The Comptroller's Report.

We have received a copy, in pamphlet form, of the report of the Cor uptroller of the Treas ury, for the fiscal year ending September 30th, the 5th instant. The receipts into the Treasury, from all sources, amounted to \$2,947,819 34, and the disbursements to \$2,475,050:17-leaving a balance in the Treasury, September 34th. of \$492,760 17. The estimates for the present year show a balance of receipts over expendilevy for all purposes for the year 1870, and a comparison of the assessed value of property in 1967 and in 1870. The exemptions under recent laws have diminished the basis of assessment to a very perceptible eftent. Notwithstanding the payment of the large

by the last Legislature, the finances of the State exhibit a healthy status, and the Comp troller fully expects to be able to show, at the close of the present fiscal year, a condition of the Trensury which will justify a reduction of the present taxation. He confidently believes that an economical course on the part of the next Legislature, in regulating their expenditures, and the passage of the proper laws to en force the payment of taxes already due, will enable the direct tax to be repealed. This will be a great relief to the farming interest, how groaning under the immense burdens imposed by the general government. The policy of the federal government in discriminating against ning and producing interests, for the benefit of manufacturers and capitalists, is felt perhaps more severely by the farmers of Maryof the great West.

Spread the Truth. Some medical men insist that it is undigni fied to advertise a remedy, however valuable it may be. Queer reasoning this. It is like aying that an article which the world needs hould be hid in a corner-that benefits and lessings may be too widely diffused-that the neans of protecting and restoring health hould be a close monopoly, and not accessible o all. The argument is, bad. It is worse han that; it is inhuman. 'Suppose Hostetter's tomach Ritters -en absolute specific for dyspepsia, billousness and nervous debility-had ever been known beyond the repertoirs of the aculty, what would have been the conse uence? Instead of curing and invigorating nillions, the good effects of the preparation would have been confined to a comparative ew.
