentleman made a speech at Cumberland recently. We leave the Bell paper of Allegany tell the tale:

"It was a thorough vindication and endorsement of the course we have seen proper to pursue in our columns throughout the canvass. His denunciation of the fusion in New York and elsewhere on the part of the Bell and Douglas leaders was justly severe and drew out such manifestations as showed that the hearts of his audience beat responsive to his own. He deprecated the effort which was seeking to carry the choice of a President into Congress, and believed that those who were engaged in it could not possibly do the country a worse service; nor could they involve the Union in more tremendous peril or hang a blacker cloud over our political horizon. Regarding the election of Mr. Lincoln as more than probable, he referred to the fact that friend and foe united in pronouncing him honest, and then quoted from Mr. L. wherein he had said that 'all the guarantees those four fathers gave it (slavery) should be *not grudgingly* but fully and fairly maintained.'

"Mr. H. assumed that if Mr. L. was honest in these declarations, as all conceded he was, then the constitutional rights of the South would not be interfered with during his administration. So far as we have been able to ascertain, Mr. H. reflected the opinion of almost the entire Opposition party in this section of the State."

Thus it is admitted that Mr. H. "deprecates the effort to 'carry the election to the House.' The effort to carry the election to the House grows out of an opposition to Lincoln's election. Those in favor of his election, and only such, deprecate the efforts made to defeat him before the people. Mr. H.'s man first wish is an election by the people, and he is sure it will result in the triumph of the Republican party. Is comment necessary?—*Hagerstown Mail.*

HON. JOSEPH LANE.—We extract from the Washington correspondent, "Hawk-Eye," of the "True Democrat" the following significant answer of Gen. Lane to the question propounded to Mr. Douglas at Norfolk, Va. See the difference between Lane's patriotic answer and the demagogical answer of Douglas:

"I was struck the other day with the difference between Old Joe Lane (as he is termed, and Mr. Douglas. A friend asked the old warrior what he thought of this new doctrine that Douglas had proclaimed in Virginia and North Carolina, 'that he would assist Abe Lincoln to coerce a sovereign State of this Union.' His reply was in the very simplicity of his character and without premeditation: 'I NEVER HAVE AND NEVER WILL DRAW MY SWORD AGAINST A PEOPLE FIGHTING FOR THEIR CONSTITUTIONAL RIGHTS.' A nobler sentiment was never uttered, and I would have done credit to Roman virtue in her palmiest and brightest days."

THE DE GROOT CASE.—The Washington papers state that the opinion of Attorney-General Black the 20th of July, upon a point or two in the De Groot case, in reply to questions of the Secretary of War, is simply a statement of law concerning the awarding of damages, and had nothing to do with the merits of the De Groot claim. Now that the case itself is before Judge Black, it is understood that he holds that no damage has been done to De Groot. The attorneys of the latter are now producing decisions of the United States Courts to show that the award in favor of De Groot, having been made by an officer of the Government, under authority of an act of Congress, it cannot be reviewed, but it becomes a vested right, and that payment cannot legally be withheld.

FALL OF A REPUBLICAN WIGWAM.—*Several persons injured.*—A serious accident occurred at the new republican "wigwam," now in progress of erection at Newark, N. J., last Friday. Workmen were engaged in hoisting some timber to the roof, when one of the supports gave way and a scaffolding fell, precipitating seven men to the ground, a distance of some 25 feet. Thos. J. Schenck had his nose and left ankle broken; Peter De Bow had his left thigh broken; Henry De Bow had his back injured; Joseph Frost was knocked senseless, but soon recovered; James Regan was injured; Cornelius Devoe and Frank Blake were also bruised. Mr. Garret Haubsbleck, who was engaged in hauling the timber, was knocked down, but escaped uninjured.

A FAMILY OF CONVICTS.—Among the prisoners sent to the penitentiary at Pittsburg on Saturday last, were five persons belonging to one family—father, mother, two daughters and son-in-law. Their offence was larceny, and it is said that the son-in-law enticed the girls to steal, while the old man and his wife were convicted as receivers of stolen goods.

A COLORED MAN KNIGHTED BY QUEEN VICTORIA.—The Queen of England has conferred the honor of knighthood upon Edward Jordon, of Kingston, Jamaica, a colored man, the son of a man who kept a sweetmeat and pickle store.

There were 2,826 persons arrested for crime in Philadelphia during the month of September.

Ice of considerable thickness was formed in the vicinity of Boston on Monday.

Boots, Shoes, Brogans! HATS, CAPS, ETC.

R. B. GRIFFIN & SONS,

No. 17 South Charles Street, up Stairs,

BALTIMORE, MD.

