Sandy Spring, Montgowert Co., Mo., 5th Month 16th, 1870. My friend, E. G. Edwanis, Applifor Walten, Whenn & Co., Bullimore, Md.:

At thy instance I was indused to try a small quantity of a fertilizer prepared by the above Company, in the Spring of 1803, and was so well astisfied with its effects on corn and potatoes, that I need it on my wheat in the Fall following, and also induced several of my neighbors to use several tons; I put no other manure on for potatoes, and I never had a better crop. I put the same graind, (which was thin,) in wheat last Fall, with now additional manure, except a swall sprinking of the same manure, and the result, so far, is that it is the heat wheat I have seen this Spring, now heading, and other wheat six to twelve inches high; and, as a general thing. In the section of country where I reside, wheat looks unnually backward, and prospect of a si orterely. I have wheat in the same field, that the ground was manured from Harn Vard. Home and Feruvian Guano, and it is very much behind Whann's. I have called the attention of the neighboring farmers to see the wheat, and, without an exception, they say it is the lest they have seen.

I am now using Whatn's Haw Bone Super Phosphate as the only manure for my corn and potatogs. I used it on an agree of ords, stubble ground, with no additional manure of awa kind, and it now books better than three-fourths of the wheat I have seen. I do not expect to use any other fertilizer this fall for wheat. Libink all that is needed, is for farmers to see the effects, to induce themic needs and, further, I have been to see the manufactory, and am perfectly satisfied that the public may rely upon being supplied with a genuinearticle.

Respectfully, thy friend. My friend, E. G. Euwanies, Agral for Walten, Whann & Co., Billimore, Md.:
