Have Patience A youth and maid, one winter night,
Were sitting in the corner;
His name, we're told, was Joshua White, And her's was Patience Warner.

Not much the pretty maiden said Beside the young man sitting; Her cheeks were flushed a rooy red, Her eyes bent on ber knitting. Nor could be guess what thoughts of him

Were to her bosom flocking. As her fair flingers, swift and silm, Flew round and round the slocking. " While, as for Joshus, a beshful youth, His words grew few and fewer;

His chair edged nearer to her. Mentime the ball of parn gave out, She knit so fast and steady, And he must give his aid, no doubt,

Though all the time, to tell the trnth,

To get another ready. He held the skein ; of course the thread Got tangled, anarled and twisted; " Have Patierqu !" cried the artless maid,

To him who her assisted. Good chance was that for tongue-tled churl To shorten all palaver; "Have l'atience!" cried he, "dearest girl!

And may I really have ber ?" The deed was done, no more that night, Clicked needle in the corner; And she is Mrs. Joshua White That once was l'atience Warner.

Useful Hints.

AROUND AGAIN .- Farmers, the season has come once more when patent right swindlers will visit you again. Turn a deaf ear to all of their eloquence and finely spun stories less rou want to be swindled and humbugged Don't invest a dollar in any county or township right in any machine, or you will pay dearly for your folly. If any article is worth a patent, and of practical utility, the owners pore of it to some established manufacturing stablishment. If you want a new farming implement, go to some home dealer and pur chase it, but by all means give the stranger or vender of patent rights a wide berth. If the come on your premises show them the gate way, and if they don't take the hint and leav mediately, set them up in the patent leathbusiness, and bid them begone with their swindles and humbugs. Recollect our advice .- McDutte Journal.

Sour HIXTS ABOUT HORSES .- A correspon dent of the Baltimore San says: Over forty years in the management of borses has taugh me that one of the best things to prevent bots and worms in horses is to give them in their feed once a week, for about four or five RETILIZER ful of wood ashes and a lump of rozin th size of a walnut; pulverized. Great attention stiquid be paid to horses' feet. Many very fine horses are ruined by neglect of this attention. Never let horses stand in stable litter You will also find it of great benefit to keep i voir stable a vessel with chamber-fre in it. is warra weather wet well and swab the fee with it. Great care should be taken in shoring horres. First have all of the loose scroff taken cut of the buttom of the foot, and any loose rigs on the frog smoothly taken of, but nothing more. In buying a horse look particular ly well to his feet, and never breed from ! horse with a contracted hoof.

PLANTING WHOLE AND CUT POTATORS .- Dr. Heximer, of New York, in a result of an exeroment of plainting the potato in screnteen liderent ware, found that best results were green from one large potato, whole, in each "The next heat from two large half pota-

escut lengthwise; next the seed end of a arge potato; next from medium-sized potators planted whole; the smallest from small half potatoes A medium potato he plante whole; large ones cuts in half, and the largest in four peices, each, lengthwise, always taking care to select his best and soundest potatoes for seed.

graph who lost seventy chickens by gapes, last year, now says that fresh water, daily with a lump of roll brimstone kept in it, wil Le found a certain preventive.

but that nothing equals it as a RENO-

Contract of the second Pure Raw Bone, Guano, Sulphuric Acid and Salts of Potash and Soda; AND IS WARRANTED FREE FROM ADULTERATION.

My friend, E. G. Edwards, Agent for Walten, Whomn & Co., Baltimore, Md.:

At thy instance I was induced to try a small quantity of a fertilizer prepared by the above Company, in the Spring of 1869, and was so well ratiofied with its effects on corn and partitled; that I used it on my wheat in the Fall following, and also induced several of my angibines to use several tons. I put no other manure on for potatoes, and I never had a least coop. I put the same ground, (which mas thin,) in wheat last Fall, with no additional administic, except a small sprinking of the same manure, and the result, so far, is that it is the last wheat I have seen this Spring, now heading, and other wheat six to twelve inches high; and, as a general thing, in the section of country where I reside, wheat looks unusably buckwind, and pro-pect of a short corp.—I have wheat in the same field, that the ground was manured from Born Vard, Bone and Peruviah Guano, and it is very much behind Whoma's, I have casied the attention of the neighboring farmers to see the wheat, and, a sithout abeyong what wheat is the same field, that mere form in a farm now using Whann's Haw Bone Super Phosphate as the only manure for my corn and portions. I used it on an anere of oats, stubble ground, with no additional manure of the kind, and it now looks better than three-foorths of the wheat I have seen. I do not expect to use any other fertilizer this fall for wheat. I think all that is needed, is for farmers to see the effects, to induce them to use it; and, farther, I have been to see the manufactory, and am perfectly in higher than the public may rely upon being supplied with a genoine article.

Respectfully, thy friend,

For Corn, Potatoes, Wheat, Oats, and all other Crops, WHANN'S RAW BONE SUPER PHOSPHATE IS UNEQUALLED.