TO OUR LARGE & COMPLETE FALL STOCK, we call particular attention of Dealers. It consists of—

Proposals for Building Bridge.

OFFICE OF THE COMMISSIONERS
FOR MONTGOMERY COUNTY,
September, 13th, 1860.

SEALED PROPOSALS will be received at this Office, until *TUESDAY, the 16th day of October next*, for building a Bridge over Seneca, at or near Clopper's Mill, agreeably to the specification marked No. 1, or the specification marked No. 2. Bids will be received for either specification; bidders will state which plan they propose for:

Specification No. 1.

Two abutments, 18 feet long each at the bottom, battening to 16 feet at top; 14 feet high at bottom, battening to 12 feet at the top; 8 feet high above low water mark; to rest on a solid foundation of large solid stone, sunk sufficiently in the ground to prevent undermining the same; 2 wing-walls, 2 feet thick at bottom, battening to 16 inches at top; 18 feet in length, and averaging 3 feet in height; the abutments and wing-walls to be built of good solid stone, with strong lime and sand mortar; stone work to be well pointed in with the same material; bridge to be 16 feet between the abutments, and to be 14 feet wide, or 12 feet in the clear; to be built with one solid log each abutment 14 feet long, 12 by 18 inches square; to be confined by a face of iron worked up through each abutment, one bar on each log 5 feet long, 3 by 12 inches square; 5 of the joists, 12 inches square; 5 of the joists, 12 by 12 inches square; to be confined to the sills by means of iron bolts 1¼ inches square, with screws and taps; the ends of the joists between the abutments to rest on the cap sills; 14 feet long, 10 inches square; to be supported on two 2 square posts, 12 by 10 inches square; to be let in a mud sill, 24 feet long, 16 inches square, with 2 posts, 12 inches square, to rest on a mud sill 24 feet long, not less than 18 inches square—mud sill to be let in the ground sufficient depth to prevent frost and water from undermining; the 2 upper sleepers to be confined to the sills with good iron bolts, 1¼ inches square; 4 posts 10 inches square, one to be set and attached to corner of the bridge, with side railing running the entire length of the wing walls, to be confined on the lowest posts, worked up through the wing wall, to be 4 feet high; the flooring not to be less than 2 inches thick, well spiked down; the space between the wing walls to be filled with dirt and well packed; 4 butments.

Two abutments, 18 feet long each at the bottom, sloping to 16 feet at top; 8 feet high from low water mark; 5 feet thick at bottom, sloping to 4 feet at the top; 4 wing-walls to run on each side, measuring 15 feet each in length, 2½ feet thick at the bottom, sloping to 18 inches on the top; wing walls to be well capped with cut stone; the whole work to be executed in a solid and substantial manner, and to be put sufficiently deep under ground to prevent frost and water from undermining or operating upon it; all stone to be laid in good mortar; the space between the wing walls to be filled with stone and mortar; the contractor will be required to build a dam of sufficient height to turn the water to the bridge; all water to be kept without expense to the county; the contractor will be required to take the stone for the work from the Rock of the Seneca, at or near Clopper's Mill, agreeably to the specification marked No. 2. Bids will be received for either specification; bidders will state which plan they propose for:

Specification No. 1.

Two abutments, 18 feet long each at the bottom, battening to 16 feet at top; 14 feet high at bottom, battening to 12 feet at the top; 8 feet high above low water mark; to rest on a solid foundation of large solid stone, sunk sufficiently in the ground to prevent undermining the same; 2 wing-walls, 2 feet thick at bottom, battening to 16 inches at top; 18 feet in length, and averaging 3 feet in height; the abutments and wing-walls to be built of good solid stone, with strong lime and sand mortar; stone work to be well pointed in with the same material; bridge to be 16 feet between the abutments, and to be 14 feet wide, or 12 feet in the clear; to be built with one solid log each abutment 14 feet long, 12 by 18 inches square; to be confined by a face of iron worked up through each abutment, one bar on each log 5 feet long, 3 by 12 inches square; 5 of the joists, 12 inches square; 5 of the joists, 12 by 12 inches square; to be confined to the sills by means of iron bolts 1¼ inches square, with screws and taps; the ends of the joists between the abutments to rest on the cap sills; 14 feet long, 10 inches square; to be supported on two 2 square posts, 12 by 10 inches square; to be let in a mud sill, 24 feet long, 16 inches square, with 2 posts, 12 inches square, to rest on a mud sill 24 feet long, not less than 18 inches square—mud sill to be let in the ground sufficient depth to prevent frost and water from undermining; the 2 upper sleepers to be confined to the sills with good iron bolts, 1¼ inches square; 4 posts 10 inches square, one to be set and attached to corner of the bridge, with side railing running the entire length of the wing walls, to be confined on the lowest posts, worked up through the wing wall, to be 4 feet high; the flooring not to be less than 2 inches thick, well spiked down; the space between the wing walls to be filled with dirt and well packed; 4 butments.

