ington firanch, there can be no doubt of its he is night growth. Men

The flatter of any and control MEAL and the state of the

Little Senica Creek on a trestle-work five hun-dred and lity feet long and one hundred and six feet high. Several streams on the road \$5.00 \$6.50 \$7.50 \$10.00 \$15.00 sar feet log. Several streams on the road here to be crossed on treatle-work for the persont, council to the impossibility of getting smitable stone can be the impossibility of getting smitable stone for the masoury in abuntments and piers. When the road is completed and in running order so that suitable stone can be obtained, they will be replaced with troin torders. Much of the scenery through this secuency of the Allegonies. The next stream of any moment is Buck Lodge, which is crossed by an arch of twenty-five feet, being ton of the arch of sixty-five feet, being ton of the arch of sixty-five feet, being something over one hundred teet from bottom of stream to top, of failing. One mile from fixek Lodge the road crosses Parr's lidge at an elevation of five lundred and forty-four ther above tide, with a cut of thirty-for hundred teet long by thatty fiet deep. Just be cond Parr's Ridge is the Little Monocacy river, which is crossed a short distance above the appealued over the Nonocacy tiver, which is crossed as four distance and thirty feet long by secusive feet high. Two mites beyond is Monocacy tiver, which is crossed a short distance above the appealued over the Nonocacy is the largest and most costly piece of work on the road. It is seen hundred and fifty feet long and uninety feet above water. It compared a minute feet and two abutments, all of which are ten feet thick at top. It has four spans, three of two hundred feet, and one of one hundred feet; it HANAUER'S,

The entire road when completed will have cost between two and a half and three millions of dollars. Every thing in connection with it is to be of the very beat quality. The rails are to be what are known as sixty pound rails, which are heavier than ordinary rails, and are roiled at the Company's works in Cumberland, where they are being turned out at the rails of a mile of iron, weighing a hundred ton, per day. The cross-tief are laid much closer and the ballast is considerably deeper than usual the ballast is considerably deeper than usual the mile. The road is constructed with speciar regard to the carrying of passengers and the mails. By this route the distance between Washington and the West, will be considerably shortened dit is forty-two miles from Washington to Relay House, and sailty time from the west, which will be asset in go forty-nice miles, which will be asset the confidence of this road is hard to be estimated. It must certainly become the great thoroughless to and from the West and Northwest, and the National Capitol. The Pittsburg and Control levels half on the Relay House to be retimated, it must certainly become the great thoroughless the price being in greenbacks, \$43 per pair.

The Snor Firches, and surject work, while others were and surject work, while others who have no income and don't work, while others work in their families who have no income and don't work, while others work in their families who have no income and don't work, while others who have no income and don't work, while others work almost and sainty and sainty employed almost start work. When he was of its part to the grindrate of the sainty their more than the provided with a part to the families who have no income and don't work, while others who have no income and on't work, while other

contemplated road from Pittsburg to Chicago, there will be a connected and direct route from Baltimore or Washington to Chicago, which taken in connection with the Northern Pacific road, will give a through line
