BONE DUST

THE subscriber finding it impossible to supply the demand for his BONE DUST, under the old mode of manufacturing, has, since last fall, applied

The most Improved Machinery to his Factory, enabling him to make from four to six tons per day, and much finer than any heretofore made by him; 50 pounds per acre can be applied with a drill. His dist is made from the

RAW BONE, and WARRANTED PURE. His Bone Dust has stood the test of the Farmers of this and Montgomery county for the last eleven years, and has found it to be the chaepiest and not of the most reliable Fertilizers used, not only giving quick returns, but a quick and permanent improver to the soil. At the low-price sold, every farmer can afford to use it. The large quantity now on hand ready for use, and facilities for manufacturing, will chable him to fill all orders from Farmers. The price this fall is reduced to this fall is reduced to

\$45 Per Ton, IN SACKS. Parties furnishing their own Sacks, \$43 per ton. But one price for large Factory, Araby Mills, three miles
South of Frederick, Post Office, Frederick,

AND IS WARRANTED FREE FROM ADULTERATION.

SANDY SPRING, MCMCGONFRY Co , Mr., 5th Month 10th, 1870. SAND SPRING, MEXICONTRY Co., Mp., 5th Month 10th, 1870.

My friend, E. G. Enwaye, Agentus Witton, Whence Co., Billimore, Md.:

At thy instance I was induced for try a small quantity of a fertilizer prepared for the above Compeny, in the Spring of 1800 and was so well satisfied with its effects on corn and potatoes, that I used it on my wheat in the fail following, and also induced several of my neighbors to use several tons. I put no other manure on for potatoes, and I never had a better crop. I put the some ground, which was thirt, in wheat last Fall, with no additional manure, except a could sprinking of the same manure, and the result, so far, is that it is the best wheat I have seen the Spring, now heading, and other wheat six to twelve inches high; and, as a general thoug, in the section of country where I reside, when tooks unsulty to kward, and prospect of a short crop. I have sheat in the same field, that be ground

high; and, was general thing, in the section of country where I reside, whent looks unusually brakward, and prospect of a stort crop. I have wheat in the same field, that the ground was manuared from Barn Yard. Bone and Peruvias Guano, and it is rery much behind Whama's. Thave called the attention of the reighboring farmers to see the wheat, and, without an exception. Hey say it is the best they have seen.

Lam now using Whama's Raw Bone Super Physiphate as the only manure for my corn and potation. Two ditions an acre of outs, stabile ground, with no additional manure of any kind, and it now hooks better than three-fourths of the wheat I have seen. I do not exist to use and other fortilizer this fall for wheat. I think all that is needed, is for farmers to see the effects, to in lace them to use it; and, further, I have been to see the manufactory, and imported by satisfied that the public may rely upon being supplied with a genuinearticle.

Respectfully, thy frend,

WM. II. STABLER.