Specification No. 2.

Two abutments, 18 feet long each at the bottom, battening to 16 feet at top; 14 feet high at bottom, battening to 12 feet at the top; 8 feet high above low water mark; to rest on a solid foundation of large solid stone, sunk sufficiently in the ground to prevent undermining the same; 2 wing-walls, 2 feet thick at bottom, battening to 16 inches at top; 18 feet in length, and averaging 3 feet in height; the abutments and wing-walls to be built of good solid stone, with strong lime and sand mortar; stone work to be well pointed in with the same material; bridge to be 16 feet between the abutments, and to be 14 feet wide, or 12 feet in the clear; to be built with one solid log each abutment 14 feet long, 12 by 18 inches square; to be confined by a face of iron worked up through each abutment, one bar on each log 5 feet long, 3 by 12 inches square; 5 of the joists, 12 inches square; 5 of the joists, 12 by 12 inches square; to be confined to the sills by means of iron bolts 1¼ inches square, with screws and taps; the ends of the joists between the abutments to rest on the cap sills; 14 feet long, 10 inches square; to be supported on two 2 square posts, 12 by 10 inches square; to be let in a mud sill, 24 feet long, 16 inches square, with 2 posts, 12 inches square, to rest on a mud sill 24 feet long, not less than 18 inches square—mud sill to be let in the ground sufficient depth to prevent frost and water from undermining; the 2 upper sleepers to be confined to the sills with good iron bolts, 1¼ inches square; 4 posts 10 inches square, one to be set and attached to corner of the bridge, with side railing running the entire length of the wing walls, to be confined on the lowest posts, worked up through the wing wall, to be 4 feet high; the flooring not to be less than 2 inches thick, well spiked down; the space between the wing walls to be filled with dirt and well packed; 4 butments.

The contractor will be required to give bond, with security, for the faithful performance of the work; the Bridge to be completed within 90 days from the time of letting; 50 per cent. upon the completion of the work, and the balance when the Commissioners of Montgomery county will be levied in the annual levy for the year of 1861.

URIAH FORREST, Clerk
to Commissioners.

Various FERTILIZERS always on hand. Call at the Office, No. 519 7th St., Washington, D. C.

E. F. SIMPSON.

aug 24—tf

BAUGH'S RAW-BONE SUPER-PHOSPHATE OF LIME.

ANALYSIS:

Seven Per Cent of Ammonia, and 54 Per Cent. Insoluble Phosphate of Lime.

FOR FALL SEEDING it is an unavailable manure, being in a fine pulverized state.

IT ACTS DIRECTLY, bringing forward the young shoots of the grain and grass, giving them a vigorous growth, healthy color, and imparting strength and stamina.

IT IMPROVES THE LAND PERMANENTLY. It does not, like Peruvian Guano, stimulate the growing crop, and leave the soil exhausted, but leaves the land permanently benefitted.

FARMERS AND PLANTERS GIVE IT A TRIAL.

It is rapidly working its way into favor, and is a reliable fertilizer.

Price $45 per ton of 2,000 lbs., in Baltimore, in strong sacks of 100 lbs. each.

MACDONALD & DUGDALE,
Corner of McElderry's Wharf and Pratt St.
aug 24—y Baltimore, Md.

Proposals for Building Bridge.

OFFICE OF THE COMMISSIONERS
FOR MONTGOMERY COUNTY,
September, 13th, 1860.

SEALED PROPOSALS will be received at this office, until *Tuesday, the 16th day of October next*, for building a bridge over Seneca, at or near Cabin John Mill, agreeably to the specifications of the Commissioners, to wit:

