The mose lay thick beneath my feet,
The fine sighed pyerbad.
The trace of a dismantled fort

Lay in the forest nave,
And in the shadow near my path,
I saw a soldier's grave.

The bramble wrestled with the weed

From dust its words to cleat; But Time had blotted all but thes "A Georgia Volunteer."

I saw the toad and scaly snake

I heard the Shenandoah roll

From tangled coverts start,
And hide themselves among the weeds
Above the dead man's heart;
But undisturbed, is sleep profound,
Unheeding there he lay—
His coffin but the mountain soil,
His shroad, Confed'ate gray.

LE CONTRACTOR

My friend, E. G. Edward, Agent for Walton, Whann of Co., Baltimore, Md.:

At thy instance I was induced to try a small quantity of a fertilizer prepared by the above Company, in the Epring of, 1860, and was so well satisfied with its effects on corn and potatoes, that I used it on my wheat in the Fall following, and also induced several of my weighbors to use several tous. I put no other manure on for polators, and I never had a better crop. I put the same ground, (which was thin,) in wheat last Fall, with noadditions at manure, except a small sprinkling of the same manure, and the result, so far, is that It is the best wheat I have seen this Epring, now heading, and other wheat six to twelve inches high; and, as a general thing, in the section of country where I reside, wheat fooks unusually backward, and prospect of a short crop. I have wheat in the same field, that the ground was manured from Earn Yard, Bone and Penivian Guano, and it is very much behind whann's. I have called the attention of the neighboring farmers to see the wheat, and, without an exception, they say it is the best they have seen.

I am now using Whann's Raw Bone Super Phosphate as the only manure for my corn and potatoes. I used it on an acre of oats, stibble ground, with no additional manure of any kind, and it now looks better than three-fourths of the wheat I have seen. I do not expect to use any other fertilizer this fail for wheat. I think all that is needed, is for farmers to see the effects, to induce them to use it; and, further, I have been to see the manufactory, and am perfectly satisfied that the public may rely upon being supplied with a genuinearticle.

Respectfully, thy friend,
