### TESTIMONIALS.

**Lister's BONE DUST** Price \$40 Per Ton. IT IS RICH in Ammonia and Hone Phosphate of Lime. When used with one-third Peruvian Guano or Guanape, the combination costs from 10 to 12 dollars per ton less than Manipulated Guano or Super-Phosphates.

This combination has no superior in the elements required for the growth of crops; the set of grass and improvement of soil; this I am prepared to show by analysis. Its standard and quality are uniform. Its success has been unvarying.

CIRCULARS with Testimonials from many leading Farmers in Montgomery and adjoining

counties, will be forwarded on application.

POOLESVILER May 13, 1871.

DEAR SIR: Your favor of the 3d instant is reveived. You wish to learn of me the effect of Lister Bone and Peruvian Guano on my wheat crop of last fall. I used these articles in equal parts, at rate of 275 pounds per acce, and seed this about 125 acces, and used this mixture on my entire crop. I never had a crop that primited so well. The crop was seeded on stybble and corolland; I think the lister Bone a very superior article, and I don't think I can say too much in its praise, and it must become very popular. I think it is the very best article mixed with Pruvian Guano for wheat, and at ten to twelve dollars a ton cheaper than \* \* \* \* \* and I think if this fet is fairly set forth to the farmers that they will get a better article, and thereby save ten to twelve dollars per ton. \* Very respectively.

FIREDERDE'S S. Proof F.

Very respectively.
TREDERICK S. POOLE. [\* Here several very popular fertilizers are mentioned, which I deem it proper to omit as I shall also in the following communications: Since the above letter was received, I have seen Mr. Puole and find that the results of his mixare have met his most sang line anticipations.

Terrs Oak, Jose 18, 1-71.

Dean Six: It gives me great pleasage to comply with your request in "giving in my experience" of the laster Bone. I have been using it for some years and I consider itan exception article. I have used it on come, osts and wheat, and field that \$\foat{1}\$ and wheat, and field that \$\foat{1}\$ are finely. On my-wheat crop, after ploughing the ground. Therrow the Bone in, I have did in my wheat without any more fertilizing, and I find on comparing notes with my troffer-farmers that I make as much wheat as they do by using Guano, and, considering the outlay, I think I do a lattle letter.

Thave now the best crop of wheat that I have had for years, and used but the Laster Bone I shall use it again in the fall.

Yours respectfully.

We deal the latter when the laster Bone I shall use it again in the fall.

Price \$600 per Ton.

THIS ARTICLE is so well and favorably known that comment is hardly necessary. Its long continued popularity is the result of its uniformity, which has been rigidly maintained for many years. Wherever it has been used it has steadily maintained its superiority.

The Manufacturers give us every assurance at it is this season even richer than herefore.

W. C. Price of the season of Lister Bone with one-shaft Turner's Even-sion in the tall of 1800, and had be produced by the start of the superiority.

Last full taked bister Bone with one-shaft Turner's Even-sion in the tall of 1800, and had a last full taked bister Bone with one-shaft Turner's Even-sion in the tall of 1800, and 1800 and 1

Mr. Franklin Groomes writes: "I have used Lister Bone, reletted to in your note few days since and find it acts admirably on both wheat and grass."

Mr. Samuel Drson, of Dawsonville advises: "I am much pleased with application of the mixture of Lister Bone and Peruvan Guano; from its application I have secured a fine wheat cop, and I consider it an exertant article, and shall continue to use it."

Mr. Wm. E. Shaw, of Colesville, writes: "I have been using hister lone at the rate of 200 pounds to the acte, with less pounds of Peruvian Ganno, with univarying success for 3 years on all crops. My what has been followed after each seeding by a good set of grass. I consider it an explicit tertifizer, and recommend it is high."

thend it highly. Mr. Perry Sullivin advises: "I have used Lister Bone, one-fearth Peruvian tinco, wit great success on wheat and grass, and recommend it very highly.

Hon, Montgomery Eliar writes: "I have applied the factor Bone Du Clought of you to my cora, rie, and polato crops, and it has proved a most effective firth zer; it is generally regarded by my neighbors as one of the test, if not the best, and most economical fer-

John W. Bell, of Boltsville, Prince George's County, advises: "I used Liver Bone and Peruvian Guano last fall in the preporte a of little over one-third Peruvian Guano to the little over one-third Perusan Guano to the Bone on a portion of my land, and on another 1934 for Perusan. Guano a one-both applied at the same cost, \$12 per acre. Where I was the Little Bone and Guano the crop was better than where I used the Guano alone—The characterist the land the same. I also used Lister Bone on corn last year with great success."

THE BICKFORD & HUFFMAN

Mr. John Joy, Manager for Geo. W. Riges, Eq., addises: "I have used laster lione on all kinds of crops for several years, and know of no fertilizer so valuable."

Mr. M. J. Willer advises: "In the fail of 1800 I used free pounds of Guero and 200 ibs of Lister Place for acre on wheat, and had a fine growth of straw; but as with all my neighbors, lowing to the season, not roush wheat. I used it on timothy with success, in the same mixture last full and raised a fine wheat crop, and have a line set of grass."

fine wheat crop, and have a line set of glass."

Mr. Sam'l S. Cashell, writes: "I need Lister Bone and one-third Peruvan Grano, mixed last fall, at the rate of 320 pounds to the acre, and have never had better results from any other fertilizers. This mixture cost me \$11 per ton less than my neighbors pay for firthingers. I had a fine opportunity of the diag to one of my fields, which was very poor, and not capable of producing more than two harries of corn to the acre, I used this mixture at the same rate, and the wheat crop from this field was nearly equal to that from my best land. My neighbors think mine the best crop of wheat in the neighborhood, and I think it equal to any in the county. I have also a fine act of grass following the wheat. I have used it on potators also with success—I recommend it highly."

I Mr. John H. Gassaway, of Darnestown, writes: "I have used Lister Bone for several

Mr. A. C. P. Shoemaker advises: I have used the Lister Bone and one-third Peruvian Guano for three years past to good effect, and perfer it to all other fertilizers. I had this season a fine wheat crop and an excellent set of grass to follow. I have now the best field of clover in any part of my neighborhood. I have used it also on Potatoes with one-third Guano.

Mr. Americus Dawson, of Dawsonville, advices: "I used Lister Bone with one-fourth Peruvian Gaano on my wheat crop last fall at a cost of seventeen dollars per-ton less than my neighbors paid for the fertilitzers they used, and I made equally a most excellent crop of wheat. am much pleased with the article."