Two abutments, 18 feet long each at the bottom, sloping to 16 feet at the top; 8 feet high from low water mark; 5 feet thick at bottom, sloping to 4 feet at the top; 4 wing walls to run on each side, measuring 15 feet each in length, 2½ feet thick at the bottom, sloping to 18 inches on the top; wing walls to be well capped with cut stone; the whole work to be executed in a solid and substantial manner, and to be put sufficiently deep under ground to prevent frost and water from undermining or operating upon it; all stone to be laid in good mortar; the space between the wing walls to be filled with stone and mortar; the contractor will be required to build a dam of sufficient height to turn the water to the bridge; all water to be kept without expense to the county; the contractor will be required to take the stone for the work from the rock on the land of the late Dr. Stephen N. C. White, and to have the same on the ground by the 1st day of December next; bridge to be 16 feet between the abutments, and to be 14 feet wide, or 12 feet in the clear; to be built with one solid log each abutment 14 feet long, 12 by 18 inches square; to be confined by a face of iron worked up through each abutment, one bar on each log 5 feet long, 3 by 12 inches square; 5 of the joists, 12 inches square; 5 of the joists, 12 by 12 inches square; to be confined to the sills by means of iron bolts 1¼ inches square, with screws and taps; the ends of the joists between the abutments to rest on the cap sills; 14 feet long, 10 inches square; to be supported on two 2 square posts, 12 by 10 inches square; to be let in a mud sill, 24 feet long, 16 inches square, with 2 posts, 12 inches square, to rest on a mud sill 24 feet long, not less than 18 inches square—mud sill to be let in the ground sufficient depth to prevent frost and water from undermining; the 2 upper sleepers to be confined to the sills with good iron bolts, 1¼ inches square; 4 posts 10 inches square, one to be set and attached to corner of the bridge, with side railing running the entire length of the wing walls, to be confined on the lowest posts, worked up through the wing wall, to be 4 feet high; the flooring not to be less than 2 inches thick, well spiked down; the space between the wing walls to be filled with dirt and well packed; 4 butments.

The contractor will be required to give bond, with security, for the faithful performance of the work. The Bridge to be completed within 90 days from the time of letting; 50 per cent. upon the completion of the work, and the balance when the Commissioners of Montgomery county will be levied in the annual levy for the year of 1861.

sep 21—td THE BOARD.

The Premium THRESHER and Horse-Power!

Wheeler's Improved Combined THRESHER & WINNOWER.

IT IS A MODEL OF SIMPLICITY AND COMPACTNESS, and is made in the best manner, and of the best materials. It is provided with a Self-Feeder, which can be attached or detached at pleasure, and which is so constructed that it can be set to feed any quantity of grain, from a single sheaf to a full load, and will not choke or clog. The Power is the most perfect and durable ever offered to the public, and is provided with a Governor, which prevents the machine from running too fast in case the team should start suddenly. The Thresher is provided with a Wind-Stacker, which delivers the straw in a compact stack, and a Grain-Spout, which delivers the grain in bags. The Separator is the most perfect ever invented, and will thresh and clean all kinds of grain, from Timothy to Corn, in the most perfect manner. The Power and Thresher are mounted on four wheels, and can be moved from place to place with ease. The Power is also provided with a Pulley, by which it can be used for driving Saws, Cutting Feed, &c. The Power and Thresher are manufactured at the Eagle Foundry, Frederick City, Md., and are warranted to be as represented in this circular. Price complete, $450. Address

EMERY'S RAILWAY POWER, WHEELER'S RAILWAY POWER, FULTON'S THREE-GEARED POWER, Separate THRESHERS, EMERY'S THRESHERS & CLEANERS, AT FACTORY PRICES.

july 20-2m E. F. SIMPSON.

DRILLS! DRILLS! DRILLS!

WHEAT & GUANO DRILLS!

BICKFORD & HUFFMANS'

CELEBRATED DRILL!

THIS STANDARD DRILL has been in use for the last seven years, and has received the highest premiums at all the State Fairs where exhibited, and is now offered to the public with the confidence that it is the best Drill in use. It is simple in construction, not liable to get out of order, and will sow any kind of grain or seed, from Timothy to Corn, in the most perfect manner. Also, Bickford & Huffman's Patent Grain and Grass Seed Sower, which is attached to the Drill, and sows Grass Seed and Plaster in the most perfect manner. Also, Bickford & Huffman's Patent Corn Planter, which is attached to the Drill, and plants Corn in hills or drills, as desired. Also, Bickford & Huffman's Patent Cultivator, which is attached to the Drill, and cultivates the crop while growing. Also, Bickford & Huffman's Patent Harrow, which is attached to the Drill, and harrows in the seed as fast as sown. Also, Bickford & Huffman's Patent Roller, which is attached to the Drill, and rolls the ground after the seed is sown. Also, Bickford & Huffman's Patent Shovel Plough, which is attached to the Drill, and ploughs the ground for the seed to be sown in. Also, Bickford & Huffman's Patent Scraper, which is attached to the Drill, and scrapes the ground after the seed is sown. Also, Bickford & Huffman's Patent Scraper, which is attached to the Drill, and scrapes the ground after the seed is sown. Also, Bickford & Huffman's Patent Scraper, which is attached to the Drill, and scrapes the ground after the seed is sown.
