SIX O'CLOCK, P. M. The workshops open wide their doors At six o'clock, p. 20., And workmen Issue forth by scores, At riz o'clock, p. m.

Of all the minutes in array, Of hours that go to make the day, There's none so precious, so they say, As six o'clock, p. m.

How many children show delight At six o'clock, p. m., How many homes are rendered bright At six o'clock, p. m.! How many happy little feet the out into the busy street, With joyous bound, Papa to meet,

At siz o'clock, p. m.

Thousands of tables draped in white, At six o'clock, p. m., Tho gathered families unite, At six o'clock, p m., And as they eat the frugal fare, They quite forget their toil and care, And drop their heavy burdens there, At six o'clock, p. m.

Then blow, ye shricking whistles, blow! At six o'cleck p. m., And let the weary toilers go At six o'clock, p. m. lling out, releasing bells, ring out ! And bid the welkin take the shout, And echo it all round about. "'Tis six o'clock, p. m.

Useful Hints.

KILLING BLACEBERRY BURRES. - One of the editors of the Rural New Yorker, in answer to the question, how to kill blackberry vines, says: "I have not only planted but killed out several acres of blackberry bushes during the last ten years, and bave not found either a very troublecome task. Last summer I destroyed a plantation by simply moving off the plants and thoroughly plawing up the roots-Not a plant lived, nor has a sucker appeared this season, and I attribute my success more to the time of doing the work than to the manner or thoroughness. The time selected was immediately after gathering the fruit, i. e., the first of August. | The plants were then growing vigorously, and the stems and roots immature, consequently the cutting and plowing was too much even for a blackberry. This simple method is almost equally as certain in destroying noxious plants of other species, but the time must be varied to correspond with the growth of the plant, as some mature early and others late. Always select a time when the plants are making or just finishing their most vigorous growth."

To Make Cows Give Mick .- The agricultural editor of the Be-Keepers' Journal vouches for the following, hunded him by a friend :-"If you desire to get a large yield of milk, give your cow, three times a day, water, slightly warm, slightly salted, in which bran has been stirred at the rate of one quart to two gallons of water. You will find that your cow will gain twenty-five per cent, immediately un-der the effects of it, and she will recome so attached to the diet as to refuse to drink clear water, unless very thirsty, but this mess she will drink almost at any time, and ask for more. The amount of this drink is an ordipary water-prinful at each time morning, noon and night. Your animal will then do her best at discounting the lacteal."

WINTER-KILLED GRAIN -A light harrow run through the fields, and afterwards using the roller, is considered an effectual treatment for winter-killed grain. The ground should be sufficiently dry to prevent injury from the horses' hoofs when this is done. And if your meadows have the appearance of being bide-Lound, give them a harrowing and then top dress with a compost of five bushels of names, two do, bone dust, or other good phosphates, two do. salt, one do. plaster per acre; mis well, broadcast it, then harrow it in and roll, and the result will be many times the advantage over the cost.

Wit and Humor. What is the difference between a hill and a pill? One is hard to get up, and the other is

hard to get down. A Connecticut school boy has written a com osition on the horse, in which he says it is as

animal having four legs, "one at each corner It is impossible to look at the sleepers in our churches during service without being remitaled that Sunday is a day of rest.

Some one says the lion and the lamb mar lie down together in this world, but when the lion gets up it will be hard work to find the

A gentleman traveling in Georgia met an old colored man, on whose hat was encircled the crape of grief. The gentleman said :--"You must have lost some friend, I see. Was ita near or distant relative?" "Well pretty distant-'bout 34 miles, sah." Admitted it. A down-caster being told that

bis father, noted for his meanness, would tell a lie for six-and-a-quarter cents, indignantly denied the allegation, but at the same time adwitted that he might relate sixteen for a dollar A negro boy who was suspected of[surreptionly meddling with his neighbor's fruit, be caught in a garden by moonlight, nonmed his detectors by raising his eyes, clasphis hands, and piously exclaiming, "Good lord I dis yers darkey can't go nowhares to pray any more without bein' 'sturbed."

A farmer, who was sympathizing with his neighbor Jones on the death of his son, said : 'You should remember, Mr. Jones, there is no loss without some gain. John, you remember, was always a monstrous exter." "I know he was," responded the bereaved parent : "but to think he was laid up with rheumatism all the flater and died just in haying time is Pretty tough, neighbor."

A Texas colored jury were told by the judge trire and find a verdict. They went to the July toque. The aberiff and others, standing outels, heard the opening and shutting of dranes, the slamming of doors, and other of nausual commotion. At last the jaryame back Into the court, when the foredone loked sperywhat in the draws and behlad in do', and can't found no verdic'. It

Warn's de room . An old bachelor picking up a book, exclaimed spon seeing a wood-cut, representing a man keeling at the feet of a woman 1. "Before I would kneel to a woman, I would encis els my neck with a rope and stretch it." And then tarning to s young woman, he laquired : "Do you not think it would be the best I could "Il would be the best for the weman,
